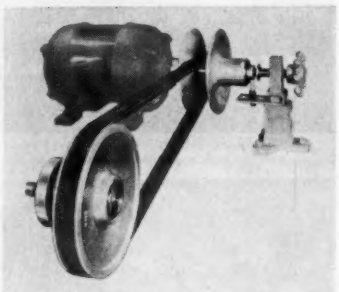
VARIABLE SPEED SHEAVES
wide belt type have fixed centers



Capacities of 1 to 3 hp and speed change ratios as high as 8:1 are available in line of smooth-faced variable speed sheaves. They operated on fixed centers and employ 1 3/16-in. wide V-belts. The controllable sheave is mounted on the motor and the spring-actuated sheave is mounted on the shaft of the driven machine. Factory lubricated sintered bronze bushings and automatic belt alignment are incorporated. With a 1750-rpm motor, a speed range of 400 to 3200 rpm can be obtained at the driven shaft. Made by **Speed Selector Inc.**, Box 312, Chagrin Falls, Ohio.

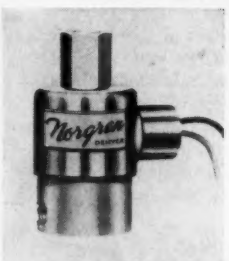
SOLENOID VALVES
two and three-way directional types



Suited for air, oil, cold and hot water, and gas use, the first solenoid valves offered by this company can be operated at up to 600 cycles per minute. Models in two series have an operational temperature range of −20 to 200° F ambient and −20 to 175° F media. Series A units include two and three-way and directional types, both normally-closed and normally-open. They have a stainless steel body or a brass body with a stainless steel seat insert. Pipe sizes are 1/8 and 1/4 in. Grommet or conduit type electrical outlets are offered. Series B midget, two-way normally-closed valve with 1/8-in. ports has a brass body with stainless steel seat insert and grommet type electrical outlet. All models can be serviced without removal from the line, have splash-proof housings, and will operate in any position. Coils are available for all common alternating and direct current voltages. Made by **C. A. Norgren Co.**, 3400 S. Elati St., Englewood, Colo.

FORK LIFT TRUCKS
capacities to 40,000 lb

Standard lifting heights for three models of Gerlinger H Series fork lift trucks are from 10 to 20 ft. The heavy duty trucks for handling steel and concrete products, lumber, and timber have capacities of 32,000, 36,000, and 40,000 lb. The latter unit is illustrated. All are powered by a Continental six-cylinder, 170-hp engine, with a Continental diesel engine optional. Torqmatic power shift transmission (standard) gives full power flow under all operating conditions. The pivotal steering axle is actuated by a hydraulic power booster. Available from **Towmotor Corp.**, 1226 E. 152nd St., Cleveland 10, Ohio.

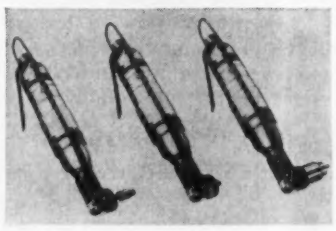
▲ For more details circle **NED-3 M8** on enclosed inquiry slip ▲

PRESSURE CONTROL
explosionproof unit has 21 ranges

Designed for use where space and weight are important factors, this pressure control is Underwriters' Laboratories - listed for Class 1, Group C and D, and Class 2, Group E, F, and G (NEMA 7-9, 9A) service. It has external adjustments for setting the operating range, visible calibrated dial, visible hermetically sealed mercury switch, and 1/2-in. external and 1/4-in. internal pressure connections. Control is suited for surface or panel mounting and is available with breather or drain. Twenty-one operating ranges from 0-30 in. vacuum to 0-1000 psi are offered. Size is 5 x 7 3/4 x 9 7/8 in. and weight is 8 lb. Made by **Mercoid Corp.**, 4201 Belmont Ave., Chicago 41, Ill.

▲ For more details circle **NED-4 M8** on enclosed inquiry slip ▲

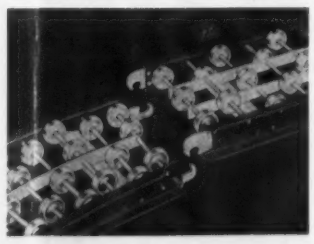
ANGLE AIR TOOLS
for drilling and fastener driving



Series of Keller air tools includes angle drills, nut setters, and screwdrivers, all designed for minimum clearance applications in assembly work. They have ball bearings, Zerol bevel gears, and splined drives. Each tool is offered in five sizes with speeds ranging from 3200 rpm for the smallest to 450 rpm for the largest size. The 12L-2 screwdriver at left handles screw sizes from No. 6 to 1/4 in. The 16L-2 nut setter in the center ranges in capacity from No. 6 to 1/4-in. machine nuts, and the 11L-2 5/32-in. capacity tool at the right is offered with a standard right-angle drill attachment. Optionals are a 45-degree angle attachment and right-angle attachments with single and double drivers. Made by **Gardner-Denver Co.**, 1350 Front St., Quincy, Ill.

▲ For more details circle **NED-5 M8** on enclosed inquiry slip ▲

GRAVITY WHEEL CONVEYORS
in 5 and 10-ft lengths



Added to line of materials handling conveyors and systems, line of ball bearing gravity wheel conveyors provides straight lengths of 5 and 10 ft. Widths of 12, 15, 18, and 24 in. are offered. Curved sections are made with 33 and 15-in. inside radii, in 90 and 45-degree angles. Spur switches, Y-switches, spur curves, guard rails, and gate sections are also available. Made by **Conveyor Specialty Co.**, 33 Newport Ave., North Quincy, Mass.

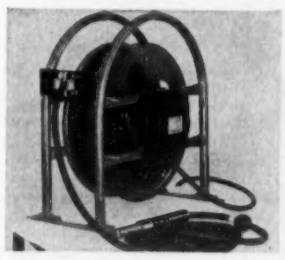
▲ For more details circle **NED-6 M8** on enclosed inquiry slip ▲

FLEXIBLE GEAR COUPLING
operates at up to 5000 rpm

Ten bore sizes ranging from 7/16 to 1 5/8 in. are available in the Nyflex lightweight gear coupling, a non-lubricated, flangeless, flexible unit with a one-piece nylon sleeve. It weighs only 3 1/2 lb and will operate over a wide temperature range at up to 5000 rpm. It can take misalignment of nearly 5 deg and will absorb both angular and parallel misalignment and end float with a minimum of backlash. An 800-hr test showed no sign of wear at total misalignment. Made by **Sier-Bath Gear & Pump Co.**, 9242 Hudson Blvd., North Bergen, N. J.

▲ For more details circle **NED-7 M8** on enclosed inquiry slip ▲

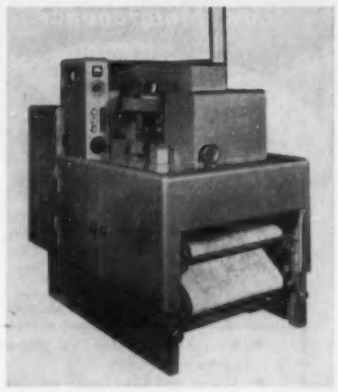
SELF-RETRACTING REEL
holds 50 ft of 2/0 welding cable



Equipped with a heavy-duty retracting spring, the Weldreel Model EA2 will hold 50 ft of 2/0 welding cable and has current capacity of 300 amp with 60 per cent overload factor. Cable pays out easily to required length and is held by locking pawls. Releasing the pawls by means of a slight tug on the cable allows spring to rewind the cable. Unit has welded tube frame and can be easily mounted on walls, floor, ceiling, or mobile equipment. Entire mechanism is insulated from end support brackets. Ball bearing and spring are lifetime lubricated. Four graphite brushes maintain full load contact with copper armature. Made by **United Specialties, Inc.**, Box 698, El Dorado, Ark.

▲ For more details circle **NED-8 M8** on enclosed inquiry slip ▲

MICROFILM PRINTER
operates continuously from tab cards



Printed material is automatically turned out at the rate of 20 fpm by the Copyflo 24 continuous xerographic printer, reproduced from tabulating cards which hold a single frame of film. The near - instantaneous copying process reproduces from microfilm onto plain, unsensitized paper. Dry black - and-white prints that are photographically accurate are turned out up to 24 in. wide. A unitized microfilm system combines the equipment of several manufacturers in copying original drawings and tracings onto microfilm and automatically mounting the processed film frames into die-cut apertures of data-processing cards. The Xerox Copyflo machine utilizes a 2000-ft roll of plain white paper, vellum, or offset paper master stock. Machine is sold or leased by **Haloid Xerox Inc.**, 2-20 Haloid St., Rochester 3, N. Y.

no UPS and DOWNS

IF YOU HOLD YOUR WORK IN A

Zagar COLLET INDEXING FIXTURE

In Addition: Save Special Tooling—Speed Job Setups—Simplify and Save On Your Small Parts Production . . .

Zagar collet indexing fixtures, in 1" and 2" capacities, are adapted to slot milling, straddle milling, drilling, tapping, and grinding. Zagar collet fixtures are known for their rigid holding. No vertical movement of work pieces, no chatter or vibration, no annoying movements which contribute to imperfect work. Zagar collet fixtures keep accurate production up—keep scrap piles down.

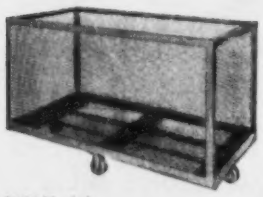
UNIVERSAL

EXPANDED METAL FLOOR TRUCKS



MODEL 4-A
Length 60", width 30", height 30".

MODEL 4-B
Length 60", width 30", height 48".

- Greater Economy
- Greater Utility

Literature Mailed Promptly Upon Request

Durable, highly maneuverable, economically priced. Designed to meet a wide range of material handling jobs. Rigid angle iron frame. Equipped with four 4" ball-bearing fiber casters—swivel casters centered at front and rear; rigid casters centered on each side. Model 4-B has hinged drop panel on side equipped with positive safety latches.

- Also other types of expanded metal containers in sizes and quantites to customer's specifications.

UNIVERSAL INDUSTRIAL CONVEYOR

Low First Cost . . . . Low Maintenance

- Removable sides to permit handling large cartons or parts.
- Motor totally enclosed inside conveyor body easily accessible through removable ventilating panel.
- Elevates to desired height with simple hoisting mechanism.
- Driven by means of roller chain to roller bearing equipped gear box.
- Main drive shaft and idler pulley operate on double-sealed ball bearing.
- Standard belt width, 12 inches. Other widths can be furnished to meet your requirements.
- Belt speed, 74 F.P.M.—adjustable if desired.

Toward Better Maintenance

Safe and pleasant working conditions, productivity, and profitable operation throughout industry are closely allied with efficient plant maintenance and engineering. A majority of our readers are concerned with some phase of this management obligation. Any new development in maintenance equipment, material, or technique creates far above-average reader action. Editorially, as well as in the advertisements, we cater to these reader needs. We present all the important developments in maintenance and engineering products that can contribute to more efficient plant operation.

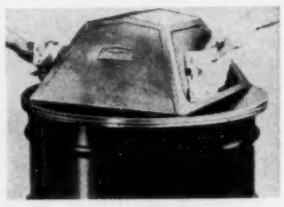
Each year, NEW EQUIPMENT DIGEST participates in the Plant Maintenance Show. It will be held in the Public Auditorium, Cleveland, Ohio, January 26 to 29, 1959, inclusive. We urge you to attend.

You will be able to see, first hand, many of the new and improved products that we have described editorially. You will get ideas that can be converted into improved plant operation. You can discuss unsolved maintenance problems with sales and engineering personnel. You will also be able to hear experts discuss all phases of industrial plant maintenance at the twenty concurrent sessions and round tables that will be repeated on two successive two-day programs which make up the conference. Over 400 manufacturers will exhibit their products.

Advance registration cards, details of the conference program, and hotel information can be obtained from Clapp & Poliak, Inc., 341 Madison Ave., New York 17, N. Y.

A. N. Gregg
EDITOR

SWING-TOP DRUM LID KIT converts drum to waste container



Empty 15, 30, and 55-gal drums can be converted to safe, attractive waste receptacles with conversion kits now available. Kit consists of one Convert-A-Drum swing-top lid, a can of Instant-Dry spray coating to give drum a new look, and one Easy-On burlap bag that hooks inside drum to prevent corrosion and to facilitate disposal. The steel lids have two free-swinging doors and are finished in baked green enamel. They are available individually or as part of the kits and are priced from $7.75 to $14.25. The 55-gal drum kit sells for $19.95. Offered by **General Scientific Equipment Co.**, 7516 Limekiln Pike, Philadelphia 50, Pa.

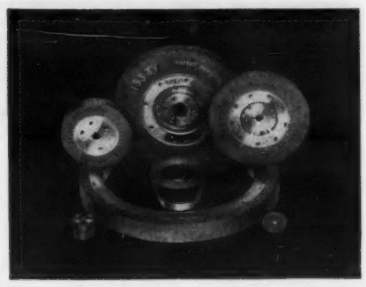
NEW IDEA IN POWER BRUSHES!



HOW OSBORN TY® BRUSHES

can cut your high finishing costs

For jobs *beyond the reach* of standard wire power brushes—Osborn TY® Tool Brushes are designed to work where abrasive stones or belts, rotary files or tumbling and shot blasting equipment have been used. And TY® Brushes do many jobs *better...faster...at far less cost.*

Production-proved TY Brushes give you maximum work efficiency with minimum brushing pressure ...greater brushing action strength ...positive control over area of brush contact . . . uniform work finish . . . and extra-long brush life.

Write for full details. *The Osborn Manufacturing Company, Dept. N-1, Cleveland 14, Ohio.*

TY® BRUSH APPLICATIONS
- Wire insulation stripping
- De-burring and blending sharp edges
- Precision surface finishing
- Removing flash
- Roughening materials for bond
- Removing surface scale and oxides

FREE BOOKLET—Write for your copy of "Osborn TY® Tools"—includes complete, illustrated data on applications and specifications covering many of your production jobs.

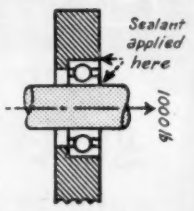
Edwin F. Oblinger, Chief Engineer, Parker Sweeper Co., says:

"WE THREW OUT PRESS FITS FOR BEARINGS...



We used interference fits to prevent bearing races from turning in the gear box of our 4HP Turbosweeper. Maintaining close tolerances was a constant headache. If the fit was loose, the race would slip and fret; if the fit was tight, the race would deform shortening bearing life. Now LOCTITE does away with press fits. We open tolerances almost .002" on shaft and housing and use a slip fit, filling the clearance with LOCTITE. The bearings are retained with a force equal to the customary interference fit . . . a load of over 1,000 pounds is needed to break the bond . . . but we've reduced rejected parts from 8% to less than 1% and reworked parts fell from 20% to 0! Field reports are excellent."

Loctite is a penetrating liquid that hardens into a strong, heat and oil-resistant bond between closely fitted metal parts. Loctite eliminates the need for interference fits on bearings, sleeves, shafts and studs . . . locks nuts to bolts, seals pipe and tubing joints. Write today for information and sample.

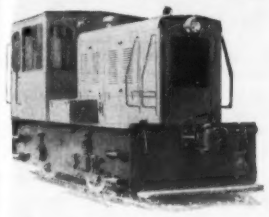
INDUSTRIAL LOCOMOTIVES offered in 5 to 40-ton sizes

High continuous tractive effort in the entire working range and powerful acceleration for ease of switching are built into this line of custom diesel-hydraulic and diesel - electric locomotives.



Each has a high-torque diesel engine, torque converter, and power shift transmission. Made in 5 to 40-ton sizes for track gages from 21 to 56½ in., they have welded main frames, high visibility cabs with ventilating windows, and controls which permit use by unskilled workers. Among numerous accessories offered is a fume scrubber which permits locomotive use in tunnels, buildings, and other confined areas. Made by **Rogers Brothers Corp.**, 26 Orchard St., Albion, Pa.

HIGH VOLTAGE LIGHT BULBS 100-1500 w units have 2500-hr life

Expanded line of Extended Service light bulbs for high voltage service is designed to offset the high labor cost involved in relamping. Made with a 230 to 250-v range, bulbs have a 2500-hr life. They are available in sizes from 100 to 1500 w. Lamps have lifetime filaments and are designed for use in hard-to-get-at locations. Use of these lamps can cut bulb changes 2½ to 3½ times over most general service lamps. Made by **Westinghouse Electric Corp.**, Lamp Div., MacArthur Avenue, Bloomfield, N. J.

POWER YARD MACHINE suited for wide range of work

Particularly suited to grounds maintenance work, the Yard Master Mark 30 is now equipped with a reel - type mower and can be fitted with attachments for grading, rolling, mulching, snow plowing, and to haul loads weighing up to ½ ton. Three 21 in. reel mowers can be added so that machine will cut a 5-ft wide path. Ease of handling is assured by the Speedmatic transmission with its five forward speeds, neutral, and reverse. Steering mechanism enables it to turn in a 36-in. inside radius. Power for the attachments and to the jumbo balloon tire wheels is provided by a four-cycle Lauson air-cooled gasoline engine. This small rider type tractor is made by **Porter-Cable Machine Co.**, 131 Exchange St., Syracuse 4, N. Y.

NEW STANLEY TIGHTENERS

Versatile...Lightweight...Sturdy—

The Stanley O Tightener sets a new standard of efficiency for tensioning steel strapping to the required maximum with a manually-operated steel strapping tool with unlimited take-up. Operates with ease and speed in any position. Requires fewer strokes for take-up of strapping; reduces operator fatigue. Seals may be applied behind tensioning wheel, cutting overlap to minimum required for maximum joint security.

- Insertion of strapping is easy, quick.
- Light weight and balance assure handling ease.
- Two pawls on tensioning wheel make tightening action more positive.
- Unlimited take-up.
- Seals applied in front or behind tensioning wheel.

Load Measuring with Dynamometers

"Dillon Dynamometers at Work in the World" is a compilation of information on how and where these instruments are serving industry. Pictures show how to make spring testers, measure deflection of aircraft wings, check railroad switches, measure motor torque, and protect equipment from overload. This pictorial, 96-page manual on absorption type and traction load measuring dynamometers is priced at 50 cents. Published by W. C. Dillon & Co., Box 3008, Van Nuys, Calif.

Cherry-Burrell Industrial Flexflo Centrifugal Pumps give you

LOW FIRST COST
LOW OPERATING COST

Low first cost — Unpolished "Flexflo" pumps save you as much as 25% over polished sanitary models.

Low operating cost — Exclusive involute body design delivers full-flow discharge with low friction losses . . . reduces operating power costs. Easily maintained. Exclusive take-apart design permits 30-second disassembly — 60-second reassembly — all without tools. Greatly reduces cleaning time.

Fittings and Valves — Cherry-Burrell offers a complete line of fittings and valves to make take-down or in-place line cleaning fast and easy.

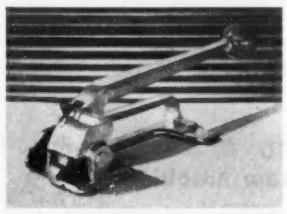
STRAPPING TIGHTENER will strap in any direction



Used to apply steel strapping to packages of varying sizes, shapes, and weights, the Stanley O strapping tightener can be operated in any position. It will strap in any direction, using the right or left hand. The lightweight, manual tool requires a minimum number of strokes to operate and, by applying seals to the rear of the tensioning wheel, cuts overlap to a minimum. Tool is quickly removed after strapping is completed. Light duty Models OL3, OL4, and OL5 take ⅜, ½, and ⅝-in. strap, respectively. Medium duty Models OM5 and OM6 take ⅝ and ¾-in. strap. Made by **Stanley Works**, Stanley Steel Strapping Div., 111 Elm St., New Britain, Conn.

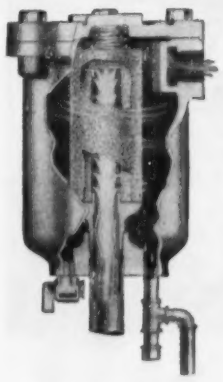
ADAMS PORO-STONE AIR FILTER,

designed to remove oil, water and foreign matter from compressed air lines with minimum pressure drop.



The R. P. Adams Poro-Stone air filter is engineered to efficiently remove entrained oil, water and pipe scale from compressed air lines. Liquid droplets and solids being carried by the gas stream are first removed by centrifugal action in an annular chamber. Secondary filtration is achieved by passing the air or gas stream through a poro-stone unit. An automatic trap can be provided to discharge the residue from the cyclone chamber.

At rated capacity the filters operate at a maximum pressure drop of only ½ lb., thus insuring delivery of line pressure to the point of consumption.

The units require virtually no service or maintenance—thereby insuring continued trouble-free, low cost performance.

ADAMS Poro-Stone air filters are available from stock in sizes to suit your needs. For further information, write today for Bulletin 117, R. P. Adams Co., Inc., 227 East Park Drive, Buffalo 17, New York. *Advt.*

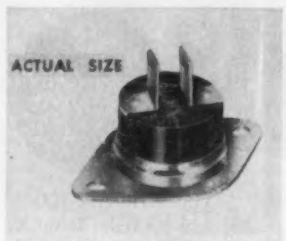
THERMOSTAT
precision, fixed temperature type



For use where space and weight limitations exist, the Klixon M201 precision thermostat has an over-all diameter of 5/8 in. and a weight of only 4 oz. Switch action is single - throw, with double-contact make-and-break. Actuating element of the fixed temperature unit is the thermal disc. A stainless steel enclosure offers dust and dirt protection. Life cycle is from 6000 at 12 amp resistive to 100,000 at 2 amp resistive, 120 v ac. Temperature settings range from −85 to 500° F. Tolerances and minimum differentials between opening and closing temperatures in settings of 32 to 300° F are ±5 to 12° F and 15 to 25° F, respectively. Special constructions for high impact loads and high and low temperatures are available. Made by **Metals & Controls Corp.**, Spencer Div., 1500 Forest St., Attleboro, Mass.

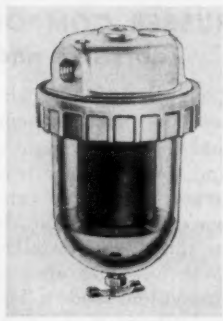
WEAR-IN COMPOUND
for breaking in new machinery

Galling, seizing, and excessive wear occurring during the "wearing-in" of new machinery can be minimized by the use of Molykote wear-in compound. It also tends to hold the breaking-in period to a minimum time. Compound need not be burnished into the surface. Made by **Alpha-Molykote Corp.**, 65 Harvard Ave., Stamford, Conn.

▲ For more details circle **NED-50 M8** on enclosed inquiry slip ▲

AIR LINE FILTER
uses throw-away type cartridge



Air entering this compressed air line filter passes through a directional flow chamber which creates a cyclonic separating action within its plastic bowl. Dirt, grit, condensate, and other foreign matter are automatically separated and forced to the bottom of the bowl. Residue is blown out by opening the blow-off valve. Air thus cleaned passes through an interchangeable throw-away filter cartridge where a second cleaning process removes all remaining particles within a 40-micron rating. Unaffected by most gases and liquids, the cartridges are offered in 10, 25, and 40-micron ratings, and can be changed without removing the filter from the line. Filter is designed for straight-through or angle installation in 1/4, 3/8, 1/2, and 3/4-in. NPT sizes. An aluminum bowl is optional. Made by **Perfecting Service Co.**, 332 Atando Ave., Charlotte 6, N. C.

FEED RATE INDICATOR
gages forward, reverse feed rates

Range of 0 to 50 ipm over 4 in. of travel is built into the 110-v ac Natco feed rate indicator. The compact, portable device facilitates the gaging of forward and reverse feed rates of machine tool components. Indicator consists of a pick-up component and a control unit, both housed in a 9½ x 6½ x 4½-in. case. Pick-up is mounted on a machine way or slide by permanent magnets in its base, and the feed rate is read directly from a dial on the control component which is light enough to be held in the user's hand. Indicator is similar to a previously-announced battery powered model. Made by **National Automatic Tool Co.**, 715 S. N St., Richmond, Ind.

PLUG-IN LIMIT SWITCH
can be adjusted after installation

Micrometer adjustment of this oil-tight, roller - plunger operated plug-in limit switch allows up to ⅛-in. movement of roller position after switch installation. Thus, accurate adjustment can be made without moving switch itself. Roller operating direction can be changed 90 degrees to allow for cam approach perpendicular to base of switch. Designed to be cammed, switch is not limited to a head-on approach of the cam. It requires only 5½ sq in. of mounting space and can be mounted in any one of six arrangements. Made by **Square D Co.**, 4041 N. Richards St., Milwaukee 12, Wis.

EXPLOSION PROOF SOLENOIDS AND SOLENOID OPERATORS

FX-326 SOLENOID
FX-300 LINE
EXPLOSION PROOF
SOLENOIDS

R2DX-326
RDX-300 LINE

The FX-300 explosion proof solenoids and the RDX-300 explosion proof solenoid operators have a variable stroke. For the standard models at minimum stroke, the capacity at 85% voltage ranges from 8 lbs. at 0.47" stroke to 300 lbs. at 1.67" stroke. At maximum stroke, the capacity ranges from 3 lbs. at 1.25" stroke to 100 lbs. at 5" stroke.

By the use of external levers longer than the standard ones, the maximum stroke can be increased with corresponding decrease in pull.

For external levers twice as long as the standard ones, the capacity at maximum stroke ranges from 1.5 lbs. at 2.5" to 50 lbs. at 10". Other combinations are possible.

Ask for Bulletins EE-191 and EE-193 or our complete catalog. See our catalog in Sweet's Catalog Service. There is a Trombetta solenoid for every imaginable requirement.

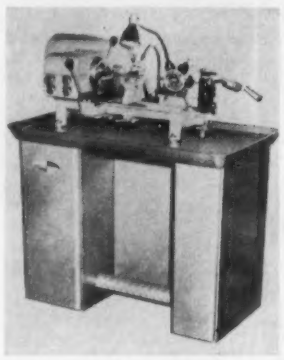
TURRET LATHE
for rapid, accurate machining



Rapid indexing control of the Model 625 precision turret lathe enables the operator to return the turret to the starting position, regardless of the number of operations performed, by lowering the control handle. A steady rest permits accurate centering of parts to be machined, holding them accurate to within 0.0002 in. Steady rest also opens and closes automatically at the start of the cutting cycle. Lathe has a maximum collet capacity of 0.625 in. Choice of two motors provides a range of six speeds between 720 and 2640 rpm and 1128 and 5275 rpm. Speed changes are rapidly made by pushbuttons on the front of the machine. Made by **Challenge Machinery Co.**, 1943 Thomas St., Grand Haven, Mich.

CANVAS TOTE BASKETS
nesting units made in two sizes

Made of vat-dyed, water-repellent army duck over a tinned wire frame, these durable canvas tote baskets have washable plasticized canvas bottoms. The riveted, double canvas handle is balanced so that a basket will not tip when lifted with one hand. Baskets are light in weight, easily carried, and can be nested without sticking. Two sizes are offered: 17 x 10 x 7 in., weighing 18 oz; and 20 x 12 x 8¾ in., weighing 24 oz. Either or both sides of the blue or green baskets can be imprinted with names and numbers. Other colors can be ordered. Single unit prices are $2.75 and $3.75, respectively. Made by **Handy Folding Pail Co.**, 17 Thompson St., New York 13, N. Y.

PHOTOELECTRIC CONTROLS for OUTDOOR LIGHTING

64401

Fisher-Pierce photoelectric controls provide dependable, automatic control of lights regardless of time of day, season or weather. Lights are switched on at the same daylight value each day, off when daylight returns. Non-mechanical, they never need setting or re-setting, even after power failures. The basic F-P circuit has proven dependable, rugged and trouble-free by more than nine years' use, in controlling lights on aircraft obstructions, signs and in store windows; in parking, loading and storage areas; in street lighting and other installations. Load capacities from 300 to 6000 watts; integral and auxiliary protective devices; wide variety of mounting arrangements; SPST, SPDT, DPST contacts; turn-on settings from 1 to 500 foot-candles.

Write for descriptive bulletins, outlining your requirements.

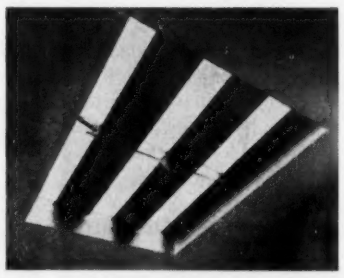
SKYLIGHT-VENTILATOR
is fitted with translucent dampers



This Lite-'n-Aire gravity roof ventilator doubles as a skylight. It has translucent glass-fiber reinforced plastic dampers and gutters that admit natural light. It is strong, nonwarping, and resistant to damage from chemicals and fumes. Whether open or closed, light is well diffused. Unit frequently provides adequate light for many daytime applications. Each 7½ x 10-ft unit affords 30 sq ft of free air opening to move large volumes of air quietly and efficiently. A UL-approved fusible link mechanism automatically opens the dampers when the temperature exceeds 212° F, to vent fire, smoke, and gases as a safety measure. Made by **Swartwout Co.**, 18511 Euclid Ave., Cleveland 12, Ohio.

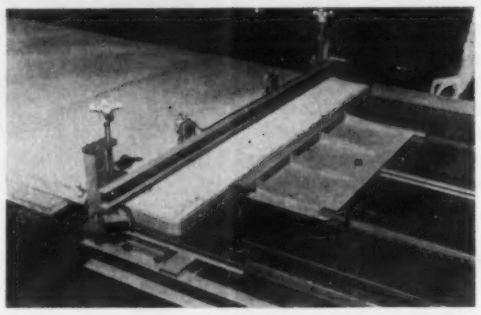
SHEET MATERIALS BAG LOADER packs plywood, wallboard, plastic sheets into special paper bags

The relatively new concept of packaging sheet building materials in paper bags is opened up with development of this building materials bag loader. Bags



constitute a complete package, eliminating separate inventories of containers, sheets or rolls of paper, cartons, staples, and lables.

Loader consists of a horizontal sheet-metal bed mounted on a steel frame. A motor-powered ram pushes the stacked material into a specially dimensioned paper bag secured to the loader mouth. Ram, in its last few inches of travel, pushes the loaded bag onto a conveying table where it is closed and sealed by glue or tape. Ram automatically returns to starting position.

Mechanical or manual operation is available. Some products can be bagged at speeds of up to 8 bundles per minute. One machine will package several widths of materials, and can be adjusted instantly for package thickness. Made by **Bemis Bro. Bag Co.**, 408 Pine St., St. Louis 2, Mo.

WEB GUIDE for accurate side register

Sufficient power to move even the heaviest unwind or rewind rolls is developed by the Model P-H 55 hydraulic web guide, designed to accurately control side register within ±0.010 in. It can be used on such web - fed operations as coating, laminating, slitting, printing, calendering, and bag-making. Its highly sensitive pneumatic - hydraulic automatic pilot receives the signal of any deviation in the web path from the sensing head, translating it into corrective action of the hydraulic power cylinder for immediate repositioning of the web. Guide unit is available in combinations of size and power to fit all web processing requirements. Made by **Stanford Engineering Co.**, Salem, Ill.

NEW
LOW COST
LEAK DETECTOR

NRC Model 4902 detects and locates leaks as small as 10^{-6} standard c.c. per second. It is the first commercially available halogen-sensitive leak detector to have the stability and fast recovery time needed to assure reliable results. Operates in the 80-200 micron pressure range. Readily available Freon-12 is used as tracer.

It is useful for locating leaks in vacuum and pressure vessels, as well as for such products as auto-radiators, water buckets, hydraulic systems, and hermetically sealed components and assemblies.

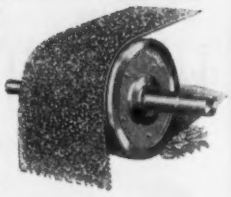
2 WAYS TO REDUCE COSTS

USE HOMER MAGNETIC PULLEYS . . .

Homer Permanent Magnetic Pulleys in belt conveying systems cut costs in a multitude of metal-working operations. They automatically remove tramp iron from coke, slag, ores, foundry sand, etc . . . sort ferrous from non-ferrous parts . . . and segregate ferrous from non-ferrous materials, minerals, etc. Trouble-free with no D.C. power supply required. Homer's "Radial Pole Design" assures highest magnetic strength across entire working face of pulley for deep, effective penetration and positive control of magnetic materials.



Complete details in Bulletin PY-260. Write for it today.

USE HOMER MAGNETIC DRUMS . . .

Homer Permanent Magnetic Drums automatically and economically beneficiate ores . . . remove tramp iron from slag, coke, foundry sand, ores, etc. . . . and separate ferrous parts from abrasive material following tumbling barrel operations. For installation at discharge end of gravity, screw or belt conveying systems and for use with tumbling barrels. Homer's "Radial Pole Design," with permanence of magnetic strength guaranteed, assures maximum effectiveness at all times.

VAPOR-LUB COOLING

REFRIGERATES FOR FASTER WORK—LONGER TOOL LIFE

Unlike liquid coolant systems, VAPOR-LUB refrigerates and lubricates entire cutting area for maximum efficiency. By sudden expansion of compressed air through a precision nozzle, temperatures are reduced in cutting area up to 20°F below ambient. In addition, an atomized coolant spray is deposited on tool and work to lubricate and reduce frictional heat. VAPOR-LUB is clean, simple, and economical—requires no special plumbing or coolant pans. Available with single or multiple jet nozzles. Single nozzle units, $47.50 complete; two nozzle units, $69.50. Send for FREE information.

LINK-BELT Conveyor TROLLEYS

Ten reasons why they last longer

1. **WHEELS** machined from steel tubing are carburized and heat treated.
2. **BALLS** are high grade steel.
3. **CAGE** spaces balls accurately—minimizes friction.
4. **RACEWAYS** are precision-ground for free rolling action, high capacity.
5. **LARGE LUBRICANT SPACE** extends servicing schedules.
6. **END CLOSURES** fit tightly, prevent escape of lubricant.
7. **BOLT OR RIVET** is machined for tight press fit.
8. **PRESSURE TYPE GREASE FITTING** for fast, easy lubrication.
9. **LABYRINTH SEALS** are frictionless; keep lubricant in, dirt out.
10. **FORGED STEEL BRACKET** provides maximum strength.

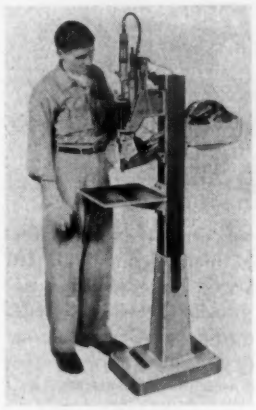
SCREW & NUT DRIVER
torque accurate to 5 per cent



Auto-Torque screw and nut driver consists of a previously announced parts positioner head, a compact air motor drive for the spindle, and an automatic parts feeder. A built-in adjustable torque clutch, accurate within 5 per cent of its setting, is furnished in two torque ranges: 5 oz-in. to 84 lb-in. and 48 to 120 lb-in. The simple parts feeder is powered by a double-acting air cylinder which actuates both the feeder drum and the shuttle type escapement. A sensing device stops the machine if a part is missing or only partially driven. Screws and nuts from No. 4 to 5/16 in. diameter can be handled. Driver can be furnished with floor mount and foot treadle or as a completely automatic station with electrical connections and solenoid valve to automatically initiate the cycle. Made by **Dixon Automatic Tool, Inc.**, 2300 23rd Ave., Rockford, Ill.

MODEL CI-5
Easily portable or may be suspended on swivel-type brackets. Has rubber bumpers on base.

NEW ELECTROMODE All-Electric
COMMERCIAL and INDUSTRIAL HEATER

CAPACITY To Meet The Needs of Industry
Model CI-5—5 KW—17,075 BTU
Model CI-10—10 KW—34,150 BTU

APPEARANCE To Meet The Public
Styled Like Electromode Modern Domestic Line
Tutone Gray and Ivory Baked-on Enamel Finish

This new Electromode Heater is specifically designed for quick, comfortable warmth in stores, "gas" stations, offices, and similar places where its handsome appearance and quiet operation are an asset. Simple plug-in operation is permitted since the heater has a built-in thermostat. Also made in non-automatic models. The CI-10 model (*not illustrated*) is basically two 5 kilowatt units fixed side by side, each retaining its thermostatic control. By setting one thermostat higher than the other on this model, only half the unit need be placed in operation, drawing a lower current load. When temperatures demand it, the other unit automatically cuts into operation.

SAFE!

The C and I Heaters have the exclusive Safety Grid heating element, giving them the complete safety for which Electromode heaters have been famous for more than 30 years. No danger of fire, shock or burn.

NEW WAY TO

Prevent Faucet Leaks!

★ 9 out of 10 washers are fastened with screws that are TOO LONG or SHORT. The screws quickly loosen; the loosened washers are destroyed thru grind and squeeze of opening and closing faucets.

34 years of research uncovers new solution

★ Now, NEW (Patented) 'Sexauer' SELF-LOCK Monel screws, with an imbedded expanding NYLON PLUG, lock at the required depth AUTOMATICALLY, hold washers FIRMLY! Made of rustproof, non-corroding Monel, heads don't twist off, screw slots don't distort. They are easily removed when necessary, can be re-used repeatedly.

★ Used with NEW 'Sexauer' EASY-TITE faucet washers, they make a combination that outlasts past faucet repairs "6-to-1"! EASY-TITES are made of super-tough, pliable du Pont compound (neither rubber nor fibre) and reinforced, like a tire, with a vulcanized layer of Fiberglas. They resist distortion and splitting from shut-off grind and squeeze.

Hidden costs of faucet leaks!

Faucet leaks are costly! As authenticated by Hackensack, N. J. Water Co. and American Gas Association, stopping just ONE PIN-HOLE SIZE (1/32") LEAK can reduce water waste 8,000 gal. quarterly. If a HOT WATER FAUCET LEAK, water and fuel savings JUMP to over $7.58 QUARTERLY—plus additional savings on MATERIALS, LABOR and costly FIXTURE REPLACEMENTS!

NEW SELF-LOCK screws and EASY-TITE faucet washers are just TWO of the "SEXAUER" line of over 3000 TRIPLE-WEAR plumbing repair parts and Pat'd. precision tools.

A "SEXAUER" Technician in your vicinity will make our NEW 126 page Catalog "H" available. He will gladly consult with you regarding a SURVEY of your plumbing fixtures to determine correct repair parts required and establish reasonable stock levels that avoid both overstocking and shortages—thus providing for efficient stock arrangement and control—all without obligation. WRITE TODAY!

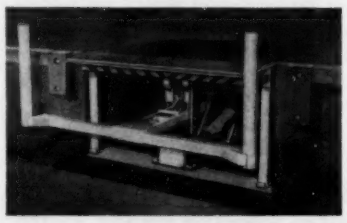
DOCK LEVELING RAMP is actuated by backing truck



Operated and counterbalanced by a parallelogram spring and cam mechanism, this automatic dock leveling ramp returns and locks to a horizontal dock level when not in use. Two bumper bars, one on each side, are swivel connected to actuate the ramp mechanism, even if the carrier backs up slightly aslant. Ramp raises on first contact with backing truck, and it then descends slowly to rest on bed or carrier where it remains in contact regardless of truck's rise or fall during loading or unloading. The 6 x 8-ft ramp moves through a 27-degree arc, and it can tilt 4 in. right or left. As soon as the carrier moves away from the dock, the ramp lifts and then returns to dock level automatically. Capacity is 20,000 lb. Made by **Globe Hoist Co.**, E. Mermaid Lane at Queen Street, Philadelphia 18, Pa.

NEW CURTISS-WRIGHT radiographic PUFF CAMERA

Rapid source advance to remote areas . . . Complete operator safety . . . No film fogging

With the new Curtiss-Wright Puff Camera, pressure vessels, castings, ship holds, nuclear installations, pipe lines and other critical structures can be radiographed with high strength sources from remote locations with complete operator safety.

The flexible steel reinforced tubing and small source head can be introduced through small openings and can be coiled up like a garden hose if necessary. The source can be exposed from a distance of 100 feet in less than 2 seconds at the press of a button. **Also general-purpose, external pipe line, and other radiographic cameras. Write for details.**

REDUCE HEATING COSTS!
CLEAN BOILERS WITH A TORNADO®
JUMBO VACUUM CLEANER

★ 55 GA. CLEANING CAPACITY ON ANY STANDARD DRUM.
★ H. P. FROM ¾ TO 3.
★ HOSE SIZES 1½"-2"-3".

USE YOUR OWN STANDARD 55 GAL. DRUM.

Dirty, soot-clogged boiler tubes can easily double fuel bills.

To call in an outside service to clean your boiler is expensive.

Why not solve boiler problems with a Tornado Jumbo vacuum cleaner. It's actually a powerful motor unit with a cover and filter bag that fits right on any standard 55 gallon drum. (4 Wheel dolly also available.)

We'll supply the proper hose and tools so that this cleaning job will take but a few minutes, and all the soot is right there in the drum to be carried away.

Most users save the full cost of their Tornado Jumbo in a few months, by reduced fuel bills.

What's more you get an extra bonus in the way the Jumbo does numerous other important cleaning jobs too!

START YOUR FUEL SAVINGS NOW!

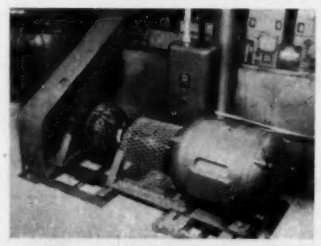
HYDRAULIC SPEED CONTROL
driven by belt or chain drive



Increase in production and decrease in scrap loss can result from the installation of the Model 333A1 Vari Draulic speed control on various pieces of equipment. The hydraulic unit permits speeds varying from zero to maximum and offers the characteristics of a fluid coupling, along with external control and the ability to de-clutch. It is sealed, self-contained, and may be driven directly by belt or chain drive. In illustrated installation on a cold roll forming mill, the unit is used with a 20-hp motor for driving the stock from 0 to 150 fpm. Slow speed when making adjustments, when starting new coils, or when gage or temper variations are encountered is possible. Drive also minimizes shock on gears and moving parts during inching or threading operations. Made by **Thomas Hydraulic Speed Controls**, 1329 S. McLean Blvd., Wichita, Kans.

For more details circle NED-125 M8 on enclosed inquiry slip

ELECTRIC BIN VIBRATOR

Force of vibration can be varied

Silent operation characterizes this new motor-driven adjustable eccentric vibrator in which eccentric weights are mounted at the two ends. The weights can be closed into a semi-circle for maximum force or opened into a three-quarter circle for minimum vibration. They are held together with a bolt.

Type RC-10, smallest in the line, provides six settings ranging from 140 to 550 lbs. of equivalent impact. Type RC-30 has seven settings from 385 to 1,110 lbs., and Type RC-50 provides a range of 750 to 2,250 lbs., also in seven settings. The eccentrics are protected beneath end covers after they have been set for desired action.

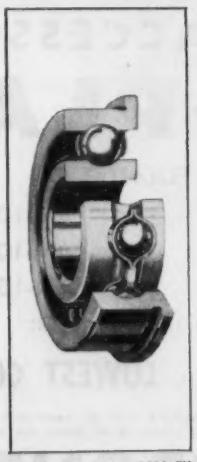
Barden Precision ball bearings

FOR INSTRUMENTS • COMPUTERS AND RECORDERS • AIRCRAFT ACCESSORIES
MACHINE TOOL AND TEXTILE SPINDLES • OTHER PRECISION APPLICATIONS

FLANGED PRECISION BEARING CUTS PRODUCTION COSTS



Barden Precision SFR1-5K .0937 bore, .3125 O.D.

The SFR1-5 is a standard *Barden Precision* miniature bearing for low torque applications using through-bored housings.

It is particularly suited for such devices as precision gear trains and gear-head motors that also require low eccentricity and closely controlled radial play.

Its precision flange provides accurate positioning and alignment...eliminates the need for housing shoulders... reduces complexity and cost of component manufacture.

Built to the same dimensional and functional standards as the larger Barden instrument sizes, this *precision* miniature bearing has accuracy and uniformity to meet the most critical requirements, plus performance to match the needs of the application.

The SFR1-5, like the others in the full range of *Barden Precision* miniature and instrument sizes, is designed and produced to improve the performance of the mechanism in which it is fitted.

MULTIPLE PUNCH PRESS combines seven machines into one

Consisting of seven 5-ton punch presses mounted on a common rigid platen, the Mark VII will perform a wide range of punching, forming, blanking, or bending operations on long extruded metal or other strips. Because rams are synchronized, long die plates can be used. Design distributes power through the length of the machine, and eliminates twist of the crankshaft. Plates can be arranged for any number of dies or positions within its area. The Electro-Safe motor, controls, and drive assure safety. Safe controls can be installed in any sequence for any number of operators. Continuous, single trip, foot control, or inching operation can be selected as needed. Made by **Kenco Mfg. Co.**, 5211 Telegraph Rd., Los Angeles 22, Calif.

SILICONE RUBBER sets in 30 min at room temperature

Easy-to-apply liquid Silastic RTV 502 vulcanizes to a rubber in only 30 min at room temperature. The silicone rubber retains its flexibility from −70 to 500° F, has good electrical insulating properties and, like regular heat-cured silicone rubber, resists weathering, moisture, ozone, and corona. Silastic RTV 502 is suited for sealing caulking metal-to-metal and metal-to-rubber joints, potting and encapsulating electrical and electronic parts, as a mold or impression material for making prototype parts, and as a shock and vibration absorber for delicate components. Made by **Dow Corning Corp.**, Box 592, Midland, Mich.

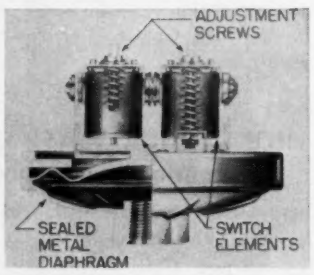
SKELETON PRESSURE SWITCH for O.E.M. and industrial use



This stripped Model 404 pressure and vacuum switch is designed specifically for use by original equipment manufacturers and for industrial applications where controls are enclosed in a common cabinet. Insensitive to vibration and mild shock, it can be mounted directly on moving and vibrating machinery. It is recommended for liquid or gas systems and is available in proof pressures from 30 in. Hg vacuum to 150 psi. Control accurately senses any two pressures over an adjustable range and actuates two independent electric circuits at predetermined increasing or decreasing pressures. The UL-listed single-pole double-throw switch elements reset automatically by snap action. Made by **Barksdale Valves**, 5125 Alcoa Ave., Los Angeles 58, Calif.

MANPOWER COSTS CUT 50%...

with power-operated GRINNELL-SAUNDERS DIAPHRAGM VALVES

A *single* stainless steel Grinnell-Saunders Valve, with neoprene diaphragm, made this profitable difference at a leading West Coast processing company. Automated by Bendix-Westinghouse topworks, the valve completes one full cycle every 5 seconds, 8 hours a day, 5 days a week — at 190°F.

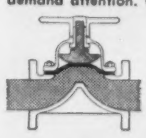
Grinnell-Saunders Diaphragm Valves may be easily equipped for automatic operation — by combining any one of a number of power operators, a sliding stem bonnet assembly, and valve body.

The operating principle of the valve is simple. The resilient, flexible diaphragm lifts high when the compressor is raised — seals tight against the body weir when compressor is lowered. Closure is positive, even should grit, pipe scale or other solid matter be trapped on the weir.

Grinnell-Saunders Diaphragm Valves are unsurpassed for handling materials as diversified as corrosive fluids, gases, beverages, foods . . . in lines where corrosion, abrasion, contamination, clogging, leakage and maintenance are costly factors.

Grinnell valves are available with body, lining and diaphragm materials to meet different service conditions. Maintenance is simple. Diaphragm can be replaced easily without removing valve. Write for details.

OPEN—No packing glands to demand attention. Operating mechanism isolated from fluid . . . sticking, clogging, contamination, corrosion eliminated.



CLOSED—Compressor or finger plate supports the diaphragm in all positions. No metal-to-metal seats to become damaged or wire-drawn.

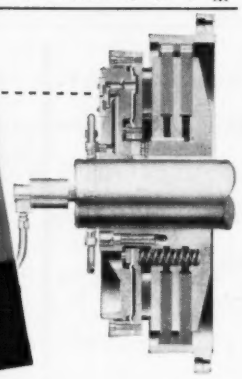
NEW DODGE AIR-GRIP CLUTCH



—Amazing Sensitivity!

Less air is used to operate the Dodge Air-Grip. The result is a new sensitivity that enables the operator to "inch" the clutch, or to throw it into full engagement, as required. Quick release valves are built into the clutch itself as optional equipment. Air-Grip's unique design places the air seal disc at the end *farthest* from the pressure plates, which generate the heat. This, with automatic internal ventilation, insures cooler operation, longer life. WRITE for Bulletin.

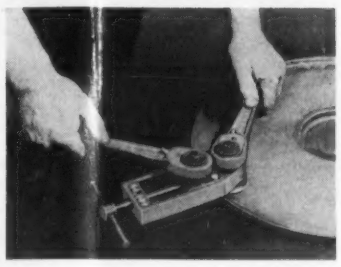
STEEL DRUM OPENER
for 18 to 22-gage steel drums



Heads of 18 to 22-gage steel shipping drums of 10 to 55-gal capacity, and from 10 to 24 in. in diameter can be cut out by Model 100 head cutter. Tool forms a safety pressed-in flange at the top of the container, without jagged edges and does not create metal particles which could contaminate drum contents. Cutting action is obtained by actuating two ratchet handles which in turn rotate the cutting wheel and knurled anvil shaft. Depth of cut is adjustable. Cutting wheel is removable for sharpening. Cutter sells for $75 and is made by **Michael A. Schinker Mfg. Co.**, 6514 S. Western Ave., Chicago 36, Ill.

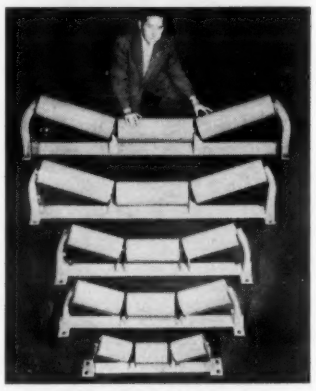
BELT CONVEYOR IDLERS
five series afford over 630 types



Offered in five series and in widths from 14 to 84 in., line of belt conveyor idlers provides more than 630 different types and sizes. The five series, designated as 5000 through 9000, make possible the exact matching of idlers to specific operating requirements of all belt conveyor installations. In addition to flat, 20-degree, and 45-degree troughed idlers, most series also include rubber cushioned idlers for use at loading point, positive action and actuating disc training idlers, and variable troughed idlers. All units have inverted angle bases and removable steel roll-retaining clips. Units are factory lubricated. Made by **Link-Belt Co.**, Dept. NED, Prudential Plaza, Chicago 1, Ill.

STEEL HAND STAMP
for marking hardened steel

Steel mill rolls, all types of bolt headers, and various types of dies ranging in hardness up to 50 Rockwell C or 500 Brinell can be marked with the 50/500 hand stamp. It can be furnished for marking on any special contour, radii, or shape, and in any symbol, design, or trade mark insignia, as well as in all sizes of letters and figures. Made by **Quality Die Co.**, 3065 E. 93rd St., Chicago 17, Ill.

INDUSTRIAL TRACTORS
operated as walk or ride types

Line of electric industrial tractors that can be operated either as rider or walkie types provides six different models with 12, 24, or dual 12/24-v electrical systems. Model RT tractors have traveling speeds from 3 to 6 mph, and all are equipped with the Roto-Cam control handle. For walking operation, control handle is lowered to convenient position and grip is rotated to suit walking operator. Returning the handle to vertical position, riding operator steps on platform and rotates grip to the correct speed and direction. Tractors have controlled plugging, dynamic, and deadman braking systems. Made by **Lewis-Shepard Products, Inc.**, Dept. R8-23, 125 Walnut St., Watertown 72, Mass.

"Feeds Itself" HOG RING FASTENER

- Exclusive automatic feed for fast operation.
- Loads quickly and easily with strip of 50 pre-formed staples.
- One-hand operation.
- Replaces tying, winding, wrapping, wiring, taping.
- Cords, ropes and cables 1/2 inch or less over-all can pass inside the open staple, which can be compressed down to 5/16 inch.
- Pointed staples provide easy penetration for fastening sisal, burlap, felt or other fabrics to wire frames.
- Ideal for tightly sealing twisted necks of cloth, paper or plastic.

FREE DEMONSTRATION OFFER—No obligation. Circle the Reader Service Card at the back of this publication. We'll arrange a demonstration in your plant—wherever you use "wrap-around" fastening. FREE BULLETIN—We'll also send you descriptive literature on the P7 and some of its many applications.

Replaces Enclosed Drive Belts without Disassembly

MVS Belt sets a new standard in V-to-V drives because it is adjustable to any length and is installed in minutes instead of hours. Its patented design eliminates drive disassembly. MVS Belt is placed around the sheaves and coupled with T-screws. Uniform thickness and width guarantee constant power delivery at all speeds with no cross-sectional distortion. Available in 26 widths from 1½" thru 5".

- REDUCES DOWN-TIME FROM HOURS TO MINUTES
- ADJUSTABLE TO ANY LENGTH
- EXACT SPEED CONTROL
- UP TO 90% LESS VIBRATION

Write Today for Complete Information.

Bowser remote control valves for hazardous liquids

Do these things

1. Simultaneously control flow of liquid in pipe and start or stop pump.
2. Operate one or more discharge lines from single remote power pump.
3. Provide safety factor required for insurance approval.

Bowser Figure 221 Remote Control Valve consists of a quick-acting bronze gate valve and explosion-proof mercury switch integrated for easy, in-line mounting on any pipe line. Valve and switch are actuated by weighted handle. When handle is released, flow and pump stop simultaneously.

FOR TIMESAVING ASSEMBLY OF SMALL PARTS . . .

DIXON *Auto-Positioner*

IN FOUR STANDARD MODELS

- *New Positive-Acting Feeder*
- *Automatic Sensing Device*
- *Easy to Install — Simple to Operate*

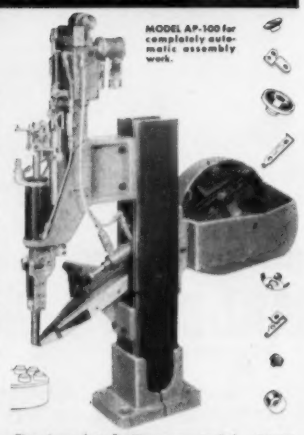
The Dixon Auto-Positioner is a compact, air-operated automatic assembly machine for parts from 1/16" to 2" size at speeds up to 6000 cycles per hour. It is furnished as a fully automatic station for use at a dial or in-line transfer table, or as a self-contained machine with pedestal and fixture table. There are four models, providing a selection of equipment to suit your requirements.

Dependable, Accurate, Compact

The new parts feeder is simple, compact (only 6 inches wide), and efficient. It provides positive advancement of the part into the chuck; it has a straight track and a positive-acting escapement; and it requires no separate motor or vibrator. Automatic sensing assures quality control. It interrupts the cycle when a part is missing or improperly assembled.

Standard Equipment, Easily Retooled

The chuck, positioning punch, and feeder tooling are easily modified or replaced for other jobs. Compactness permits close nesting at multiple stations, cutting cost of fixtures, dials, or transfer devices.



MODEL AP-100 for completely automatic assembly work.

The above Auto-Positioner was tooled to feed and place the .455" diameter formed washer into a cup (shown to the right) having .001" clearance.

Send for Bulletin AP-B2 or request our machine planning service.

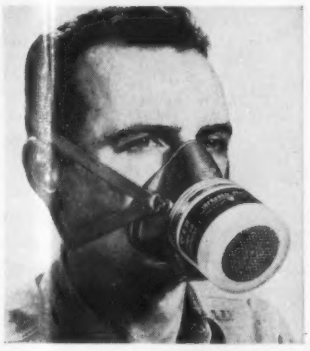
RESPIRATOR protects against excessive heat



This Thermalair respirator protects the wearer from intensely heated air, allowing emergency entrance into furnaces and boilers for repair work. It can be used with heat-reflective clothing in temperatures up to 300° F. Respirator cartridge contains a metal screen heat exchanger which absorbs heat when user inhales. Incoming air is cooled to about body temperature. As user exhales, stored hot air is forced out and cycle repeats. Respirator weighs only 6 oz, can be washed and sterilized for reuse, and has breathing resistance of only 0.2 in. of water at an air flow of 85 liters per min. Made by **American Optical Co.**, Safety Products Div., 1492 Mechanic St., Southbridge, Mass.

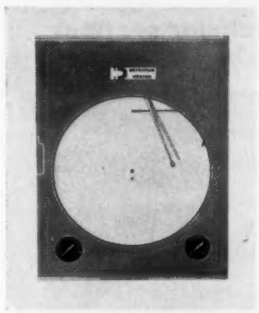
TEMPERATURE RECORDER-CONTROLLER in range from −100 to 100° F



Model 7815 single pen recorder, the Model 7816 two-pen two-control unit, and the Model 7817 two-pen one-control unit comprise a line of temperature recorder-controllers with 12-in. charts. Ranges as low as −100 and as high as 100° F are available as are interchangeable liquid, vapor, gas, and mercury filled tube systems. Universal controller can be used as a proportional, on-off, or a differential gap controller. For complex processes where appreciable transfer lag and/or dead time is present, a proportional controller is available with reset, or reset and derivative valves. Proportional band adjustability for this group is 2 to 300 per cent. Made by **Daystrom, Inc.**, Daystrom-Weston Industrial Div., Newark 12, N. J.

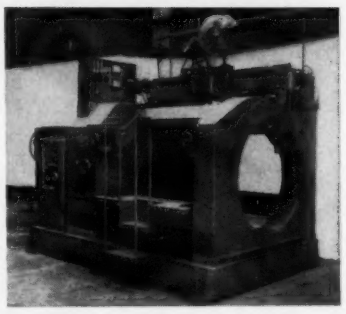
LIQUID-BLASTING MACHINE produces 16-250 micro finishes

Production and precision cleaning, finishing, peening, burnishing, and deburring of metal parts can be done with the Model 15 Hydro-Hone, a liquid-blasting machine. It produces 16 to 250 micro finishes by adjusting air pressures and the size and type of abrasive media used. Air required ranges from 20 to 65 cfm at 90 psi. Its internal working area is 20 x 20 x 20 in. A counterbalanced side-entry door makes possible the processing of larger parts. It can be equipped with a Hydro-Hone tumbling barrel for automatic high production finishing of small parts. A 1/3-hp motor powered pump agitates and feeds the abrasives at 35 gpm and a 1/25-hp blower removes vapors and fog through a wire mesh filter. A foot switch controls air pressure between 0 and 160 psi. Made by **Hydro-Hone Corp.**, 7516 Pacific Blvd., Huntington Park, Calif.

▲ For more details circle NED-182 M8 on enclosed inquiry slip ▲

LONGITUDINAL SEAMER welds flat sheets, tubular sections up to 4 ft long and 1/2 in. thick



Flat sheets or tubular sections up to 4 ft in diameter and 4 ft long and from 0.005 to 1/2 in. thick can be welded by the precision longitudinal seamer. Its travel carriage rides on sealed bearings on a heat treated and ground tool steel track which is adjustable in both vertical and horizontal planes. Maximum runout in full travel length is 0.005 in.

The driving mechanism consists of a Saginaw ball-nut leadscrew and a 1/3-hp Thy-mo-trol full-wave motor which drives through a V-belt and speed reducer. Holddown clamps are mounted on adjustable slides. Mandrels for 6 and 12-in. tube have back-up bars which carry argon in a distributing manifold and have strip heaters rated at 4000 w. Back-up shoe temperature can be controlled within 2° F up to 550° F.

Location of mandrel; clamp beams, and travel carriage track is controlled by illuminated pointers and scales, read through magnifying glasses. Welding equipment mounted on the base consists of a Vickers power source with up-slope and down-slope, and a Linde wire feeder and torch assembly. Made by **Berkeley-Davis, Inc.**, 1021 Bahls St., Danville, Ill.

Capacity of storage areas like that on the left can be greatly increased with BAND-BOXES. Special palletized bottom keeps them neatly and safely stacked.

How to increase storage capacity in less space with BAND-BOX

Patent applied for

Because they're designed for safe, neat stacking, BAND-BOXES can solve almost any storage problem. With an effective capacity of approximately 4,000 lbs., each BAND-BOX can support static loads up to 16,000 lbs. to minimize the storage area required.

Even *empty* BAND-BOXES save space. They're quickly "knocked-down" and 12 nested boxes take the same cubic area as a single assembled unit.

BAND-BOXES ARE IDEAL SHIPPING CONTAINERS AS WELL! Available with either Stack Lock Corners for open shipping or full top for maximum protection, BAND-BOXES are lightweight, yet very tough reusable containers for both intra- and inter-plant shipments.

See how Ackermann BAND-BOXES can economically solve storage and shipping problems. For complete information write to the Ackermann Manufacturing Company, subsidiary of Wheeling Steel Corporation, Wheeling, West Virginia.

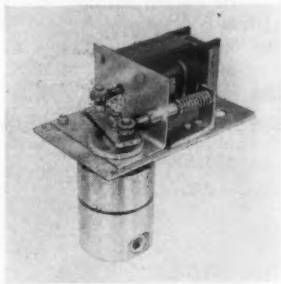
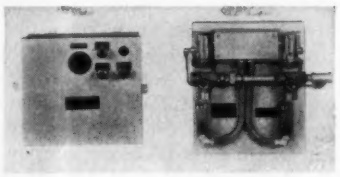
SOLENOID VALVES
have 10,000 psi liquid, gas rating



Optically flat, metal-to-metal, sealing surfaces of self-aligning sealing rings and the mating rotor face are protected in these Shear-Seal solenoid valves by constant intimate contact. Flow is through the center of the Shear-Seals, not across the sealing surfaces. The stocked valves are made in shut-off and four-way types with 1/4, 3/8, and 1/2-in. port sizes. They are rated for 10,000-psi liquid or gas and will withstand surges up to 15,000 psi without damage to sealing qualities. Confining pressure to the flow passages eliminates external shaft leakage. Made by **Barksdale Valves**, 5125 Alcoa Ave., Los Angeles 58, Calif.

For more details circle **NED-191 M8** on enclosed inquiry slip

PRESS CONTROL SYSTEM
prevents accidental repeat cycles



Accidental repeat operation of single cycling presses, brakes, shears, and indexing units employing an air-operated friction clutch and spring-set brake is made virtually impossible by the Andrus-Coon press control. System has two separate electrical, pneumatic, and mechanical control circuits operating in tandem. These are interlocked so that failure of any one or more than one control component automatically stops the machine at once, or at the end of the cycle. Built to JIC or specified standards, the system consists of a prewired valve package, a prewired control panel assembly, plus limit and run pushbutton switches. It is built for new or existing control installations. Made by **Textrol, Inc.**, 4015 Prospect Ave., Cleveland 15, Ohio.

*P Calculated Load at Flat Position

Stock Sizes of Belleville Washers

The sizes listed above are designed primarily for high loads in limited space. Residual stresses are introduced during manufacture; washers can be compressed to flat position and released without loss of free cone height. Good fatigue life may be expected between slight preload and "H_1". Send for stock washer pamphlet giving complete information.

Now available— SEL-LOK spring pins in beryllium copper

- Superior electrical properties
- Excellent corrosion resistance
- Fast, economical fastening

SEL-LOK spring pins made of beryllium copper give you the speed and economy of self-locking fastening, plus outstanding electrical characteristics. They have high conductivity, are nonsparking and nonmagnetic. In addition, they offer superior corrosion resistance. These properties are combined in a material having 60% the strength of carbon steel, more than ample for most applications. Sold by your authorized SPS distributor in sizes from 1/16 x 3/16 to ¼ x 3½ in. Write for Catalog Sheet 2376. (SEL-LOK spring pins also available in carbon or corrosion-resistant steel, sizes from 1/16 x 3/16 to ½ x 5 in. Request Bulletin 2331.) STANDARD PRESSED STEEL CO., Jenkintown 24, Pa.

Mix fluids fast at low cost

Get a uniform product—often in seconds by flipping a switch

Put new zip into your production! Power-mix fluids in any open tank or container—with LIGHTNIN Portable Mixers.

Flip a switch, and powerful LIGHTNIN propeller stream goes to work—*tumbles* as it *rotates* the batch for complete uniformity, often in a few seconds.

Suspend heavy solids . . . mix, blend, or stir liquids . . . make up solutions . . . disperse gases, wash, circulate, control batch temperatures. Your mixing results are *unconditionally guaranteed* when you mix with LIGHTNINS. Thousands in use; many 25 years and more.

Mixer locks instantly at any position. True-running shaft is quickly removable; cannot loosen or jam in service. Widest choice of ball-bearing motors. For full details, request 28-page illustrated Catalog B-108.

Mixers for permanent mounting, too Full selection of LIGHTNINS for tanks to 6 million gallons. Sizes ¼ to 500 HP. For details, request illustrated Catalog B-109.

30 PORTABLE MODELS, direct or gear drive, electric or air driven. Sizes ⅛ to 3 HP.

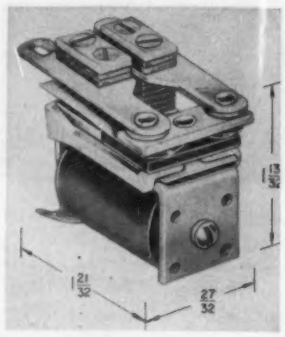
MINIATURE CONTACTOR switches loads up to 60 amp



Furnished with single-pole single-throw double-break contacts, either normally-open or normally-closed, the Type MB miniature contactor can be operated under shock of 30 g and vibrations of 10 g to 500 cycles. It is capable of switching loads up to 60 amp with control signals as small as 2.7 w. In addition to normal load of 60 amp at 30 v dc, it can handle starting surges up to 150 amp for 300 milliseconds. A double-throw version of this relay can also be furnished with contacts derated to 20 amp. Respective open and hermetically sealed have weights of 2 and 4 oz. Made by **Potter & Brumfield, Inc.**, 270 N. Main St., Princeton, Ind.

CONDUCTOR SYSTEM for mobile equipment electrification

Designed to meet heavy duty, straight-run requirements such as steel mill cranes and shipyard gantries, the 1000 - amp Hevi-Bar conductor system is engineered on the job by plant mechanics. It can be installed as an open (bare conductor) system or as an enclosed (safety) system. Three components of the system are aluminum conductor bars, sliding shoe trolley collectors, and hanger clamps. In the safety type system the conductor bars are enclosed in plastic covers. Contact surfaces of the aluminum conductors are heavily clad with a hard, high melting point material for protection against oxidation and arcing. Bars, available in 10 and 20-ft lengths, are welded together by the exothermic Cadweld process which requires no outside source of power or heat. Made by **Insul-8-Corp.** Dept. N, 1369 Industrial Rd., San Carlos, Calif.

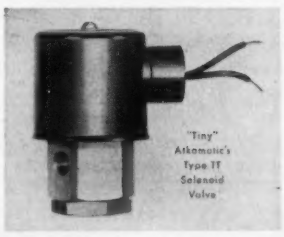
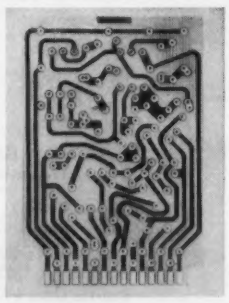
SOLENOID VALVE direct lift type rated 0-400 psi



Main valve ports open instantly when the solenoid of the direct lift Type TT Tiny valve is energized. The single-seated, angle type valve is machined from brass bar stock and has a stainless steel plunger and point assembly. Only 3¼ in. high, it is suited to applications where a wide range of pressures is coupled with relatively small flow of air, gases, water, oil, or steam. Pressure range is 0 to 400 psi, with no pressure required to open the valve. Pipe sizes are ⅛ and ¼ in. Made by **Atkomatic Valve Co.**, 545 W. Abbott St., Indianapolis 25, Ind.

▲ For more details circle NED-201 M8 on enclosed inquiry slip ▲

INSULATED PRINTED CIRCUITS conductor imbedded in base plastic



High reliability and easy production handling are advantages afforded by Imbedded Circuitry, a printed circuit construction in which the conductor is imbedded in the base material and protected by an insulating cover. Conductor is three to six times the thickness of surface-type printed circuitry and has a slight taper to lock it in place. Only terminals and contact areas are exposed to the surface. Imbedded Circuitry has high surface resistivity, dielectric strength, and physical rigidity. Extra thick conductors can be made narrower and can thus be placed closer together for miniaturization. Process developed by **Beck's, Inc.**, 300 E. Fifth St., St. Paul 1, Minn.

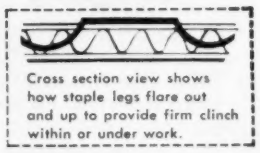
STAPLE CLINCHES ITSELF

no anvil needed!

DUO-FAST OUTWARD-CLINCH STAPLER



Cross section view shows how staple legs flare out and up to provide firm clinch within or under work.

A real problem solver on jobs where conventional stapler cannot be used . . . such as attaching tags to filled cartons, fastening insulation around air ducts, etc.

Special mechanism diverts staple legs outward and upward in a clinching action as shown. No anvil is needed. Easy, one-hand operation — just compress the handle and the job is done.

Free Service. Another quality tool in DUO-FAST's 150-model line, the Outward-Clinch Stapler above carries our famous Free Service Guarantee.

Send today for FREE Bulletin FT-8 on DUO-FAST Outward-Clinch Staplers.

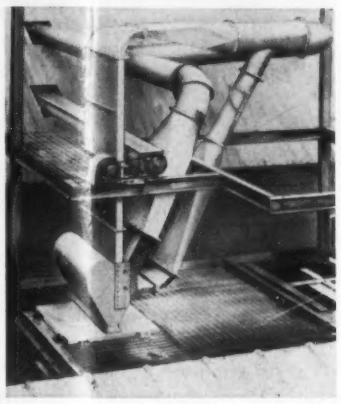
POWDER MATERIAL CLASSIFIER
gravitational-inertial types handle 100 lb to 100 tons per hr



Sizes to handle from 100 lb to 100 tons of material per hour are available in this Gravitational - Inertial classifier which correctly classifies better than 95 per cent of the feed material. For applications in the 200 to 50-mesh range, it classifies ores, mineral flours, milled products, metal powders, fillers, fibers, chemicals, food powders, resin powders, sintered metals, salts and crystals, pulverized coal, and cosmetics.

Air or gas entrained feed material enters classifier through top inlet and cascades downward past inclined vanes through which air and entrained fines are drawn off. By controlling inlet air velocities and vane exhaust air, gravitational, inertial, centrifugal, and drag forces cause particles below a given size to be drawn off through the vanes. Those above this size continue downward.

Secondary air supply introduced below the vanes crosses the stream of coarse particles and scrubs away any adhered fines. A 30-ton-per-hr unit requires no more space than an office desk. Made by **Buell Engineering Co.**, 123 William St., New York, N. Y.

COLD-HEADING MACHINE
designed for miniature parts

Electrical contacts, rivets, pins, and similar parts as small as 0.012 in. in diameter by 0.016 in. long can be produced on the Omega 00 cold-heading machine. The solid die, double-stroke machine will cut to length, head, and form from 80 and 120 pieces per minute to close tolerances. Maximum wire diameter accommodated is 0.070 in. with most alloys and up to 0.120 in. with soft aluminum. Part lengths may range from 0.016 to 0.400 in. Hollowing and heading of rivets can be performed in one operation. One set of dies is supplied to make one specific part of the customer's choice. Coil reel, straightening rolls, feed rolls, built-in V-belt motor drive, and guards are standard. Drawers in the cabinet base receive completed parts. Made by **Robert E Morris Co.**, 5004 Farmington Avenue, West Hartford, Conn.

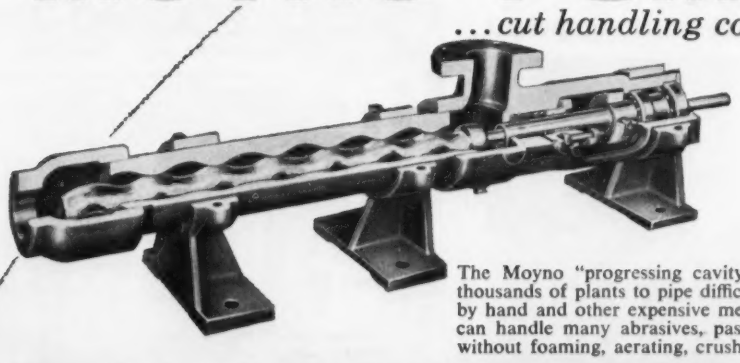
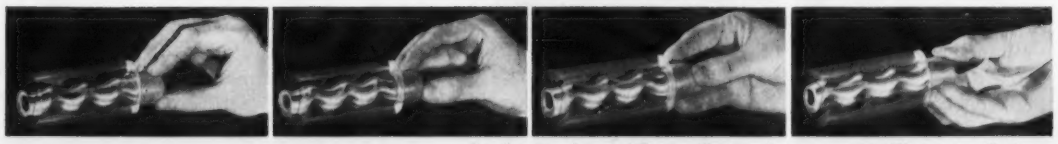
from abrasive slurries to delicate foods

MOYNO® PUMPS

. . . cut handling costs



The Moyno "progressing cavity" pumping principle has enabled thousands of plants to pipe difficult materials that were transported by hand and other expensive means. Moyno is the only pump that can handle many abrasives, pastes, slurries, chemicals, foods, etc. without foaming, aerating, crushing or excessive pump wear.



As shown above, Moyno Pumps have a screw-like rotor that revolves in a double threaded stator creating progressing cavities which smoothly move material through the pump. They will pump anything that will move through a pipe . . . even plaster and non-pourable pastes! Moyno Pumps are available in capacities up to 500 gpm and pressures up to 1000 psi.

Examine your processing methods. No doubt there are several places where Moyno Pumps can drastically cut costs. Ask us, we'll give you a frank answer. Send us an outline of your problem today! Write for Bulletin 30-NE.

ADJUSTABLE VISE
holds irregular-shaped pieces

A pair of pivoted members, mounted on a heavy swivel turret, comprise the sliding front jaw of the All-Shapes vise. The unusual combination of swivel and pivoting action allows the two members to equalize and adjust to grip practically any shape workpiece. Multipoint contact distributes jaw pressures widely and evenly so that even thin-walled shapes or fragile materials can be held firmly and without distortion. Vise is available in either clamp-on (C-300) or swivel-base (S-300) models with 3-in. capacity. Made by **R. S. Wilder, Inc.**, 26 Bedford St., Waltham 54, Mass.

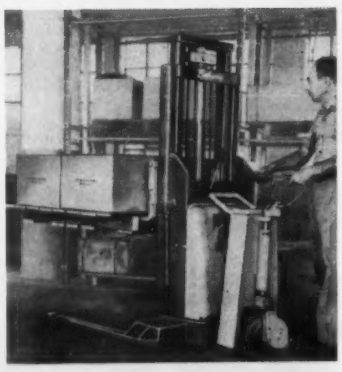
ELEVATING TRUCK DRIVE
will propel other wheeled equipment



Electro - hydraulic driven Load - Jockey attachment can be mounted on almost any portable elevating truck containing a battery-powered hydraulic lift to make it self-propelled. The compact 2000-lb capacity unit is also suited for driving other similar wheeled devices. Attachment has a wide face, rubber-tired driving wheel with a built-in hydraulic motor. The control and steering handle automatically returns to the "off" position when released. The truck moves in the direction the handle is moved. If the optional drive wheel safety guard touches the operator's foot, it cuts off the power and applies a brake. Attachment is by four bolts. Unit is 30 in. high and 15½ in. wide. Power is derived from the truck's battery. Made by **American Pulley Co.**, 4200 Wissahickon Ave., Philadelphia 29, Pa.

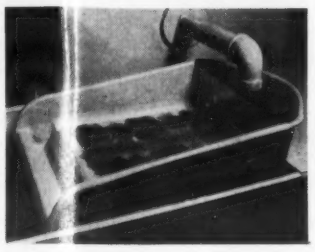
MAGNETIC COOLANT CLEANER
has 15-gpm coolant capacity



Ferrous contaminants are removed from grinding and other metalworking coolants by the Kebby Mite coolant cleaner, composed of a Fiberglas tray supported by a magnetic retainer plate. Heavy Alnico magnets and gravity tend to collect the contaminant in regular rows of tufts. These tufts act as filters to remove nonferrous materials. Separator has a capacity of 15 gpm of water soluble oil or chemical type coolant. It measures 15 x 21 in. and mounts over the coolant tank for gravity operation. Price is $79.50. Made by **Kebby Co.**, 2320 Custer Ave., Rockford, Ill.

Terminals Attached?

NEW ARTOS TA-20-S
Performs 4 Operations Automatically!

1. Measures and cuts solid or stranded wire 2" to 250" in length.
2. Strips one or both ends of wire from 1/8" to 1".
3. Attaches any prefabricated terminal in strip form to one end of wire. (Model CS-9-AT attaches terminals to BOTH ENDS OF WIRE simultaneously.)
4. Marks finished wire leads with code numbers and letters (optional attachment).

UP TO 3,000 finished pieces per hour. Can be operated by unskilled labor. Easily set up and adjusted to different lengths of wire and stripping. ENGINEERING consultation without obligation. Machines for all types of wire lead finishing.

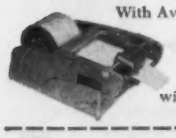
use
AVERY
PRESSURE-SENSITIVE
LABELS
for hundreds of industrial applications

In every department...from receiving to shipping...from receptionist to top management...there are many spots where Avery labels are saving industry thousands of dollars every year. Self-adhesive, they simplify and speed work wherever there's a need to *identify or inform, to warn, mask, inspect, merchandise or price.* You can save *time* and *money* with Avery labels.



With Avery electric dispensers labeling is as much as 5 times faster than with ordinary methods!

Write today for complete information.

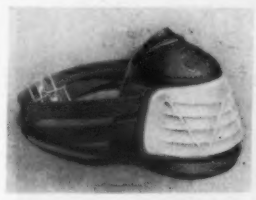
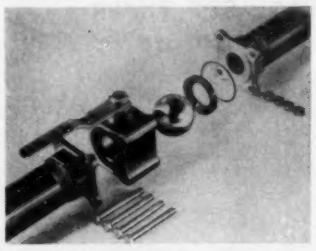
PLASTIC RESPIRATOR
is 2.1-oz electrostatic type



Protection against dusts, pneumoconiosis - producting mists, and chromic acid mists is provided by the Air-Raider 2.1-oz modified polyethylene respirator. This treated - wool electrostatic unit has unusual valve construction and location which reduces inhalation and exhalation resistance. Frame cushion-fits various face shapes and head sizes. Four-point suspension of double headbands assures positive seal with minimum pressure. Made by **Welsh Mfg. Co.**, 12 Magnolia St., Providence 9, R. I.

▲ For more details circle NED-234 M8 on enclosed inquiry slip ▲

BALL VALVES
serve as both valve and union



Suited as roughing and forepressure controls, Series VB straight-through ball valves for vacuum use serve as both valve and union. Because of three-piece construction, valve center can be removed without disturbing union ends. Seating surface or O-rings can be replaced in minutes. The 1/2, 1, 1 1/2, and 2 in. sizes are installed by either NPT pipe connections, or by sweat soldering. A 3/4-in. size is available only in sweat-soldering type. Valve body is cast bronze, and ball valve is chrome-plated bronze. Buna-N gaskets and O-rings are used, although Teflon gasketing is also available. An air cylinder for remote control is obtainable. Made by **Consolidated Electrodynamics Corp.**, Rochester Div., 1775 Mt. Read Blvd., Rochester 3, N. Y.

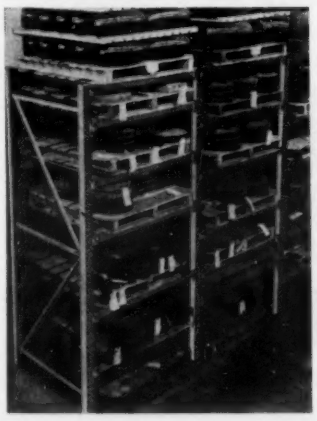
ADJUSTABLE STORAGE RACK
shelf-lock eliminates bolts, nuts



Tools, bolts, and nuts are not required to assemble SpaceMaker adjustable storage rack which features the Shelf-Lok, a shelf-locking device included at each end of a pair of horizontal load supports. They attach to the slotted vertical side frames and accommodate up to 5000 lb loads. Supports are positioned to the frames from the rear with the Shelf-Lok fitting into the slots, then secured by its hook for a safety lock. Frame slots are located every 3 in. Vertical frames have welded structural steel cross bracings. L-shaped horizontal load supports hold 1 or 3/4-in. plywood panels for storing lightweight bulk items. Deck planking can be used over crossbars suspended between supports for heavy loading. Made by **Rack Engineering Co.**, 168 Sixth St., Connellsville, Pa.

VERTICAL SLURRY PUMP
for submerged sump service

Heavy slurries of sand, coal, tailings, crystals, chemical sludges, or abrasive plant drainage can be handled by the Type RXV heavy duty slurry pump. Designed for wet pit sump service, it is offered in nine models varying in size from 2 to 8 in. The submerged low speed unit is suited for continuous duty with both heavy and fine slurries. Only four bolts clamp the liquid end of the pump. All wearing parts are interchangeable with the RX horizontal pump unit. Bearings are water lubricated, but grease lubrication is optional. Made by **Morris Machine Works**, 20 E. Genesee St., Baldwinsville, N. Y.

CALCULAGRAPH computes and prints ELAPSED TIME on job cards *Automatically*

GIVES YOU—
- Accuracy
- Exact Job Cost Data
- Production Time
- Department Time

One CALCULAGRAPH Serves an entire Department

Calculagraph will fit into your *present* system. It *computes* and *prints* ELAPSED TIME automatically on your job cards. It eliminates costly clerical time and additional equipment—assures 100% accuracy. Furthermore, the flexibility of Calculagraph makes it adaptable to *any* system.

And remember, too, that CALCULAGRAPH

- *is simple to use*
- *automatically deducts non-working hours (rest periods, lunch time, etc.)*
- *is a self-contained unit—needs no MASTER CLOCK*
- *is used throughout industry the world over.*

Get the full facts about CALCULAGRAPH NOW. You'll find that cost and production data can be yours more accurately, faster, automatically.

Write for complete information today.

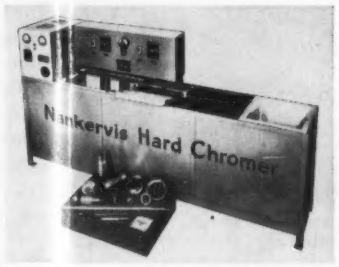
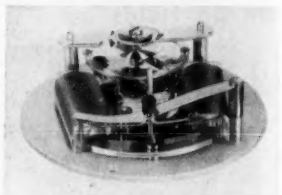
HARD CHROME PLATING UNIT
plates to within 0.0001 in.



Tanks, rectifiers, automatic heating elements, and controls comprise the Hard Chromer package which will chrome plate tools, gages, and other parts to within 0.0001 - in. tolerance. This eliminates need for grinding after plating. The self-contained unit is easy to install and operate. It has high "throwing power" and can plate in grooves, recesses, and shoulders, yet maintain sharp, clean corners. Plate does not chip, flake, or spall, and has excellent resistance to wear, erosion, and corrosion. Made by **George L. Nankervis Co.**, 15300 Fullerton Ave., Detroit 27, Mich.

▲ For more details circle **NED-243 M8** on enclosed inquiry slip ▲

PULSE TIMER
powered by integral dc battery



Accurate over a wide range of environmental conditions, this direct-current pulse timer has its own battery power source and is suitable for light-duty military and industrial applications where space is critical. Movements can be supplied for 1.5 to 12 v dc. A C-size 1.5-v cell operates timer 2 years. Timer life is over 20,000 hours. Tests indicate a ±0.01 per cent accuracy at normal temperatures, and a ±0.25 per cent accuracy over a 10 to 110° F range and ±10 per cent voltage variation. Basic unit is available in a clear plastic housing, or in a dustproof tin for use with isolated power source. Made by **Hamilton Watch Co.**, Allied Products Industrial Div., Lancaster, Pa.

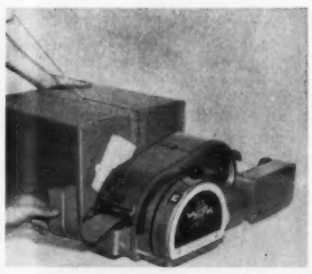
TAPE DISPENSER
for kraft and center-tear tapes



Itstix kraft or reinforced sealing tapes with a center tear-tape and starting tab are dispensed by the National electric Model 98 Vuematic CN machine. The center tear-tape facilitates the opening of well-sealed cartons and containers without tools. The dispenser activates, laminates, and dispenses the tapes in lengths to requirements. The hand control knob for preselecting tape length from 6 to 70 in. and the curved switching bar makes possible operation with a single motion of either hand. Machine takes standard rolls of paper or fiber reinforced tape from 1 to 4 in. in diameter. Made by **Nashua Corp.**, 36 Franklin St., Nashua, N. H.

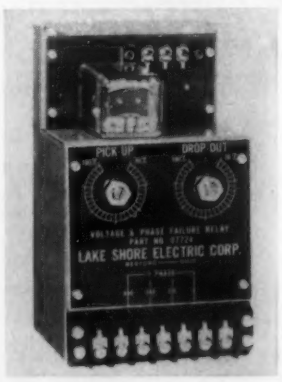
VOLTAGE SENSING RELAY
has plug-in relay, printed circuit



Control range of 70 to 100 per cent of rated voltage for both drop-out and pick-up with a minimum 1-v differential is provided by this differential voltage sensing relay. It employs a simple printed circuit with a standard plug-in single - pole double-throw relay to open and close circuits. Accurate settings are obtained by using variable potentiometers. Unit will protect power and lighting systems, industrial motors, machine tools, and process equipment. Relay is designed for 6 to 49 v dc and 50 to 250 v dc. Alternating current service range includes both single and three-phase, three and four-wire. Standard alternating current relays are available in open models or with NEMA Type 2 closures. Made by **Lake Shore Electric Corp.**, 205 Willis St., Bedford, Ohio.

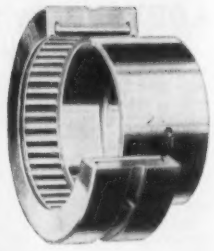
For heavier loads in smaller space



Use McGill *MULTIROL*® full type needle roller bearings

MULTIROL SE series bearing construction provides a full complement of small diameter rollers in a hardened and ground outer race. This packs maximum load capacity in minimum radial space.

Precision ground rollers and retaining end shoulders built integral with the outer ring eliminate loose or welded-in end washers; assure ease of assembly, precision performance and longer life. Simplified grease lubrication reduces maintenance.

For greater radial space savings on a larger hardened and ground shaft, the outer ring and roller assembly may be used without an inner.

Better Prints . . .
Easier Printmaking . . .
Big, new operating features

The Printmaster 810

Here's the advanced Printmaster 810 — that outdates every other whiteprinter in its price class. Now, you can assure yourself of better whiteprints, more easily, in less time, with these advanced features:

More compact—lower in height . . . saves valuable floor space, allows easier lamp replacement, better control . . . means less fatigue; **new design of brush feed assembly** . . . to automatically control curled edges, folded corners; **new print pick-off** . . . prevents tearing, sticking or scratching; **improved tracing release** . . . convenient release pedal means immediate control of tracing and print—no loss of time and material; **cool cylinder design** . . . practically no sticking in processing plastic-coated materials and foils; *new* **FILTERED air system** . . . Fiberglas® filter delivers filtered air—for cleaner machine, cleaner prints—means less shut-down time for cleaning.

And Ozalid offers other great *proven* features such as new steel frame support . . . double paper rods . . . both rear and front delivery . . . and U/L approved safety devices.

Why not test-run your own tracings through the new "810"? Simply call your local Ozalid representative. Or write: Ozalid, Dept. W-12, Johnson City, N. Y.

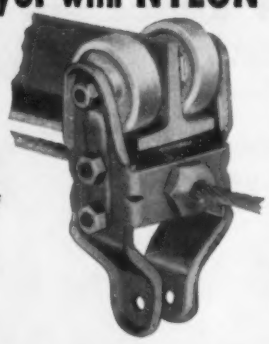
CLEAN!
AMERICAN "Cable-Way" Conveyor with NYLON WHEELS



Open T-rail track and trolleys are easily cleaned, with water or air hose.

Adaptable for explosion-proof installations.

Nylon wheels are almost noiseless.

No grease drippings. Most installations require no lubrication. Others minimum amount. Can be water-lubricated.

Galvanized or stainless steel cable.

Operates in moist conditions with minimum of maintenance.

The American "Cable-Way" Conveyor with nylon-wheeled trolleys requires grease lubrication only on the motor drive and idler sprockets. All-bolted track and suspension system makes installation fast and easy. Low-cost and dependable. Handles loads up to 250 lbs. per trolley.

(Left) Steel wheels are also available for average industrial installations.

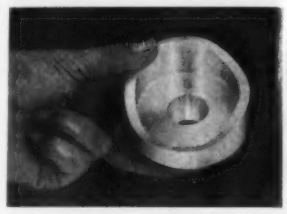
PROTOTYPE CAMS generated by speedier method



Prototype cams can now be generated in a shorter time than previously possible by a process in which most preparatory engineering is done by an automatic computer. Process needs only the points on the cam surface dictated by the application. Cam contour is automatically computed to give near optimum dynamic characteristics consistent with passage through the specified points. Data are then fed to a servo-controlled machine tool which cuts the finished cam. This division fabricates the cams on a service basis and delivery can usually be made within 48 hr. Face, cylindrical, and disc cams can be generated by the method. Limited quantity runs are also feasible. Made by **Howard Holmes, Inc.**, Cam Engineering Div., 447 Tarrytown Rd., White Plains, N. Y.

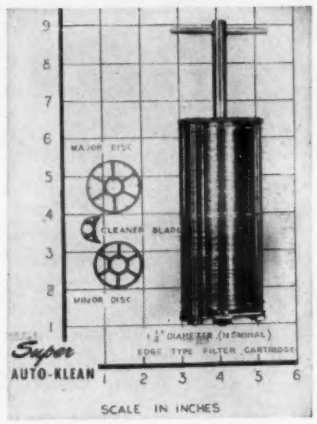
FILTER CARTRIDGE removes 40-micron particles



All-metal, edge-type filter cartridge for lubricating, hydraulic, and fuel oil applications is conservatively rated for removal of 40-micron particles. A typical unit, measuring only 4 in. face to face, handles more than 7½ gpm of 50-SSU fluid at 2 psi pressure drop. The compact, cleanable cartridge fits a wide range of standard housings. Head and cartridge assemblies, for use as integral parts of equipment, can be supplied. Made by **Cuno Engineering Corp.**, Dept. 51, S. Vine Street, Meriden, Conn.

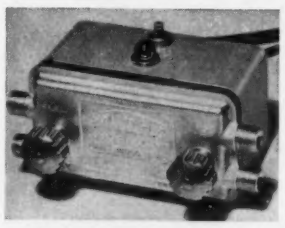
GAS CONTROL UNIT for welding, cutting operations



Flow of oxygen and fuel gas in welding and cutting operations is regulated by this gas control unit. Pushbutton switching of flame settings from high to low enables torch operator to obtain fast cutting starts with rapid reduction in preheat flames once cut is started. The H-1050 gas-saving valve is also suitable for brazing and heating, silver soldering, and intermittent heat treating or flame hardening. It has the capacity to operate up to eight machine cutting torches. Unit is solenoid operated and plugs into 110-v outlet. Neon light shows high flame setting. Foot-operated and hand-held remote control switches are available. Made by **Smith Welding Equipment Corp.**, 2633 Fourth St. S.E., Minneapolis 14, Minn.

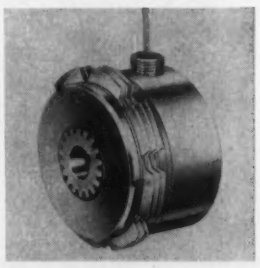
DISC TYPE ELECTRIC CLUTCH in static torques up to 2400 lb-ft



A range of ¾ to 3½-in. bore sizes is provided by Series 9000 flux-through, disc type electric clutches and brakes. Static torque ratings are up to 2400 lb-ft. Units combine a disc assembly with a new electro-magnetic operating mechanism. Engaged position is held by the action of magnetic flux passing through buttress plate, disc assembly, and end plate. Upon release, separators not only separate the discs individually, but also break up residual magnetism, assuring a positive "floating" neutral which will not creep, drag, or heat. Magnetic coil and housing are stationary at all times. Variable transformer or rheostat can change clutch torque capacity by varying the voltage. Standard unit operates on low wattage 90-v dc. Made by **Carlyle Johnson Machine Co.**, 50 Main St., Manchester, Conn.

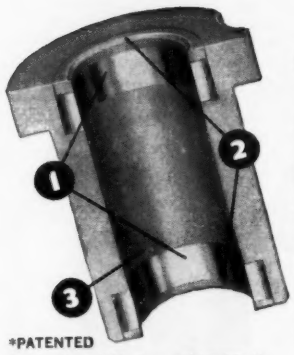
INCREASE PRODUCTION.. SAVE TIME & MONEY



MEYCO
Carbide Inserted Bushings Are Doing It Daily!

How? Like this: (1) Last longer . . . with a life—in most cases—as long as solid carbide bushings at prices that approach the price of steel bushings; (2) Increased life for your drill jigs and fixtures; (3) Increased life for your drills and reamers; (4) Accuracy maintained for a LONG PERIOD of time; (5) Less non-productive machine time, less lost man-hours, because bushings need not be changed as often; (6) Inspection time saved, because of greater accuracy for a longer time; and (7) Less waste due to spoilage, for the same reason. Don't pass up a good bet! Get the dope on MEYCO Carbide Inserted Drill Jig Bushings today!

*PATENTED
1. Tungsten carbide rings at the points of wear; 2. Steel rings protect drills and carbide; 3. Special hardened alloy steel body.

AUTOMATIC SPRING COILER produces coils up to 1¼ in. OD

A variety of left or right hand coil springs can be produced from 0.005 to 0.040 - in. diameter round wire by this automatic spring coiler without special equipment or arbors. Simple adjustments on the machine's face can be made quickly for pitch, diameter, and length of spring. Standard equipment includes automatic controls, a ¾-hp 110-v ac motor, and steel base. Coils can range in diameter from 0.045-in. ID to 1¼-in. OD. Special tooling allows springs to be made from square, oval, flat, plastic coated, or enamel wire, as well as over 1¼-in. OD. Machine has a coiling speed of 40 to 280 ipm and maximum cutting cycle of 30 per min. Made by **Perkins Machine & Gear Co.**, West Springfield, Mass.

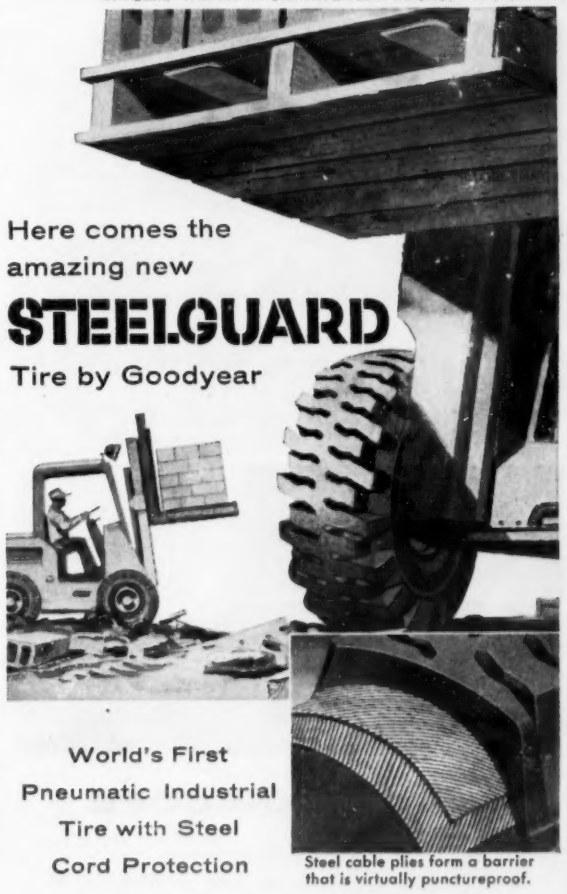
Steelguard—T. M. The Goodyear Tire & Rubber Company, Akron, Ohio



Here comes the amazing new STEELGUARD Tire by Goodyear

World's First Pneumatic Industrial Tire with Steel Cord Protection

Steel cable plies form a barrier that is virtually punctureproof.

Built-in "Steel Barrier" provides unequaled puncture resistance.

Combine the strength of steel with the smooth-riding, sure-tracking characteristics of the finest pneumatic tire ever made—and you have the revolutionary new STEELGUARD Industrial Tire from Goodyear.

Now, regardless of scrap conditions, a pneumatic-tired lift truck can bring the economies of modern materials handling to *any* area of your plant.

The reason: STEELGUARD is virtually punctureproof, thanks to a crisscrossed web of steel cables locked firmly in place by special rubber compounds.

Notice, too, the heavy lugs on this tire—for "plus" protection from snags and cuts. STEELGUARD is even recommended for brickyard use—formerly "sure death" for pneumatics.

Add to this—longer tire life, better sidewall flexing, greater stability, smoothness and flotation.

Get all the facts on STEELGUARD—available now in 6 sizes—from your Goodyear Dealer. Or, write Goodyear, Industrial Tire Sales, Akron 16, Ohio.

ARCWELD MODELS CE, JE

Two Musts For Accurate

Creep Rupture Testing

Arcweld Model CE Creep Tester

Performance-proved Model CE offers two capacity choices: 12,000 or 20,000 pounds. Occupies only 817 square inches of floor space. Operated by push button electric weight elevator or automatic inch-down. Elevator maintained fraction of inch below weight pan. Prevents shock when specimen breaks. Other features: adjustable counterbalanced lever arm • precision knife edges • substantiated axial alignment • self-aligning, heat-resisting grips • keyed lower extension grip • optical creep measuring equipment.

Compact, economical Model JE was developed for plants with limited floor space. Available in 12,000, or 20,000-pound capacity. All control instruments mounted on single-hinged panel. Automatic creep recording equipment. Precision guided-way drawhead offers ultimate in operating possibilities when specimen must be tested without shock, bending, torsional or cyclic effects, varying load or axiality. Drawhead travel for more than 5 inches also available.

Above machines available with vernier adjustment on lever for ratio calibration. Dual ratio lever system also available at slight additional cost. Write today for more information.

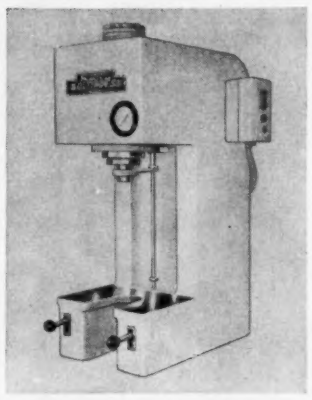
BENCH PRESSES
C-frame type in 2-8 ton capacities



C-frame design Series E Multipresses in 2 to 8-ton capacities are intended to replace heavier, out-moded floor type presses for assembly, crimping, forming, broaching, trimming, and similar operations. Presses operate on 220 or 440 v, 60-cycle, three-phase current. Hydraulic system is a single power unit that can be replaced in a few minutes. Infinitely variable ram force ranges from 400 to 16,000 lb depending on the model. Features include accurate duplication of ram pressure, precision ram alignment, and easy set-up. Presses are designed for manual or automatic production using index tables, feed hoppers, stock feeds, and similar accessories. Made by **American Brake Shoe Co.**, Denison Engineering Div., 1160 Dublin Rd., Columbus 16, Ohio.

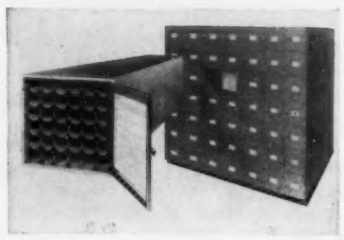
BLUEPRINT & CHART FILE
roll type offered in four lengths



Staktube roll file for blueprints, charts, drawings, maps, and tracings consists of a steel casing which holds thirty-six 2¼-in. diameter file tubes. The square unit has an index record of contents on the inside of the door and a label holder on the outside. Units may be placed horizontally stacked to any height, or stood on end. Lengths to accommodate 30, 36, 42, and 60-in. long tubes are available. Finish is gray baked enamel. Made by **Stacor Equipment Co.**, 295 Emmet St., Newark 5, N. J.

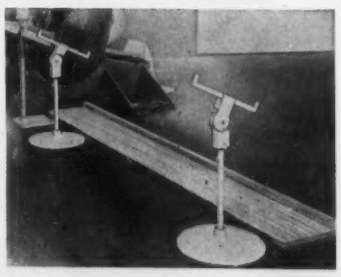
STOCK SUPPORTING STAND
adjustable in height and incline



Adjustable and portable Type AS metal stock stands are designed to hold a customer-built wood tray for supporting strip stock being fed into a stamping machine. Each stand is adjustable in height from 28 to 42 in. and is inclinable to any desired angle. Stock may be lubricated between the stands and the machine. Brackets on the stand hold a wood tray made from 1 x 6-in. tongue-and-groove lumber. Two stands will support up to 1000 lb. Stands may also be used in portable conveyor systems and as supports for tables or benches. Made by **Stamping Specialty Co.**, 2141 N. Sherman Dr., Indianapolis 18, Ind.

CINE-KODAK SPECIAL II—
The world's most versatile 16-mm. motion picture camera.

Make movies that work for you!

In almost every industrial activity—engineering, manufacturing, employee training, research, safety and methods evaluation—in-plant movies are the fastest, easiest, and most effective method for putting across your story.

And for on-the-job movie making, many leading industrial companies have chosen the Cine-Kodak Special II Camera. It has the versatility to handle almost any type of job. Yet its simplicity of operation enables you to get high-caliber results almost as easily as taking home movies.

WRITE FOR FREE BOOKLET, V1-3, describing the Cine-Kodak Special II.

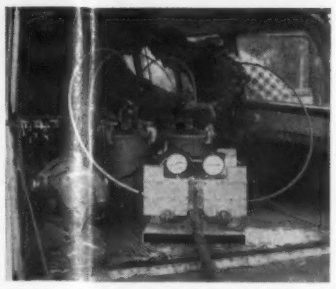
EPOXY SPRAY OUTFIT
mixes, applies fast-curing resins delivered through a heated hose



Economical spraying of epoxy coatings is possible with this spray gun which combines the epoxy resins and the hardener only an instant before the mixture is hydraulically atomized and sprayed. This system overcomes the applications restrictions caused by short pot life of the fast-curing catalyzed systems. (*The process and its application were described in NED-966, Nov. '56.*) The gun mixes the resins and hardener, then forces them through its orifice at 300 psi with a minimum of overspray and misting.

The gun is self-cleaning and always ready for use, even after standing overnight. The proportioning machine used with the gun automatically supplies heat-controlled resinous components at the proper pressure and in predetermined proportion. Operation is on 115 v ac. It is furnished with 25 ft of heating hose, to which additional lengths can be added. Made by **A. Gusmer, Inc.**, Prospect Avenue, Woodbridge, N. J.

ZIPPERED TARPAULIN
panels are zipped together to create any size cover needed

Any size tarpaulin for a particular covering or shielding need can be created with Zipptarp which consists of panels of varying sizes and materials which are zipped together by means of a plastic zipper track. Covering jobs are simplified since a large, heavy cover need not be handled all in one piece. After tarp is lashed down, any panel can be unzipped to allow access to any work point, or to remove desired objects.

Zipptarp is made in lightweight polyethylene or polyethylene-coated paper or cotton, in medium weight waterproofed canvas, and a vinyl-coated nylon for heavy duty applications. Lightweight panels are offered in 5, 10, and 20-ft widths; the medium line in 3, 6, and 12-ft widths; and the heavy line in 4, 8, and 12-ft widths. Standard lengths are 12, 20, and 50 ft, or in continuous lengths of any size. A 1-in. panel with grommets on one side and zipper on the other is also offered for tying down the tarp. Made by **W. A. Plummer Mfg. Co.**, 752 S. San Pedro St., Los Angeles 14, Calif.

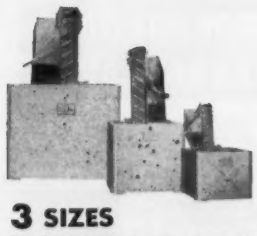
NEW! NEW! ELEVATING FEEDER

Offering Many Advantages Including:

- FLOOR LOADING
- BULK STORAGE
- PARTS ELEVATION
- ORIENTATION
- HIGH FEED RATE
- MINIMIZED RELOADING



3 SIZES
(20-12-6 cubic feet load capacities)
FOR BOTH LARGE AND SMALL PIECE PARTS

These elevating feeders were developed as a supplement to our existing barrel and bowl feeder lines, keeping in mind the industrial demand for a low-cost, high volume capacity floor load parts feeder. They were designed to feed Presses, Hammers, Grinders, Secondary Machines, Furnaces, Assembly Machines—to mention only a few of their many uses. They represent an outgrowth of D.P.S. long, specialized experience in meeting and solving innumerable feeding problems.

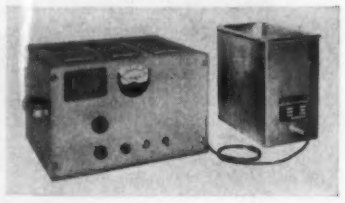
ULTRASONIC CLEANER allows use of two cleaning tanks



Small parts cleaning, blind hole washing, radioactive decontamination, and cleaning of printed circuits and precision parts are typical applications for this low frequency ultrasonic cleaner. Standard unit consists of an electronic generator which delivers 60-w average and 240-w peak energy to crystal transducers mounted on a 1-gal stainless steel tank. Two tanks can be used alternately with the generator without disconnecting either one. Thus, one tank can be used for removing large amounts of soil and the other can be used for final cleaning. List price is $350 with one cleaning tank. Made by **Alcar Instruments, Inc.**, 17 Industrial Ave., Little Ferry, N. J.

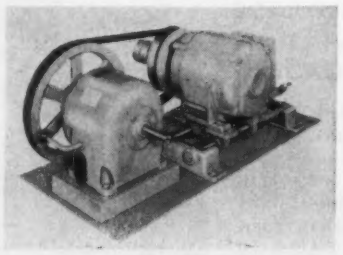
VARIABLE SPEED DRIVE made in ½ to 7½-hp ratings



Available in ½, ¾, 1, 1½, 2, 3, 5, and 7½-hp ratings, this infinitely variable speed drive is well suited to power cutoff saws, welding positioners, polishers, grinders, machine tools, conveyors, pumps, metal formers, and tumbling barrels. It consists of a standard 1800 rpm motor with a shaft-mounted self-adjusting variable pitch pulley belted to a companion pulley on a four-speed transmission. Motor and transmission combinations provide speed variations from 12:1 to 25.7:1. Maximum and minimum output speeds are obtained when motor is moved toward or away from driven machine by turning handwheel on adjustable motor base. Infinite speed between extremes are obtained by shifting the gearshift drive and turning the handwheel. Made by **Lima Electric Motor Co.**, Dept. 124, Lima, Ohio.

Specify WILBOW for Your SILICONE Rubber Parts

WILBOW silicone rubber parts have many desirable characteristics in addition to excellent stability under temperature extremes (−125° to +600° F). Silicone may be the answer to your problem if your parts require low compression-set, good dielectric properties, resistance to ageing, sunlight or ozone, exceptional release from sticking or other characteristics not commonly found in natural rubber or other synthetics.

We are well experienced in producing silicone parts by techniques such as molding, extruding, calendering, bonding or punching from sheet. Let us know of your requirements.

Send for **New WILBOW Catalog** *It will become your handbook of rubber goods*

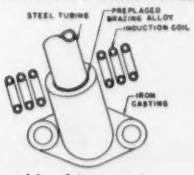
The Lepel line of induction heating equipment represents the most advanced thought in the field of electronics as well as the most practical and efficient source of heat yet developed for industrial heating.

If you are interested in induction heating you are invited to send samples of the work with specifications. Our engineers will process and return the completed job with full data and recommendations without any cost or obligations.

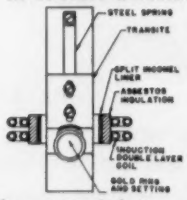
TYPICAL INDUCTION HEATING APPLICATIONS

IRON CASTINGS BRAZED TO STEEL TUBES



Assembly of iron castings and steel or copper parts are facilitated by induction heating. Arrangement is illustrated for silver brazing malleable iron castings to steel tubing. Coil design shown provides uniform heating for joint. Proper joint design assures high bond strength. Electrolytic treatment of castings to remove carbon (Kolene Treatment) increases strength and tightness of joint to gases and liquids.

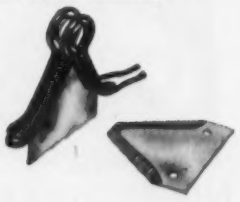
GOLD BRAZING IN JEWELRY INDUSTRY



Liner type induction coil provides a flexible arrangement for brazing settings to gold rings. The simple fixture facilitates handling. The unique coil design permits heating by induction and by radiation from heated metal liner. Ring, setting and gold brazing alloy are pre-assembled in a ceramic jig and then moved into heating position within the coil for brazing.

CUTTER BLADES SELECTIVELY HARDENED

Photo shows coil design and arrangement used to selectively harden edges of cutter blades used in agricultural equipment. In production, cutter blades are automatically fed between layers of the induction coil, selectively heated and then oil quenched at the rate of one per second. Hardness at the cutting edge is Rc 62/64. Distortion is negligible.



Electronic Tube Generators from 1 kw to 100 kw.
Spark Gap Converters from 2 kw to 30 kw.

WRITE FOR THE NEW LEPEL CATALOG . . . 36 illustrated pages packed with valuable information.

All Lepel equipment is certified to comply with the requirements of the Federal Communications Commission.

LEPEL HIGH FREQUENCY LABORATORIES, INC.
55th STREET and 37th AVENUE, WOODSIDE 77, NEW YORK CITY, N. Y.

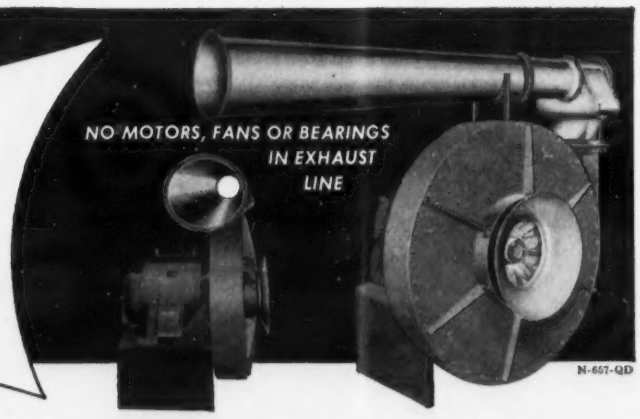
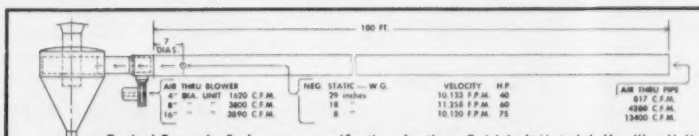
Now... you can reduce bulk materials handling costs with Quickdraft high pressure exhausters



FOR MOVING:
Cement, Sand, Iron Oxide, Wheat, Corn, Salt, Limestone, Castor Beans, Knots, Blocks, Paper, Wool, Cotton, Oats, Rags, Rubber, Vegetables, Coal (Powdered), Shavings, Cork, Sawdust . . . **and any other materials that can be moved by air!**

IMPORTANT NOTICE
For resisting abrasive action, Quickdraft units can be rubber lined. For withstanding corrosive gases, all Quickdraft units are available in standard acid resisting vitreous enamel, No. 316 Stainless Steel, rigid plastics (PVC), and with plastic and Fiberglas coatings.

Time and maintenance savings usually pay for Quickdraft high-pressure exhausters in 6 to 18 months on materials handling jobs. Because material does not pass through blower, maintenance is negligible. Downtime for cleaning and replacing fans, motors and bearings is eliminated. Quickdraft units are also ideal for exhausting paint spray, abrasives, corrosive gases, noxious fumes and high temperatures. For Quickdraft engineering data on materials handling, industrial exhausting, heating plant venting, write today!



Patent Nos. 2,722,372 and 2,855,874. Other Patents Pending.

Typical Example: Performance specifications for three Quickdraft Materials Handling Units using same size blower, pulling through 100 ft. of pipe the same diameter as Quickdraft. (Models range from 4 in. to 30 in. diameter—with 1/6 to 600 H.P. motors—with negative static pressures from 1/4 in. to 60 in. W.G.)

Quickdraft corporation
P.O. Box 87-L • Canton 1, Ohio

Well known for power draft units for all types of heating plants.

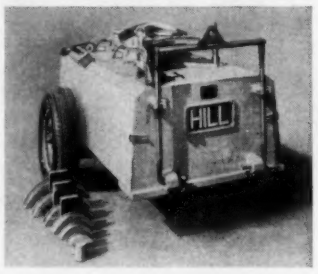
PIPE BENDER-FABRICATOR
is portable, hydraulic power unit



Usable in all types of production, construction, and maintenance operations, this portable hydraulic bending and fabricating machine is mounted on a pneumatic-tired trailer with a castered front wheel. It can be moved manually or towed by truck. It incorporates a 20-ton ram type hydraulic bender powered by a 2000-psi 5-gpm hydraulic pump and reservoir. Pump is driven by a 220-240-v 5-hp electric motor or an optional 5-hp gasoline engine. It will bend pipe and conduit up to 2¼-in. diameter, 1½-in. diameter round bars, and angle. Adjustable bends with radii five times the diameter of the pipe are formed. Dies for ½ to 2½-in. pipe and a pipe vise are standard equipment. Made by **Walter P. Hill, Inc.**, 22183 Telegraph Rd., Detroit 19, Mich.

PNEUMATIC CONVEYOR
portable unit loads and unloads

Chemicals, plastics, foods, feeds, and similar dry, granular, free-flowing materials are handled by the trailer-mounted Pneu-Pac pneumatic conveyor. Capacity of this combination positive and negative pressure in-plant handling system depends on the nature and weight of the material being handled and the combined vertical and horizontal travel distance. The assembly is mounted on a four-wheel trailer, has an over-all height just under 8 ft, and includes a 14 x 10-in. rotary vane air-lock feeder. Made by **Sprout, Waldron & Co.**, 130 Logan St., Muncy, Pa.

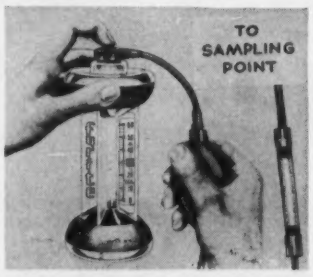
PORTABLE GAS ANALYZER
measures CO_2 at up to 850° F



Expanded line of portable Fyrite gas analyzers includes this unit for measuring 0 to 60 per cent carbon dioxide. This range is particularly suitable for measuring CO_2 in exhaust gases of kilns for cement and allied materials, heat - treating atmospheres, brewing tanks, inert atmospheres maintained in tanks or tanker holds, and protective atmospheres used in many industrial processes. Unit will test gases up to 850° F. It operates on the Orsat method, involving absorption of the gas sample by a chemical absorbent. Gas sampling equipment used to pump atmosphere sample into the instrument is supplied. Readings are not affected by presence of other gases, and accuracy is within ½ of 1 per cent of scale. Made by **Bacharach Industrial Instrument Co.**, 200 N. Braddock Ave., Pittsburgh 8, Pa.

Another NEW Count-Pak

In Veeder-Root's Series of Complete Electronic Counting Packages

- **High Speed**
- **Instant Reset**
- **Completely Transistorized**
- **No Warm-up Needed**
- **Photohead Designed to your Application**

Series 1661 Units are ideal for high-speed direct counting applications, such as can and bottle counting, or case and piece counting on conveyor lines. Unit consists of glow-transfer cold-cathode counting tube and high-speed magnetic counter, coupled with transistorized circuits. Use of an electronic decade increases counter life and assures continuous rugged operation. *Write for specs and prices.*

low installation cost

New building or old, it costs much less to install Reznor gas unit heaters than any other type of heating equipment. Just move them in, mount them in position, make simple fuel, electrical and vent connections and they're ready to go to work . . . producing and distributing heat right at the point of need.

LOW INSTALLATION COST is just one of many reasons why Reznor heaters are right for so many plant heating jobs. These completely automatic packaged units also offer substantial savings on initial costs and on operating and maintenance expense. Whether you need one heater to eliminate a "trouble" spot or enough units for a complete plant heating system, ask your Reznor distributor for details or write for your free copy of "Modern Heating".

Look for Reznor under "Heaters-Unit" in the Yellow Pages

SURETY

SURESEAL GOES HAND in GLOVE WITH THE TOUGH JOBS

Your production machinery is an extension of the skilled hands that operate it. Protect those hands with Surety Sureseal gloves.

Sureseal, with exclusive Turn-Cuff, gives maximum security against crippling accidents and skin diseases wherever hands are exposed to chemicals, solvents, oils, etc. Sureseal means savings, too, because production increases and costs drop where injury causes are minimized.

Sureseal, made from Hycar, offers more effective resistance to solvents and other caustic liquids and lasts up to 14 times longer than rubber and other synthetics.

Test Sureseal at our expense. Write us on your letterhead outlining the job requirements and we'll send you a pair of Sureseals by return mail. Dept. N

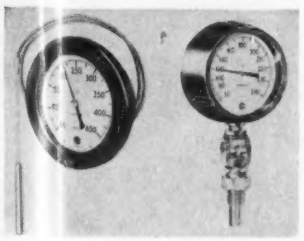
DIAL THERMOMETERS line has −350 to 1000° F range



Variations in redesigned line of indicating dial thermometers include remote or direct reading types; ambient temperature compensation where required; filling mediums for different ranges and uses; various case sizes, materials, and styles; and thermometer bulbs of different sizes, shapes, and materials to suit the application. Ranges covered are −350 to 1000° F. Remote models use armored capillary tubing so that the indicator can be up to 125 ft from the bulb. Rigid stem and multiangle direct-reading styles are offered. Zero setting is by a micrometer adjusting screw. Vapor, gas, mercury, and organic liquid filling mediums are used. Dial sizes are 3½, 4½, 6, and 8½ in. Made by **American Machine & Metals, Inc.**, U. S. Gauge Div., Sellersville, Pa.

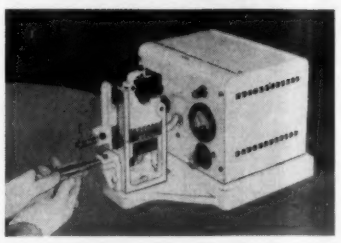
BENCH TYPE WELDER is low-wattage stored-energy unit



Stored energy principle employed in this Model DC 80A bench type Tweezer-Weld unit permits it to weld difficult materials such as copper, silver, and tungsten as well as dissimilar materials of different thicknesses. It incorporates a TW5 friction welding head and an 80 watt-second stored energy panel. A plier type hand piece is available for welding hard-to-get-at assemblies which cannot be handled in the head. Discharge time of 0.0008 to 0.0012 sec insures reliable welds without discoloration, excessive deformation, or metallurgical change. Made by **Federal Tool Engineering Co.**, 1390 Pompton Ave., Cedar Grove, N. J.

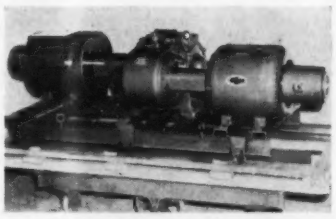
MOTOR-GENERATOR SET 15-kw unit produces 400-cycle ac



Improved motor-generator set shown mounted on welded steel base is rated 15 kw, 0.8 power factor, 115/200 v, three-phase. Left to right are the 400-cycle variable alternator with separate rotating direct-current exciter, totally enclosed speed control, and synchronous motor with exciter. Set produces 400-cycle ac at 1714 rpm with frequency adjustable from 380 to 420 cps as speed is varied by simple hand crank. Drive motor is rated 25 hp, 208/416 v, 1800 rpm. Base rests on six mounting feet equipped with vibration isolators. Flexible couplings are protected with guards. Made by **Kato Engineering Co.**, 1415 First Ave., Mankato, Minn.

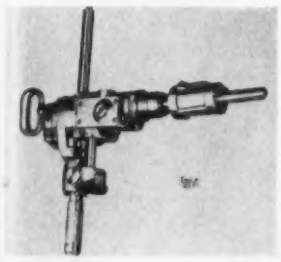
TUBE EXPANDER DRIVES for up to 1½ and 3 in. OD tubes



Added to the Torq-Air-Matic line of automatic tube expander drives are two heavy-duty air-driven models. The 200-rpm Model C shown is rated 75 lb-ft torque and is designed for tubes used in packaged or power plant boilers, waste heat boilers, ammonia condensers, sulphite evaporators, and air-preheaters. It will roll up to 3-in. diameters in ⅝-in. sheet. Model B is offered in three versions, with torques ranging from 38 to 22 lb-ft and speeds from 450 to 750 rpm. It is for ferrous or nonferrous tubes up to 1½ in. OD used in process heat exchangers. Torque output is measured directly at the mandrel by means of an unusual mechanical device. Made by **Thomas C. Wilson, Inc.**, 21-11 44th Ave., Long Island City 1, N. Y.

Because this has what it takes...

The rugged durability and extra value (Timken tapered roller bearings in every wheel, spring loaded non-kicking handle, slide planes for easy pallet entry and 360° lifting radius as standard) of the REVOLVATOR Red Giant hand lift pallet truck has built a reputation which means that . . .

We were called on to do this...

One of six basic models...REVOLVATOR Series 54.00 Go-Getter for use in explosion hazardous areas for chemical and related companies with Class I Group D or Class II Group G hazards designed at the request of one of the country's leading safety authorities. This electric lift truck meets requirements for both hazards and utilizes screw type housings hydrostatically tested to pressures far beyond those required. Additional safety feature—hydraulically operated disc brake.

Explosion-proof High-lift Go-Getter

Therefore: Whether you need a standard piece of material handling equipment or specially designed equipment, call on

REVOLVATOR CO.

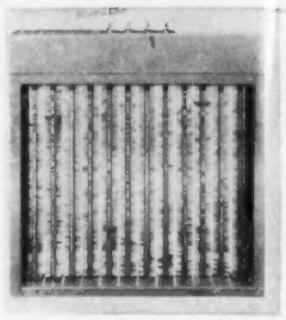
FORCED AIR DUCT HEATERS for ovens, dryers, air conditioning



Parallel rows of Vulcan finned strip electric elements, mounted in a steel frame, comprise the forced air duct heaters for such industrial applications as heated air blasts, ovens, and dryers. They also provide comfort warmth in air conditioning systems. The finned strips offer minimum air resistance. Two models with either three or six rows of heaters are made in lengths from 7⅜ to 38⅞ in. in ratings from 1800 to 20,700 w. Steel or chromed sheaths are supplied. Thermal controls for ranges of 60 to 250° F or 100 to 550° F are optional. Made by **Vulcan Electric Co.**, 88 Holten St., Danvers 7, Mass.

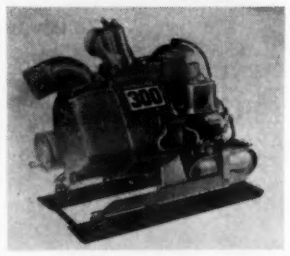
SELF-PRIMING PUMPS
powered by gasoline engine



Two-cycle Model 8 engine of the 300 Series of 3-in. self-priming centrifugal pumps starts quickly, even in cold, wet weather. Self-cleaning abrasion resistant construction permits handling of muddy and sandy water without clogging. Quiet, slow-speed Model 8S3-1 has a total head of 65 ft. Fast-priming, standard speed Model 8S3-1R has a total head of 125 ft. Model 8S3-1P delivers 102 gpm at 60 psi and has a total head of 185 ft. It is suited for jetting, fire fighting, and other jobs requiring high discharge pressures. Each pump weighs 103 lb and has manual throttle control. Made by **Homelite**, 622 Riverdale Ave., Port Chester, N. Y.

For more details circle NED-334 M8 on enclosed inquiry slip

LEVEL GAGE
employs radioactivity detection

Presence or absence of liquid at a preset level is indicated by the Model 40105 predetermined level gage. A scintillation detector, outside the tank, detects and records radioactivity strength from a source on a horizontal plane with the detector. Source can be either inside or outside the tank. Changes in radiation strength indicate presence or absence of liquid at the desired level. Gage is sensitive to changes of a few thousandths of an inch. It can be coupled with automatic valve and drain controls to maintain liquid at the needed level. Coke storage tanks, molten glass furnaces, oil tanks, and milk tanks are typical applications. Made by **Radiation Counter Laboratories, Inc.**, 5121 W. Grove, Skokie, Ill.

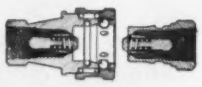
Wherever 2-way shut-off is required...

HERE'S THE COUPLING FOR THE JOB

HANSEN
SERIES HK®

TWO-WAY SHUT-OFF COUPLING

shuts off both sides of line... prevents loss of liquid, gas or pressure



To connect a Hansen Two-Way Shut-Off Coupling, you merely pull back the sleeve and push the Plug into the Socket. To disconnect, just pull back the sleeve. No tools required. When Coupling is disconnected, similar valves in Socket and Plug shut off both ends of line – practically eliminate spilling of liquid or escape of gas at instant of disconnection.

Hansen Series HK Two-Way Shut-Off Couplings are available with female pipe thread connections from 1/8" to 1" inclusive. Available in brass or steel.

One-Way Shut-Off and Straight-Through Couplings also available.

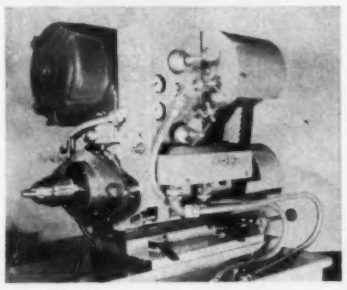
powered by 1/3 to 1½-hp motor, has 600-12,000-rpm speed range



With a single-speed 1725-rpm motor, this Beco Model 505 automatic drill unit provides a spindle speed range of 600 to 13,000 rpm. It is especially adapted for single-point-tool hollow milling, end forming, pointing, chamfering, as well as drilling and tapping. Drill is powered by standard dual voltage NEMA-frame foot-mounted motors rated ⅓ to 1½ hp. One-piece rigid spindle is supported at both ends in the quill. Chuck capacity range is 0 to ½ in.

Unit has a maximum 1½-in. stroke and repeat accuracy on hole depth within ±0.002 in. Thrust is up to 980 lb at 100-psi maximum air pressure. Available attachments are a hydraulic unit to control drill break-through, a self-reversing tapping unit, a broken tool detector, and a tool in-feed interruption device to withdraw chips on deep-hole drilling. Made by **Batchelder Engineering Co.**, 125 Main St., Springfield, Vt.

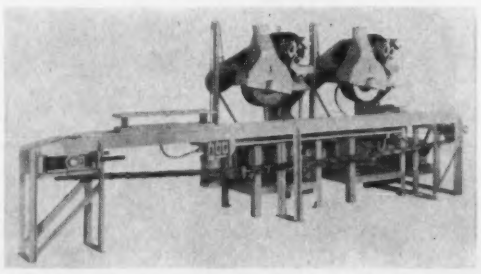
BUFFING MACHINE
reciprocating unit is automated for low or high production runs

Delivered wired for immediate use, the Wilson reciprocating buffing machine can be supplied with any number of buffing heads (two are shown). For low pro-



duction runs, its conveyor can be run forward and reverse under the buffing heads, using only one fixture. On high production runs, the conveyor runs as a continuous over and under machine by installation of the desired number of fixtures on the conveyor chain. In continuous operations it will handle parts up to 4 ft long.

Pieces up to 20 ft long may be buffed by providing the proper conveyor length. Conveyors can be supplied to accommodate fixtures of any width from 6 to 12 in. Drive is by a variable speed brake motor. A swivel adjustment at the base of each head permits cross buffing. Heads are supplied with 5, 7½, 10 or 15-hp dustproof motors. Made by **Wilson Buffing Chuck & Machine Co.**, 22730 Dequindre, Warren, Mich.

NEW Atlas 12" Lathe
Built to handle bigger jobs with dependable PRECISION!

The new Atlas back-geared 12" lathes have big Capacity – 12¼" swing over bed, 12" swing over saddle wings, 8" over cross slide, up to 36" between centers. They're ruggedly built throughout with Timken tapered roller bearings, 16 spindle speeds, reversible power cross feed and longitudinal feed, wide thread cutting range, V-Belt drive and heavy beds with ways precision ground to within .001" in all planes. These and other big-lathe features, *standard equipment* on Atlas, give you greater capacity, versatility and performance than have ever before been available at or near their low price. Available in bench models with standard change gears or quick-change gears, and in two underneath drive models with pedestal base as illustrated. See them at your Atlas dealer's, or –

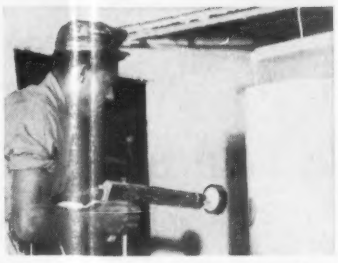
ELECTROSTATIC SPRAY GUN
hand model coats grounded article on all sides with little overspray



Hand-operated spray gun which uses the Ransburg No. 2 Electro-Spray process does not require conveyorized production. The gun consists of a No. 2 process atomizing bell incorporated into a lightweight unit designed for manual operation. A voltage pack is connected with a flexible cable to the gun, creating an electrostatic field between the bell and the article to be coated. The article must be electrically grounded.

Coating material is supplied to the atomizer by either pump unit or pressure tank. Rotation of the atomizing bell feeds the liquid to its outer edge, with atomization occurring under the influence of the electrostatic field. Electrostatic forces attract the spray to the article, and essentially all of the spray is deposited on the article.

The gun is especially efficient in the painting of perforated and expanded metals, tubing, rod, and wire, as the "wrap-around" nature of the electrostatic spray paints all sides of such shapes from one side. Made by **Ransburg Electro-Coating Corp.**, Box 7822, Indianapolis 23, Ind.

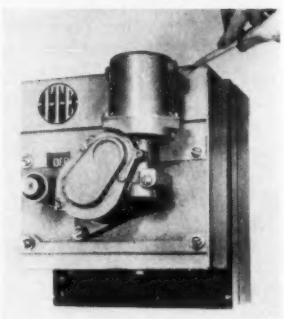
CIRCUIT BREAKER OPERATOR
motor operated for remote control of switchboards and control centers



Both remote control and automatic transfer systems using I-T-E molded-case circuit breakers can be made with this motor-operated mechanism. It can be wired for any operational system desired and can be mounted on either new or existing breakers without removing them from service. Unit adds only 6 in. to the breaker depth. It can be used in switchboards, control centers, individual enclosures, and other applications for remote operation of breakers.

Breaker is opened or closed in only 15 cycles. Before a breaker can be manually operated, the electrical drive is automatically disengaged. Automatic reset of the mechanism is optional. Operator motor is available for either 120 or 240 v. Made by **I-T-E Circuit Breaker Co.**, 1900 Hamilton St., Philadelphia 30, Pa.

CURRENT & VOLTAGE METER
has high stability for measuring resistance, voltage, and current

Unusually stable measurements of resistance, current, and voltage can be made with this R-I-E meter which features contact-modulated stabilized feedback amplifier with complete shielding. It measures resistance from 2 to 2 x 10^8 megohms with a reading error between ±1.7 and ±6 per cent. Volume and surface testing of insulating material is a typical application. Current measurements of 1 x 10^{-12} to 5 x 10^{-6} amp can be made with an error of ±1.5 to ±3 per cent of full scale. Uses include current measurement of photocells, ion chambers, and the outputs of multiplier phototubes.

Meter measures voltage from 0.005 to 500 v within ±0.5 to ±3 per cent of full scale. Uses include measurement of vacuum tube potentials under operating conditions. Self contained power pack supplies either 10 or 100 v, and an external battery for up to 500 v can be connected. A Speedomax 10-mv recorder can be connected to meter for continuous measurement recording. Made by **Leeds & Northrup Co.**, 4934 Stenton Ave., Philadelphia 44, Pa.

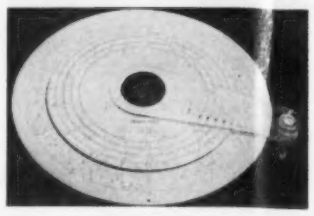
CIRCULAR SLIDE RULE
performs any slide rule calculation



Construction concept of the Dial-O-Matic Log Log Hyperbolic circular slide rule adds and subtracts scale lengths "automatically," making computations fast and easy. Log log scales read from 10^{10} to 10^{-10} with adjacent reciprocal scales. Average scale length is 17 in. Calculation is made by entering numerical factors on the scales, locking the cursor to the rotor, and indexing for the next factor entry, or for reading the answer directly on the rotor. Attention need not be paid to scale direction, or to direction of motion of the cursor in setting to factors. Rule is made of two aluminum discs with bonded white plastic surfaces, and a cursor of molded acrylic plastic. Made by **Eckel Co.**, 31 St. Joseph St., Arcadia, Calif.

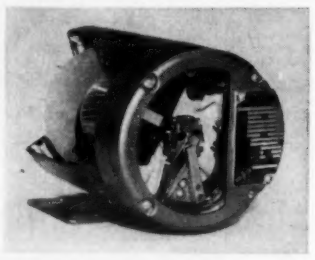
SEALED-SWITCH MOTORS
protected against dust and dirt



Starting switch, capacitor, thermostat, and terminal board of A. O. Smith single-phase electric motors are now sealed to make them impervious to dirt, dust, oily accumulations, and processing materials fines. This design eliminates a major cause of single-phase motor failures. Motors also feature prelubricated ball bearings and a "locked bearing" arrangement which assures constant transfer of power from motor to driven machine with minimum power loss, and also minimize belt, pulley, and bearing wear on the driven machine. Motors are available in general purpose No. 56 frame with rigid base in 1/3 to 1 1/2 hp and also as a blower motor in the No. 56 frame with a resilient base in 1/3 to 2 hp. Made by **A. O. Smith Corp.**, Electric Motor Div., Tipp City, Ohio.

AIR-HYDRAULIC BOOSTER
mounts vertically, has air filter

Vertical, rather than horizontal mounting of this air-hydraulic booster prevents dead weight of internal parts from distorting the hydraulic seal. Booster serves to convert instant action of air into the firm force of hydraulic pressure and is intended as a component for original equipment. Threaded into the breather hole of the air chamber is a filter made from tiny bronze particles pressed together to make a fine mesh. It stops grit and dirt particles in the air supply. Chambers are made of honed seamless steel tubing, and hardened steel tie-rods connect the air chamber and hydraulic chamber. Made by **Wilton Tool Mfg. Co.**, 9525 Irving Park Rd., Schiller Park, Ill.

Hobbs HOUR METERS for

MEASUREMENT OF USE
PROTECTIVE MAINTENANCE

Operating Time of Production and Service Equipment — AT A GLANCE!

To obtain maximum use of production and service equipment, it is essential to know the hours of operation. This information permits accurate study of utilization; also provides data needed for protective maintenance which improves performance and lengthens service through regular attention at the right time.

Hobbs Hour Meters indicate to the HOUR and MINUTE the time of equipment operation. Not a revolution counter, but a true timing instrument. ALTERNATING CURRENT meters time the operation of any equipment powered by a-c electricity; DIRECT CURRENT meters, the operation of any equipment powered by internal combustion engine or battery.

PERSONNEL PAGING RADIO
call made by switchboard operator

Selective paging of an unlimited number of key personnel is possible with the Personal Page all-electronic radio paging system. Paging is done through switchboard operator who simply dials the appropriate number on the system's dial. The call number is transmitted by radio to a miniature receiver carried in the pocket or on the belt of the individual. Receiver emits a pleasant tone signal, alerting the user that he is being paged and to pick up the nearest telephone. The transistorized receiver has its own batteries and antenna. Tone signal continues until user depresses silencer button. Made by **Hanak Engineering Co.**, 7 Heather Rd., Bala-Cynwyd, Pa.

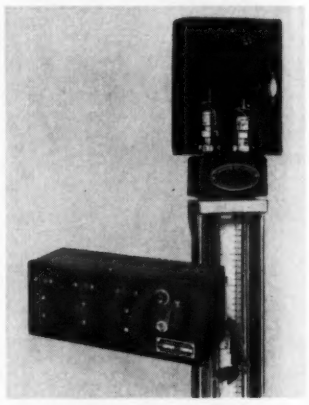
ACCURATE PRESSURE SWITCH
for alarm signaling and control



Extremely accurate, sensitive Manotac manometric - electronic pressure switch consists of a contactor manometer and a relay-power-supply package. It can be used for alarm signaling and/or control in applications involving pressure, vacuum, differential, flow, and liquid level. Make-or-break sensitivity is within 0.005 in. of water, and it can sense pressure increments as small as 0.003 oz/sq in. Switching functions are handled by the modular power pack which uses plug-in printed circuit cards. Load relays have double-pole double-throw switching action with contacts rated 5 amp at 115 v ac. Plug-in and permanent types are available in five models with from one to five contact points. Made by **Meriam Instrument Co.**, 10838 Madison Ave., Cleveland 2, Ohio.

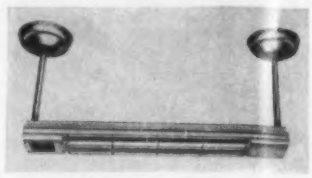
ELECTRIC COMFORT HEATER
ceiling unit has direct radiation for difficult-to-heat plant areas



Desks, work benches, machinery, and other objects became generators of radiant heat when they receive direct radiation from a ceiling-mounted Chromalox electric comfort heater. Suitable for general use, the radiant fixture can be used in hard-to-heat areas, particularly where room temperature cannot be maintained.

The Type SKR unit is equipped with two 12-in. fixture stems for mounting below combustible ceilings as a supplemental or the sole heat source. With an input controller, the radiation of one or several heaters can be set to suit individual requirements, regardless of outside temperatures. Thermostats may be used to control room temperature, and magnetic contactors permit operation of thermostat and input controller on high ratings. Six heated lengths from 16½ to 78 in. have ratings of 800, 1100, 1800, 2500, 3000, and 3600 w. Operation is on all standard voltages. Made by **Edwin L. Wiegand Co.**, 7500 Thomas Blvd., Pittsburgh 8, Pa.

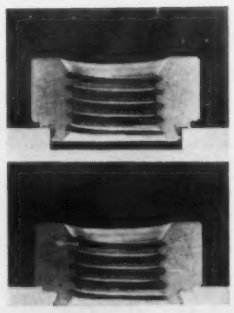
SHEET METAL NUT
self-swaging, clinch type fastener



Female-threaded SPS swage nut can be firmly anchored in sheet metal sections as thin as 0.020 in., or as thick as 0.250 in., with low installation pressures. It can be swaged into steel, brass, Monel, aluminum, and similar metals, or into harder sheet metal up to 25 Rockwell C. Nut is strong enough to break a 160,000-psi bolt before it fails. It requires no special tools, and mounts flush on the load side, and does not deform, bend, or discolor the sheet metal. Nut and metal are squeezed flat between flat plates to flow the metal into the neck of the nut. Most hydraulic or pneumatic presses with pressure control, including portable rivet setters, can be used for installation. Screw diameter sizes from No. 2 to ½ in. are available with Class 2B threads. Made by **Standard Pressed Steel Co.**, Box 581, Jenkintown, Pa.

FOR SPEED and SAVINGS...

Specify NAYLOR PIPE, FITTINGS and FABRICATIONS

For Exhaust Systems • Water Lines
Air Lines • Gas Lines • Compressed Air Lines
Ventilating Lines • Process Lines • Pneumatic Conveyors
Sludge Lines • Vacuum Lines • Drainage Lines

NAYLOR pipe combines light weight with the extra strength and safety you'd expect only in heavier pipe. Its spiral-lockseam structure helps to absorb shock loads and vibration. Available in carbon steel, alloys and stainless steel—in diameters from 4" to 30". All types of fittings, fabrications and connections, including the one-piece NAYLOR Wedgelock coupling that speeds installation, cuts costs.

Write for Bulletins No. 507 and 525.

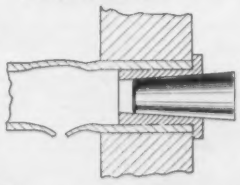
2-piece design of ELLIOTT TUBE PLUGS offers many advantages

For Condenser and Heat Exchanger Tubes

- Quickly and effectively seals off leaky tubes without damage to tube sheets.
- Matching tapered ring and pin engineered for easy installation and dependable service.
- Designed to give even expansion of pin to ring and long contact to the seal.



EASY APPLICATION

- Place ring in tube
- Insert pin in ring, tap lightly until seated
- A few sharp blows with hammer make tight, effective seal

Available in brass, steel, stainless steel and aluminum.

Full House!

...a setko self-locking set screw **for every problem**

ZIP-GRIP® SET SCREWS
Exclusive Contra-Thrust action locks at any point. Solves problems of loosening due to wear, clearance in the thread, or vibration. Can be re-used.

OFFSET SET SCREWS
When driven, two offset edges in threaded portion exert powerful spring pressure. Not affected by extreme variations in tapped holes.

CREST-LOK SET SCREWS
New, original design doesn't require precise tapping. Can be reused repeatedly. Amount of lock can be altered by changing tap drill size.

POINT-LOK SET SCREWS
This design ends top-screw loosening on two-screw applications. Lower screw can be locked with Point-Lok without disturbing original setting. Reusable.

SPRED-LOK® SET SCREWS
This design is for soft metal applications. Top is "spread" slightly to take up "flow" of soft metal. Can be re-used.

FREE, New "SELECTOR CHART"
of Self-Locking Set Screws: Illustrates and describes complete range of Setko locking actions, points, metals, combinations, etc. . . . WRITE TODAY . . . Also ask for our complete catalog No. 23

HERE...Where Cleanliness is Critical

SPENCER VACUUM CLEANERS

Boeing Airplane Co., Seattle, Wash.

In aircraft production . . . as in other "precision" industries . . . cleanliness is more than a matter of maintenance. It's *vital* to proper quality control.

At Boeing, for example, dirt must be kept away from delicate instruments as they are installed. And areas which will be covered subsequently, must be thoroughly cleaned.

Whether *your* prime need is quality control or plant maintenance, it will pay to check on rugged, dependable SPENCER vacuum cleaners . . . industry's "tool of a hundred uses."

LEVELING TRUCK
minimizes need to bend or stoop

Paper, fabric, metal, and other sheet stocks are maintained at a constant working level by the Everlevell spring truck. Unit minimizes operator stooping, bending, and reaching and can handle loads up to 500 lb. Change of only 3 lb in the load readjusts platform to proper working height of about 29 in. from floor. Unit is easily moved about on four 2½-in. self-lubricated swivel casters. Platform measures 28 x 36 in. Custom sizes can be made for special uses. Made by **Everlevell Co.**, 3435 Melvale St., Philadelphia 34, Pa.

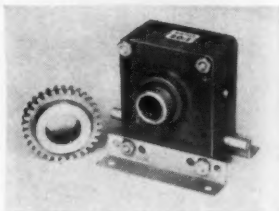
SPEED REDUCERS
small units have 3½:1 to 60:1 ratios



Aluminum driven worm gears of bearing type alloy in SW-1 fractional horsepower speed reducers provide up to three times the torque capacity of molded nylon gears. Nylon gears will continue to be available. Solid or hollow output shaft units with ratios of 3½:1 to 60:1 are offered. The complete unit with molded nylon Fiberglas case and machined steel worm gear input shaft weighs less than 21 oz and measures 3⅛ x 3⅞ x 3¾ in. Business machines, appliances, control devices, and servo mechanisms are applications. Made by **Rampe Mfg. Co.**, 14915 Woodworth Ave., Cleveland 10, Ohio.

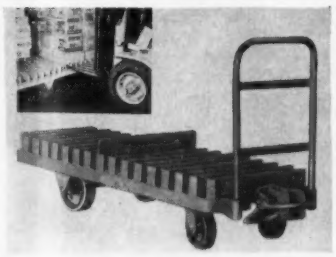
TRACTOR TRAILER
for palletless freight handling



Freight loaded from stock onto this trailer is towed in a train to the loading dock, then picked off the trailer by multiple fork lift trucks and carried into delivery trucks. It is then pushed off the forks by a hydraulic pusher unit. Forks pass under the trailer load in slots in the trailer bed. Fabricated of steel with mold-on rubber or steel wheels and automatic steel couplers, the trailer is designed for fast, hard tractor trailer operation, with minimum weight for easy manual handling in warehouse and manufacturing operations. Made by **SI Handling Systems, Inc.**, Box 70, Easton, Pa.

LUBRICATING GUN
uses sealed, disposable cartridges

Waste and mess incurred in filling lubricating guns is eliminated by the Speed Gun which employs sealed, disposable lubricant cartridges. They contain either graphite cup grease or a nongraphited ball and roller bearing grease which is delivered at 8000 psi. Cartridges are easily inserted in the leakproof gun which has an extra-long piston for high grease delivery per stroke. No. 375 grease is compounded for all types of ball and roller bearings and withstands working temperatures in excess of 300° F. No. 3 cup grease contains Microfyne lubricating graphite for maximum lubrication through a wide range of pressure, temperature, and speed variations. Made by **Joseph Dixon Crucible Co.**, Graphite & Lubricants Div., 167 Wayne St., Jersey City 3, N. J.

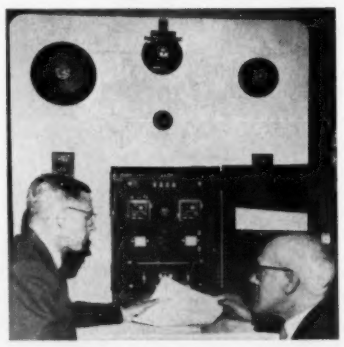
FIRE ALARM SYSTEMS
three types available for commercial and industrial plants



Three compact fire alarm systems are especially suited for industrial plant and commercial establishment use. Types are master code, closed-circuit, supervised; noncode, closed-circuit, supervised; and noncode, open-circuit, nonsupervised. First two ring a trouble bell upon any break in the circuit. The master code rings four rounds of a predetermined common code to all sounding devices on the system, and the noncode type causes all units to ring continuously.

Systems can be operated by individual break-glass fire alarm stations, and by rate-of-rise or fixed-temperature thermostats. As many as 20 stations can be wired into one circuit. Each station has 3-amp 120-v ac contacts. Sounding devices include single stroke bells, vibrating bells, and horns. Closed-circuit systems include an alarm control panel, enclosed in a hinged-door steel cabinet for wall mounting. Made by **Cincinnati Time Recorder Co.**, Systems Div., 1733 Central Ave., Cincinnati 14, Ohio.

Get Lower Costs — Better Performance with

GENERAL PLATE

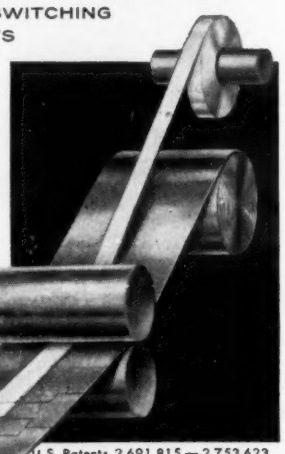
STRIPED CONTACT SWITCHING COMPONENTS

General Plate's exclusive PT* solid phase bonding process is now being used to continuously clad one or more stripes of contact metal to any desired base metal — above the surface or flush — without contaminants introduced by bonding agents.

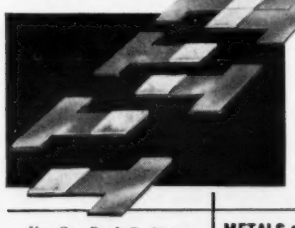
The result? A new STRIPE CONTACT STOCK which can be fed through automatic high speed presses for L-O-W cost production of electrical switching components.

Here are extra benefits — (1) contacts made of General Plate STRIPE CONTACT STOCK have the best possible electrical and thermal conductivity — (2) STRIPE CONTACT STOCK goes through forming tools like a single metal — (3) parts are ready for production as you receive them.

It will pay you to investigate the General Plate line of contacts and contact materials.



U.S. Patents 2,691,815 — 2,753,623



What metals can be bonded to produce STRIPE CONTACT STOCK by General Plate's PT bonding process?

Any combination of malleable metals can be permanently joined to produce STRIPED CONTACT STOCK in long length coils.

You Can Profit By Using General Plate Clad Metals.

SILVER PLATING

"ON THE JOB" WITH POWDER

Cool-Amp Silver Plating Powder deposits a genuine coat of silver that will not peel off, and will provide lasting protection against oxidation. It has been used extensively and is accepted as equal to electroplating for bolted and stationary contacts.

Reduces Maintenance
Saves Electricity

Cool-Amp minimizes overheating and provides cool maximum conductivity for your copper, brass or bronze contacts. Used on all current carrying connections, Cool-Amp silver plating assures long life and low maintenance and will prevent series of losses from oxidation that are too small to create noticeable heat but still accumulate into major power loss. Apply to fuse clips and blades to reduce overheating.

Cool-Amp contains no cyanide and is simple to apply. It can be used by any number of people at the same time ON THE JOB in underground vaults, sub-stations and hard-to-get-at places. The only equipment needed is a sharp steel wire brush or abrasive cloth, clean rag and water.

One pound will silver plate approximately 6,000 square inches.

$13.50 PER POUND **SHIPPED PREPAID**

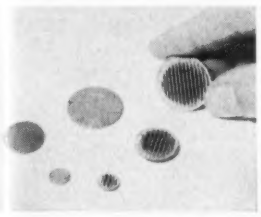
STAINLESS DISC FILTERS for hydraulic and air line use



Eight pore sizes ranging from 5 to 250 microns are provided by line of Poroloy and Poromesh stainless steel sintered porous-wire-cloth and porous-wire-mesh disc filter elements. Used for high temperature hydraulic and pneumatic line filtration, filters can also be used as orifice protectors, snubbers, atmospheric vents and breathers, catalyst beds, strainers, flame arrestors, and for gas dispersion. Poromesh elements have an 8-to-1 increase in effective filtering area for high flow rate and low pressure drop. The rigid Poroloy elements have high strength to withstand strong line pressure surges. Former are made in 25 diameters from 0.0670 to 1.2344 in., and latter are made in five diameters from 0.375 to 1.368, in three thicknesses. Made by **Bendix Aviation Corp.**, Bendix Filter Div., 434 W. 12 Mile Rd., Madison Heights, Mich.

A new standard automatic recessing tool holder has been introduced by Bokum Tool Company. Designed to accommodate Bokum standard "O" ring, retaining ring, back chamfering and thread relief cutting tools, the tool holder features a double cam action for chatter-free, precision operation. It can be used on standard drill presses, radial drills, turret lathes and chucking machines. Write for complete information.

Permanently End Condensation Drip, Rust and Corrosion with NoDrip Plastic Coating!

Here is the inexpensive, easy way to solve your condensation problem once and for all. NoDrip plastic coating acts immediately to insulate and protect tanks, pipes, walls, ceilings, air ducts and other metal equipment against condensation drip, rust and corrosion. NoDrip can be applied by anyone without special experience with brush, trowel or spray. NoDrip is also resistant to acid, alkali and brine...protects concrete, brick, plaster, tile, wood or composition surfaces.

FREE

32-PAGE NoDrip DATA HANDBOOK

Complete with photographs, charts and technical information to help solve your condensation problem. Write today!

VERSATILE MULTI-PURPOSE INDUCTION HEATER

Eliminates "haywire" setups to match loads-to-generator

- Two stations—12½- to 100-volt output for high-power density loads—100 to 800 for low-power density loads.
- Capacitance can be added to tune load during heating cycle at either high or low output stations.
- 7½, 15, 30 or 50 kw, 10 kc power supply.
- Requires only 60" x 39" floor space.

4 Reasons Why OHIO Stock Gears are a Better Buy!

1 **Better Value** OHIO gears are a better value because you get top quality gears at lower prices. Ask for a quotation and see for yourself.

2 **Top Quality** OHIO gears have gained universal acceptance among major users, through a combination of experienced engineering, fine materials and quality workmanship.

3 **Availability** 52 OHIO distributors, located in major cities across the nation, can make fast delivery on all popular styles and sizes . . . from local stock.

4 **Wide Selection** All sizes of OHIO gears are available in both 14½ and 20 degree pressure angle, and includes: spur, 3 to 64 pitch; worm, 3 to 32 pitch; bevel, 3 to 16 pitch; mitre, 4 to 32 pitch; and helical 6 to 24 pitch.

Why not make your own comparison by getting a competitive quotation on your stock gear needs. See your local OHIO distributor or write direct.

Get This Handy Catalog — the only gear catalog planned and indexed to put complete information at your finger tips.

MIST COOLANT GENERATOR for various machining operations

Cleaning and refilling of the 2-gal Model 2 RH Mistic Mist generator for machining operations is accomplished without disconnecting the shop air line. Unit has a lead-coated rectangular tank, removable cover for cleaning and refilling, and an exterior sight glass for visual indication of the coolant level. The compact, 3/16-in. diameter, stainless steel nozzle is secured to a plastic covered magnet of 60-lb pull. This, and friction type universal joints that will not loosen once set, permit easy nozzle positioning. Unit contributes to improvement in tool life, production, and product finish. Made by **Aetna Mfg. Co.**, 188 S. York Rd., Bensenville, Ill.

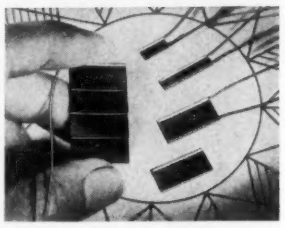
SILICON SOLAR CELLS converts 10 per cent of sun energy



Intimate bond between contact and cell results in 10 per cent or higher conversion efficiency in these ruggedized silicon solar cells. These rectangular cells are available for both commercial and military applications and will provide an output of about 9 w per sq ft of active cell area in bright sunlight. Individual cells are obtainable, with or without color-coded pigtail leads in ½ x 1-cm, ½ x 2-cm, and 1 x 2-cm sizes. Made by **International Rectifier Corp.**, 1521 E. Grand Ave., El Segundo, Calif.

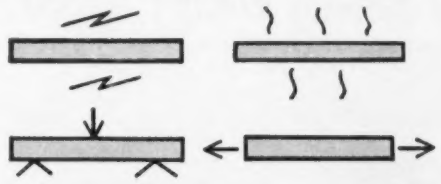
MANY PROPERTIES

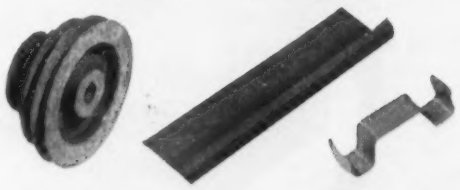


Synthane laminated plastics combine electrical properties such as high dielectric strength, high insulation resistance and low dissipation factor with chemical and moisture resistance, lightweight and good mechanical strength.

MANY FORMS

Synthane is available in sheets in thicknesses up to 8" depending upon the grade; in tubes and rods in a great variety of diameters and cross-sectional shapes; and in tubes of many wall thicknesses.

MANY USES



Synthane laminates are useful in electrical, radio, and electronic components; as gears, guides, bearings or other mechanical parts; as piping, valve parts or piston rings in chemical equipment.

ONE MATERIAL—SYNTHANE

Laminated Plastics in many grades

MIXING MACHINE
takes up to 1-gal containers

Though developed for paint mixing, Thor-O-Mix mixers can be used for mixing other fluids. They employ a pitch-tilt throwing action that assures fast, thorough mixing of all types of liquids. Round or square containers are held securely between rubber gripping pads in cradle and are clamped in place with a hand knob. Four rubber suction feet cushion vibration and prevent creeping. This portable machine is powered with a 110-v electric motor, controlled by a switch, and can be used on floor or bench. Made by **Beck Equipment Co.**, 3350 W. 137th St., Cleveland 11, Ohio.

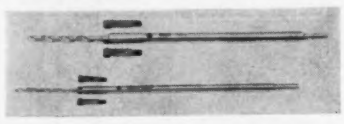
DRILL EXTENSION
for any 1/4-in. capacity drill chuck



An extension rod and interchangeable collets comprise the Extendril drill extension which can be used with any 1/4-in. capacity drill chuck. It can be operated through drill bushings whenever necessary, can be used with broken drills, and performs satisfactorily on stainless and other hard-to-drill metals. Collets are easily loosened or tightened for replacement of drills. Series 770A and 770B accommodate drill sizes from 116 in. through No. 20 and from No. 20 through F, respectively. Rods can be ordered in 4 or 9-in. standard lengths and have maximum outside diameters of 5/16 in. in the A Series and 7/16 in. in the B Series. Made by **Ritmar Corp.**, 183 New York Ave., Huntington, L. I., N. Y.

ROTARY TRANSFER MACHINE
has an integral pressing station for crimping, riveting or staking

Integral pressing station featured by this Type O Pressembler high speed rotary transfer machine performs crimping, riveting, staking, and forming operations in conjunction with automatic assembly. A roller gear drive dial indexing mechanism assures smooth transfer and is accurate to 0.001 in. with zero backlash. Press station has 14-ton capacity and a 2-in. stroke. Dial sizes of 24 or 36 in. with 6, 8, 12, or 16 stations are available.

Model E, for long and/or variable dwell cycles will produce 40 pieces per minute. Its press station and index table are separately powered and synchronized. Model M can produce up to 150 assemblies a minute. Its mechanically timed and synchronized dial and press are driven by a single motor. Made by **Ferguson Machine Corp.**, Roller Gear Div., 7818 Maplewood Industrial Court, St. Louis 17, Mo.

"When a motor we ins Fusetron Fuses saved

"Recently I sent several of my men to install a 50 h. p. air conditioning unit for a customer.

"It seems that my man who wired the 200 amp. switch failed to tighten a lug.

"When the unit was started, it didn't take long for trouble to develop. The loose connection caused one Fusetron fuse to blow. The motor started to run single phased but before any damage could result the other Fusetron fuses protecting the motor also blew and shut down the motor.

"My company stands behind its work. If the motor would have burned up, we would have rewound it without question. I know this would have cost us at least $200.

"What is important too, our reputation was saved and we have a satisfied customer. If the Fusetron fuses had not given us an opportunity to go back and do the job right before the motor was damaged, we would have been in a 'hot' spot."

DON'T RISK LOSSES! Using any other type of protective device may cost you far more than replacing them with Fusetron fuses.

For Loads above 600 and up to 5,000 amps . . . Use BUSS Hi-Cap Fuses They can be coordinated with Fusetron fuses on feeder and branch circuits to limit fault outages to circuit of origin.

Write for . . . Bulletin FIS on Fusetron fuses

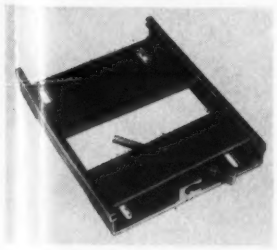
SLIDING MOTOR BASE
has quick release adjusting screw

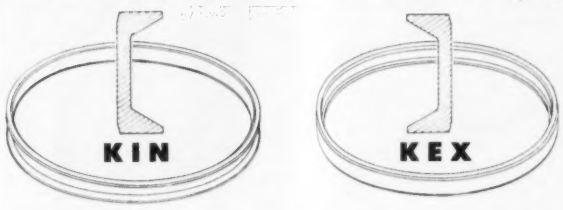


Easy and rapid movement of motor for take-up adjustment of Browning wide range variable pitch drives is facilitated by this sliding motor base. Adjusting screw can be quickly released for maximum movement of motor with only a few turns of the screw. Motor support plate is drilled at the factory to suit the application. Screw assembly is cadmium plated. The 18 x 14-in. Model MB284 base accommodates NEMA motor frames 182 to 284U, and 22 x 17¾-in. Model MB365 will take frames 286U to 365. Made by **Browning Mfg. Co.**, 1940 Browning Dr., Maysville, Ky.

▲ For more details circle **NED-442 M8** on enclosed inquiry slip ▲

TEFLON BOOT
used in conjunction with O-rings

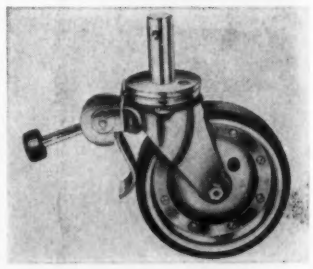
Positive sealing with low breakout friction is assured by the Kapseal Teflon boot, used in conjunction with standard O-rings. Boot is made in Kin and Kex styles,



the former being used where the friction surface is applied to the inside diameter of the seal, and the latter where the seal's outside diameter is the sealing surface. Sizes for the respective styles range from 0.125 to 7.750 in. ID and 0.250 to 7.750 in. OD. Typical uses are those where mechanism must operate the first time with minimum breakout friction, or a standby machine which must operate freely after long periods of inactivity. Sealing qualities are retained after more than 4 million cycles on a low pressure pneumatic cycling test. Made by **Minnesota Rubber Co.**, 3630D Wooddale Ave., Minneapolis 16, Minn.

▲ For more details circle **NED-443 M8** on enclosed inquiry slip ▲

SHOE BRAKE CASTER
for scaffolds and racks



Shoe brake of this scaffold caster can be hand or foot operated. Side lever, operating on a simple cam principle, presses against shoe brake which exerts pressure on the face of the wheel and on the round top swivel plate at the same time. Caster is thus stopped from swiveling, and its wheel is stopped from turning. Unit is made for all types of scaffolds and racks by **Harris & Reed Mfg. Co.**, 2916 W. Jackson Blvd., Chicago 12, Ill.

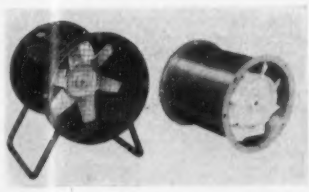
PRESSURE TYPE FANS
deliver 200 to 12,000 cfm of air



Capable of handling air, fumes, and light dusts encountered in industry or special machining or processing operations, Type DT Propellair tubeaxial fans have matched design motors and propellers. They are made with diameters of 8 to 24 in., with capacities from 200 to 12,000 cfm, from free air to 5 in. static pressure. Enclosed "all-weather," high temperature Class B, and explosionproof motors in single or polyphase types are offered for all standard voltages. Propellers are sparkproof magnesium-aluminum alloy with efficient airfoil design. Fan bodies are heavy gage rolled steel tubeaxial drums, and sizes above 8 in. have mounting flanges. Wire mesh guards, legs, venturi inlets, and other accessories are optional. For handling contaminated gas, belt-driven models are offered with the motor outside of the air stream. Corrosion resistant types are available. Made by **Robbins & Myers, Inc.**, Propellair Div., 1345 Lagonda Ave., Springfield 99, Ohio.

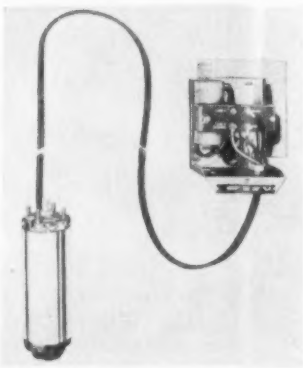
SUBMERSIBLE MOTORS
use water to cool and lubricate



Minimum thrust - carrying capacity of 15 MT Series of submersible pump motors is 175 lb. Built to NEMA specifications, the medium thrust motors have a gimbal ball leveler which distributes pump thrust on water-lubricated bearings in the motor. Stator parts exposed to water are stainless steel, and windings are hermetically sealed. Water is also used for cooling. A three-lead cable places control components above ground for accessibility. Made by **Franklin Electric Co.**, 346 E. Spring St., Bluffton, Ind.

▲ For more details circle NED-452 M8 on enclosed inquiry slip ▲

FLEXIBLE CONNECTORS
high strength units stop vibration and compensate for misalignment

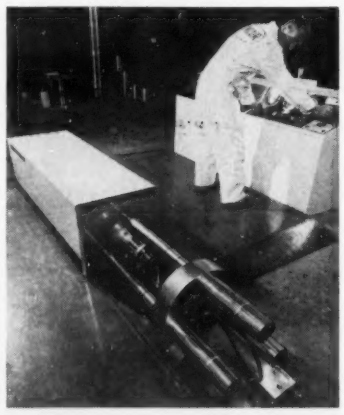
Line of Flex-Hose general purpose flexible metal connectors lessen the transmission of vibration and pulsations into rigid piping from pumps, compressors, air

conditioners, and other equipment. They also compensate for misalignment and minimize strain on piping. The connectors are made of corrugated seamless tubing, protected and reinforced by an outer braid. Maximum steady working pressures at 70° F vary with size up to 1700 psi. Operating temperatures can be as high as 750° F, depending upon materials used. Pressure ratings can be increased up to 75 per cent by use of multiple braiding.

Series B Flex-Hose has bronze tubing, single bronze braiding, and brazed fittings, and is offered for 12 pipe sizes from 1/4 to 4-in. ID in lengths from 8 to 27 in. Series S has steel tubing, woven steel wire braid, and hot-dip galvanized fittings, for seven pipe sizes from 5 to 16-in. ID, in stock lengths from 31 to 72 in. Four end fitting types are offered. Made by **Korfund Co.**, 48-19H 32nd Place, Long Island City 1, N. Y.

▲ For more details circle NED-453 M8 on enclosed inquiry slip ▲

FORMING MACHINE
high velocity, high power unit for forging, forming, and extruding



Seldom employed law of pneumatics is used by the Dynapak forming machine to develop high piston velocity and a high energy rate which can be applied to forging, forming, extruding, compacting, shearing, and blanking of metals and other materials. Its rapid action is safely controlled from an operating console.

Technique employed enables many metals, when worked at high velocities, to flow as if they were plastic. It extrudes parts with a web thickness as small as 0.01 in.; forges to zero draft angle; and produces smooth, close tolerance surfaces. Material is forced into every crevice of the die by the high velocity and pressure.

Machine is made in three standard sizes. Model 600 with a 6-in. bore produces 40,000 ft-lb of energy at velocities exceeding 200 fps. Stroke is 12 in. Model 1200 has a 12-in. bore and delivers 160,000 ft-lb, and Model 1800 has an 18-in. bore and 1,500,000 ft-lb. Smallest model is only 2 x 2 x 9 ft, weighs 3000 lb, and may be bench mounted with only four bolts. Floor loading is almost nil. Energy developed is absorbed in working the material and by the dynamic reaction frame. Made by **General Dynamics Corp.**, Convair Div., 3165 Pacific Highway, San Diego 12, Calif.

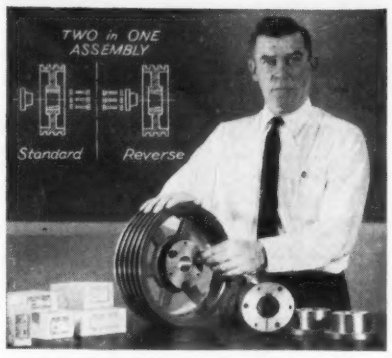
When is a bushing worth the price of a sheave?



When it's "Sure-Grip," of course. As many as 32 "Sure-Grip" bushings will fit the sheave illustrated above. Each permits the use of the sheave on a shaft of different size. Not only that, but in almost every case "Sure-Grip" bushings are drilled and tapped to permit sheave mounting from either side. Add to this flexibility the extra performance that's built into Wood's sheaves and the matchless quality of Wood's matched "Sure-Grip" V-belts and you have an outstanding solution to your drive problems. For information regarding specific drive applications and your copy of Bulletins No. 599 (sheaves) and 3100 (belts), write:

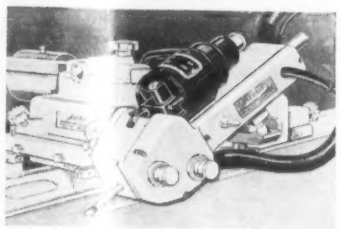
AUTOMATIC TORCH
cutting unit uses arc and air



Among the uses for the Model Q-3 automatic Arcair torch is the preparation of joints for welding. An electric arc melts metal, and a jet of compressed air blows away the molten metal. Its head has a mechanism which feeds consumable copper-coated carbon graphite electrodes as required and supplies a jet of air. Head is mounted on a tractor, permitting straight line or circular travel at a predetermined speed. Head can also be removed from the tractor and mounted on positioning equipment. Torch prepares grooves and bevel contours at the welding location by setting the head at any angle. Electrodes from 3/16 to ⅜ in. can be handled, and the tractor has a 0 to 180-ipm speed range. Made by **Arcair Co.**, Box 431, Lancaster, Ohio.

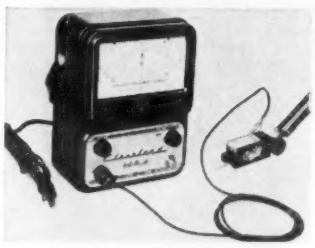
TRANSISTORIZED GAGE
measurements read on three scales



Three color-coded scales of the Indi-Ac Jr. transistorized electronic gage provide accuracy and range from less than 0.000020 to 0.020 in. It operates on a battery or alternating current power source, weighs 68 oz, and measures 5⅜ x 7 x 3¼ in. When used on line current, its battery is being recharged. The T-210 gage head is protected from oil, grit, and magnetic fields. It mounts on any suitable height gage or comparator stand, fixture, or machine. Gage tip can be made to gage from top or bottom of a surface. Zero points and readings are transferable from one scale to another. Made by **Cleveland Instrument Co.**, 6220 E. Schaaf Rd., Cleveland, Ohio.

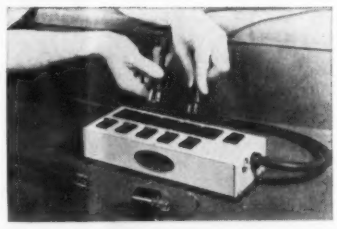
MULTIOUTLET BOX
circuits are protected by breaker



Five overload - protected safety-grounded outlets are provided by this electric plug-in box which is equipped with a 6-ft power cord and a self-grounding three-prong plug, as well as an adapter with a grounding lead for use in standard two-blade sockets. Each of the five outlet sockets has a 15-amp on-off switch and accepts either two or three-prong plugs. The instant-reset circuit breaker trips at loads over 15 amp to protect equipment plugged into unit. Made by **Arthur S. LaPine & Co.**, 6001 S. Knox Ave., Chicago 29, Ill.

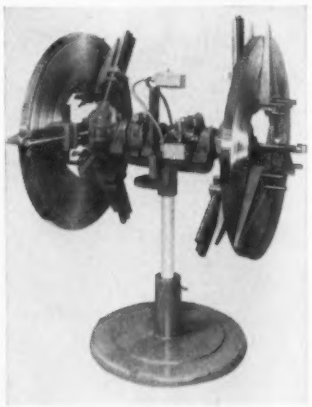
DOUBLE STOCK REEL
for high speed press room use



One side of this self-centering double stock reel can be loaded while the other side is unwinding, thus obtaining maximum productivity from the reel and the equipment with which it is used. It is available with either magnetic or standard friction drag brakes. Quick-adjusting forks are standard equipment. Smaller of two models handles material up to 10 in. wide, a maximum outside coil diameter of 44 in., and up to 500 lb on each side. Larger model takes coils up to 1000 lb, with a maximum diameter of 48 in. and 13 in. wide on each side. Both have a self-centering core from 6 in. minimum up to 24 in. Made by **Durant Tool Co.**, Thurbers Avenue, Providence, R. I.

TRANSPARENT FLEXIBLE INDUSTRIAL HOSE

TYGON *flexible plastic* TUBING

Tygon Flexible Plastic Tubing in bore sizes to 3" makes the ideal industrial hose for many applications because it offers advantages not found in any other type. It combines glass-like clarity with true flexibility and resistance to oils, greases and chemicals. Physically tough, it ruggedly resists abrasion, and withstands repeated flexing and rough usage.

Tygon's many tubing formulations provide types to safely handle a wide and varied range of materials—from sensitive high purity drugs to corrosive acids. Tygon Tubing installs quickly—cleans easily. Fifty-five bore sizes from 1/16" to 3" provide a size for virtually every tubing or hose need. 406-E

SLIP-TYPE CONVEYOR ROLLERS
fluid filled for stop and run use

Material carried on a moving powered roller conveyor can be stopped for assembly, inspection, labeling, or packaging while the conveyor continues to run through the use of this fluid filled roller. No damage to the conveyor or the material results, even on long stoppages. Rollers can be limited in torque transmission to only the amount actually required to maintain material flow. Material can thus be held back when necessary with very little effort. Made by **Harry J. Ferguson Co.**, West Avenue, Jenkintown, Pa.

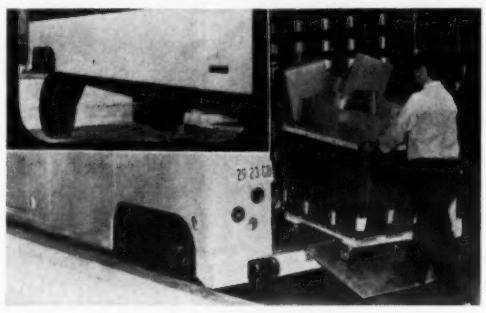
ELEVATING TRAILER
body raises or lowers for loading from ground level to 52-in. height

Body of this Thompson Leveloder trailer can be raised or lowered to match the height of docks, platforms, car doors, or highway trucks. It can even be loaded



or unloaded from ground level as the body can be lowered to the ground or raised to a 52-in. level. Hydraulic cylinders and a 7½-hp gasoline engine driven power unit mounted on the king pin support platform effect the operation. The trailer can be towed by any tractor or semitractor.

Available in van or flatbed body styles, trailer has a steel frame and an Alcoa aluminum body. Size is 27½ ft overall, with a 20-ft body length. It rides at a conventional 24-in. height over the road and has a capacity of 5 to 10 tons in full or semitrailer styles with single or tandem wheels. Made by **Thompson Trailer Corp.**, 2 Old Court Rd., Pikesville 8, Md.

NEW Color-Coded T&B Compression Connector

Cuts Lugging, Splicing Costs in half

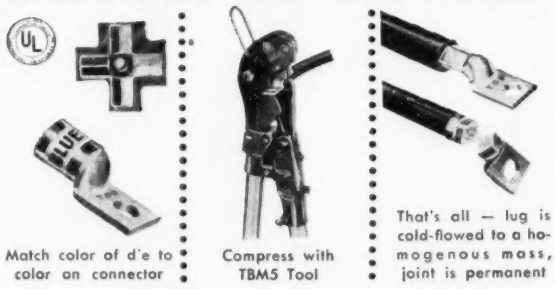
Color-Coding of dies and connectors speeds Compression, assures Permanent joints

Long accepted as the best way to lug or splice conductors, T & B Method Compression Connectors are now available color coded.

A new tool, the TBM5 with color coded dies speeds compression time to give you lowest installed cost.

The connectors are available in one and two bolt hole lugs and two-way connectors from #8 to 1000MCM AWG. The TBM5 installs a wide range of conductors from #8 to 250MCM AWG.

HERE'S HOW THE TBM5 WORKS



Here's what the new T & B Method means to you! First, only one tool is needed from #8 to 250MCM. Second, you get a permanent, high conductive joint every time, and, finally, your splicing and lugging operations are performed faster. Dies snap in, snap out, and the lightweight strong TBM5 is built for a life time of use.

300MCM to 1000MCM installs with compact 20-ton Hydraulic Tool.

Your T & B distributor has this complete line in stock. Be sure to ask for a demonstration. Write today for a compressed T&B connector, and ordering information.

Microsize FLEXLOC locknuts fasten small assemblies with complete reliability

Microsize FLEXLOC locknuts, one-piece and all-metal, meet designers' needs for tiny precision nuts that retain strength and holding power in the smallest assemblies—servomechanisms, electronic and electrical equipment, and many other miniature devices. They are much smaller and lighter than regular FLEXLOCS of the same nominal diameter. They are not affected by moisture, dryness or oil; are not shaken loose by vibration; have no nonmetallic inserts to come out; stay put anywhere on a threaded member as soon as the locking threads are fully engaged.

Sizes 0-80 through 4-48 in alloy steel, stainless steel, brass and aluminum are available through SPS industrial distributors. Ask the one nearest you for complete details. Or write Flexloc Locknut Division, STANDARD PRESSED STEEL CO., Jenkintown 24, Pa.

We also manufacture precision titanium fasteners / *write for free booklet*

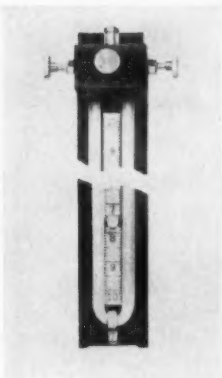
U-TYPE MANOMETER
has integral bypass manifold



Use of this U-type manometer in flow measurement and other differential pressure applications is facilitated by its integral three-valve bypass manifold. The head has a shut-off valve for each of the two pressure lines, and a bypass valve in the connecting passage. Operation of valves simplifies cleaning and servicing. Two available models are a single-cleanout type with a formed glass U-tube and a double-cleanout unit with two straight glass tubes connected by a passage in the removable cleanout head. There are eight sizes of the former with ranges of 6 to 50 in. and 16 models of the latter with 6 to 130-in. ranges. All have maximum working pressure of 250 psi and are available with wetted metal parts of steel, brass, or stainless steel. Made by **King Engineering Corp.**, Box 690, Ann Arbor, Mich.

IMMERSION HEATERS

Featuring

VAPO-VENT†

VAPOR and LIQUID TIGHT VENTING ASSEMBLY ON ALL QUARTZ HEATERS

and

NEO-TITE†

VAPOR and LIQUID TIGHT ASSEMBLY ON ALL METAL HEATERS

Presenting The NEW REPLACEABLE HEATING ELEMENT

THERM-X-RED, a superior line of immersion heaters, presented by **N.J. THERMEX**, introduces a new innovation of vapor venting to eliminate internal explosion in Quartz heaters. The **VAPO-VENT** assembly provides a venting system for expanding gases, a completely liquid sealed head assembly and an extremely versatile unit which permits field repair with standard replacement. These exclusive **THERM-X-RED** features are further aided by the **NEO-TITE** vapor and liquid tight assembly which protects the heating elements in both Quartz and Steel units. Here at last, is a thoroughly versatile unit permitting even accidental total immersion in highly corrosive chemicals with no harm to the equipment.

These and many more features are fully detailed in our latest catalog available on request. Models in standard, thermostatic and remote control thermostatic units are available in Steel, Stainless Steel and Quartz construction.

TRUCO DOES IT AGAIN!

SLASHES COST IN CUTTING THROUGH HARD 12" CYCLOTRON WALL AT WASHINGTON UNIVERSITY

JOB: Cut four 14" openings through cyclotron wall to admit 12" pipes for storage of radioactive materials.

TOOLS: Truco Model C Portable Drilling Machine with 350 rpm motor and 6" Truco Diamond Drill Bits. Because of restricted space, machine was removed from its base and jacked between walls, providing rigidity and leverage for drilling. To shield workers from radioactivity, walls are a special pour which includes Meramec River gravel, making cutting tough. Using a 6" bit (instead of 14" O.D.) and drilling overlapping holes cut diamond bit cost in half. Total drilling time was only three days. Technical help was provided by Ray Martin Co. of Kirkwood, Mo., St. Louis area distributor for Truco products.

Truco unit is portable by one man; designed for high speed drilling in practically any location. Wired for 110V, 60 cycles or less. Air motors for explosive conditions. Send for new catalog and name of nearest distributor.

Top: Cyclotron wall is in a hallway, space is very restricted. Note cores in foreground. *Bottom:* Making big hole by over-lapping small holes cut diamond bit cost 50%.

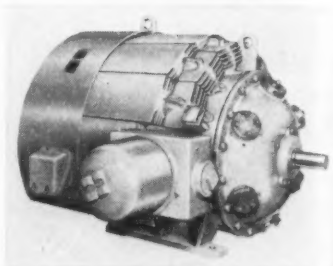
HEAT EXCHANGER MOTOR ratings from 25 to 300 hp



Wide adjustable speed range is provided by this direct-current heat exchanger-equipped motor, offered with an explosionproof enclosure (Class I, Group D Underwriters' label) for hazardous installations. Also intended for constant speed applications, it can be obtained with standard enclosed construction for protection against airborne abrasive particles, dirt, coolants, moisture, oil vapors, and severe atmospheric conditions. Range of adjustable speed extends from 5 per cent of base motor speed by armature control (constant torque) to 400 per cent by field control (constant horsepower). An integrally mounted alternating current fan motor supplies a constant flow of cooling air. Heat exchanger tubes of heavy section aluminum are distributed around the field ring periphery for air-to-air heat removal. Motor can be mounted horizontally on wall, ceiling, or floor, or vertically with shaft up or down. Made by **Louis Allis Co.,** Dept. P, 427 E. Stewart St., Milwaukee 1, Wis.

New **Johnson** *Continucast** **105 Inch Bronze Bars**

ECONOMICAL • CONVENIENT • HIGH QUALITY

Now famous Johnson quality solid and tubular bronze bars are being produced by a continuous casting method to give you the economy and convenience of 105" lengths.

Continucast bars are economical because your distributor can cut this long bar in multiples of a variety of lengths to suit your requirements. You buy and handle less metal—pay for only the metal you use.

The continuous casting method improves the physical qualities of the Johnson alloy 72 (SAE 660) because the distribution of lead and other elements is more uniform. This improves machinability, gives you greater tensile, yield, impact and fatigue properties.

Johnson **Continucast** 105" Bronze Bars are available in 21 sizes of solid bars from ½" to 3" diameter and in 118 sizes of tubular bars which range from ½" to 2½" ID and from 1" to 3" OD.

For full information ask your distributor or write for folder JBL-14.

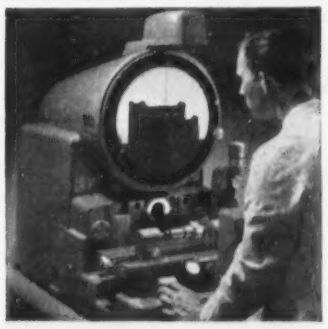
Angles, radii, holes, surfaces . . . inspect them *all* with one instrument



Optical gaging with a Kodak Contour Projector lets you inspect critical dimensions on a wide variety of components to close tolerances quickly and economically.

Quickly because you can inspect *at a glance.* It's simply a matter of comparing the magnified projected image of the component with a chart gage on the projector screen.

Economically because you eliminate the need for buying a multitude of gages. With a Kodak Contour Projector, you see at a glance what it takes many gages and gaging operations to tell you.

A Kodak Contour Projector can solve your inspection problems in toolroom . . . receiving . . . production . . . final inspection. To find out more about optical gaging, send for the booklet "Kodak Contour Projectors." Write to:

new fact-filled folders on PRESSURE SENSITIVE SILICONE TAPES

Dow Corning Silicone Adhesives make tapes that stick to wet or dry surfaces from −110 to 550° F, and possess many other advantages as well. Pressure sensitive silicone tapes form good bonds, stick to almost anything, have high dielectric strength, repel moisture and are not affected by corrosive chemicals. This new folder from Dow Corning explains the properties of tapes made with silicone adhesives, lists the different backing materials available, what each will do. Get your copy now, from

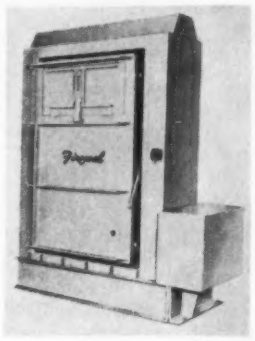
PAPER BALER
powered unit makes 175-250-lb bale



Noiseless in operation by virtue of its motor-speed reducer, this powered waste paper, corrugated, and fabric baler can be plugged into a 110 or 220-v wall socket. It is of welded steel construction, finished in baked green enamel, and requires a floor space of 21 x 54 in. Over-all height is 68 in. and shipping weight is 750 lb. Press produces a bale measuring 28 x 17 x 34 in. which weighs from 175 to 250 lb, depending upon the material baled. Made by **Firewel Co.**, Dept. B, 3685 Broadway, Buffalo 25, N. Y.

DRILL SHARPENER
has 3/32 to ½-in. capacity

Heavy duty No. 21 Drill Pointer uses a technique which permits grinding an intensive clearance angle on the point as the drill web is approached. Basically the same as the standard No. 21 machine, this model uses ball bearings in conjunction with a cam-operated stud to control horizontal motion as the drill moves across the grinding wheel face. Capacity of both machines is 3/32 to ½ in. Standard equipment included is ¼-hp motor, grinding wheel, diamond dresser, jaw assemblies, and setting gage. Made by **Oliver Instrument Co.**, 1442 E. Maumee St., Adrian, Mich.

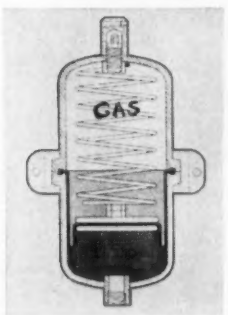
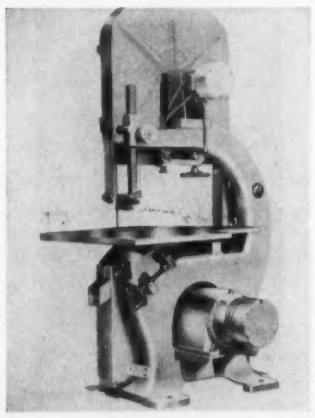
HYDRAULIC ACCUMULATOR
offered in 13 sizes up to 2000 psi



SpeeCo accumulator absorbs line shock, minimizes pressure peaks, and smooths out pump pulsations, as well as acting as an effective booster in storing hydraulic energy. Its hat-shaped barrier seals the oil from the gas chamber, rolling inside-out without friction or wear when charging or releasing. Unit is easily installed, with female threads provided to specifications. Only maintenance is occasional replacement of the rubber barrier. Accumulator is available in 13 sizes from 15 to 7500 cu in. for units up to 2000 psi. Materials other than standard (steel), higher pressures, and larger sizes can be ordered. Made by **Special Products Co.**, 15000 W. 44th Ave., Golden, Colo.

▲ For more details circle NED-511 M8 on enclosed inquiry slip ▲

HEAVY-DUTY BANDSAW
has tension indicator, blade guide



Improved 36-in. heavy duty bandsaw features a stronger frame, a tension indicator, and a blade tracking guide. Bandsaws are available with direct motor drives of from 3 to 7½ hp and with belt drives. Latter drives are adaptable to cutting metals, plastics, fabrics, woods, and other materials. Speeds can easily be varied by changing drives, or by the use of a variable speed unit. Saws with greater capacities under guide, as well as units for left-hand operation are also available. Standard lower wheel foot brake, two-wheel foot brake, or a two-wheel automatic braking system can be chosen. Made by **Northfield Foundry & Machine Co.**, Northfield, Minn.

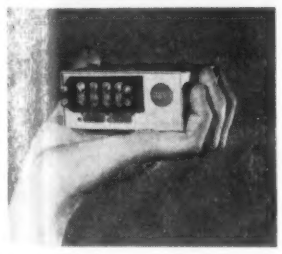
DC VOLTAGE SUPPLY
replaces cells and batteries



Small enough to be held in one hand, this stable, direct current, voltage supply can be used to power potentiometer type recorders, bridge circuits, and industrial measuring potentiometers. It operates from any standard 115-v ac power source. Delivered voltage is essentially constant in spite of supply or temperature changes. This two-stage voltage stabilizer and rectifier unit has standard output of 1 v dc at 2 ma into a 500-ohm load. Other outputs are available. Made by Hays Corp., 980 Eighth Ave., Michigan City, Ind.

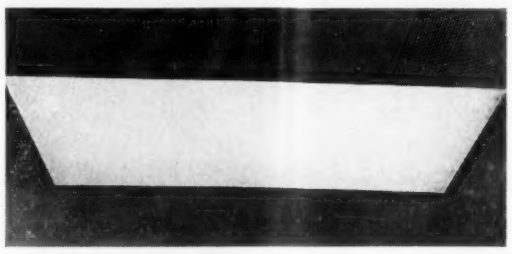
POLARIZING LIGHT PANEL
produces glare-free illumination

High level of illumination with controlled reflected glare is possible with a single Fiberglas polarizing light panel. It employs reflected and refracted polar-



ization to achieve brightness control and uniform light distribution. Polarization of light eliminates many of the beams emitted from their source at undesirable angles, thus making possible maximum use of available light. The textured appearance of the panel blends with acoustical ceiling tile to create patternless ceiling areas. Surface of the panel is smooth and easily cleaned. Polarizing material is produced in flat sheets consisting of color-stable resin, reinforced with Fiberglas flake. Available sizes are up to 24 x 48 in. Made by **Owens-Corning Fiberglas Corp.**, 16 E. 56th St., New York 22, N. Y.

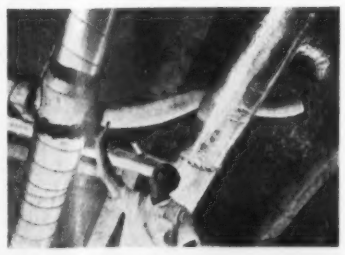
FLEXIBLE AIR DUCT
fabric-metal type for permanent use is flame resistant and vaporproof



Crush and puncture resistant flexible air duct can be restored to its original shape, even after a deforming blow. Made of United States Rubber Co.'s Asbeston aluminized asbestos cloth and steel spirals, the duct can be permanently installed in new and existing structures in high and low velocity air conditioning systems. It bends without kinking around structural members and in cramped quarters with little or no cutting of floors and walls. Fabrics used in its construction is flame resistant, Underwriters' grade asbestos cloth, protected by a laminated, polyester-reinforced aluminum foil that serves as a moisture and vapor barrier. Metal is an electrogalvanized steel spiral. Duct also features low friction loss, absence of odor under operating temperatures, and acid and oil resistance. Lengths up to 20 ft are offered in 3 to 12-in. OD. Made by **Wiremold Co.**, Hartford 10, Conn.

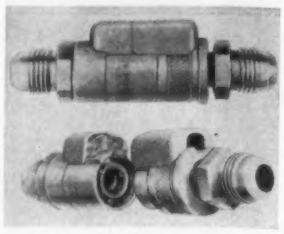
QUICK COUPLING
makes electric and oxygen connection



Necessary oxygen, electrical heating, and communication connections are made through this single 1½-oz combination quick coupling developed for the aircraft and missile industries. Used for pilot breathing apparatus and survival kits, it is also adaptable for ground handling and test equipment. Upon connection, seal engages before electrical contacts are made, and conversely when disconnected. Thus, coupling is applicable for use with inert gases, inflammable gases, and all types of oxygen service. Unit is rated 27 cfm flow at 90 psi and has operating pressure up to 250 psi. Temperature range is −85 to 300° F. It delivers 150 liters of oxygen at 90 psi with less than 1 psi pressure drop. Made by **Perfecting Service Co.**, 332 Atando Ave., Charlotte 6, N. C.

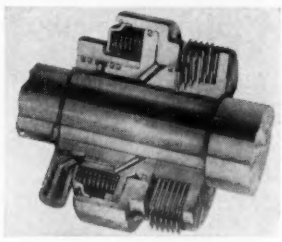
MULTIPLE PLATE CLUTCHES transmit up to 690 lb-ft of torque



Built to run in oil and actuated by 100 to 300-psi oil pressure, Models DO and DOC wet-type multiple - plate clutches are designed for machine tools, transmissions, and similar uses. They never require adjustment for wear and are available in 3 to 7-in. diameter sizes. They can transmit up to 137 hp and up to 690 lb-ft of torque. Model DOC has an integral oil collector. Only connection needed is a 1/4-in. NPTF line to the stationary collector. Model DO is identical except for omission of the around-the-shaft collector. Allowable speeds are up to 5000 rpm for the smallest sizes and up to 3250 rpm for the largest. Both types can employ operational forced cooling by pumping oil through the plate stack. Made by **Twin Disc Clutch Co.**, Racine, Wis.

FAST DELIVERY on NOPAK shelf-stock AIR CYLINDERS!

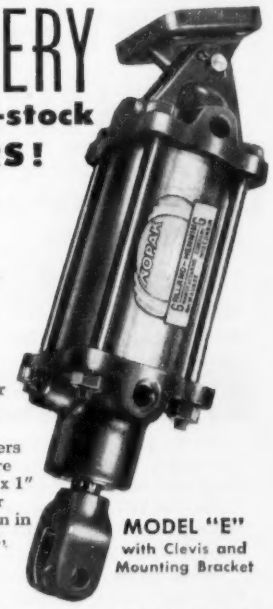
Your choice of —

- 6 Mounting Styles
- 8 Bore Sizes
- 9 Stroke Lengths

When you specify NOPAK "Shelf-Stock" Air Cylinders you save money 3 ways:

1. You eliminate waiting for "specials".
2. You reduce engineering costs.
3. You get top quality NOPAK Air Cylinders at the lowest possible prices.

NOPAK "Shelf-Stock" Air Cylinders are available in a wide range of bore sizes and stroke lengths from 1½" x 1" to 8" x 15". No other manufacturer offers such a wide range of selection in Brass Tubing, Precision Machined, Cushioned Air Cylinders at comparable prices.



MODEL "E" with Clevis and Mounting Bracket

NOW! 5" BORE replaces the 4½" bore in the NOPAK Shelf-Stock line, with no price change — extra cylinder power at no extra cost. Compare quality and prices, and you'll specify NOPAK. Write for Current Listings and Catalog 101.

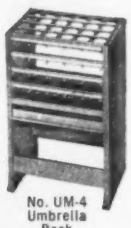
The OFFICE VALET® Lockerette

Combines the best features of both lockers and coat racks.

Wraps are exposed to air and light. Employees do not face the weather in damp wraps that have been crumpled in dark lockers—do not eat soggy lunches, soaked by wet hats or gloves. Each person has his own spaced coat hanger, ventilated hat shelf and 12" x 12" x 15" deep lock box for lunches, tools and personal effects. Improves health and morale—lower absenteeism.

Lockerettes save space too . . . the No. 6-12 (2-column) accommodates 12 people in 6 feet; the No. 9-18 (illustrated) accommodates 18 in 9 feet.



No. UM-4 Umbrella Rack

KEEP MACHINES RUNNING
...reduce maintenance costs,

with DEUBLIN ROTATING UNIONS

¾" Size Union Illustrated

for water, steam and air service!

Here is a compact, efficient rotating union—

- ★ LEAKPROOF
- ★ CORROSION PROOF
- ★ EASY TO SERVICE
- ★ VIRTUALLY FRICTIONLESS
- ★ PRECISION BUILT FOR LONGER LIFE
- ★ INTERCHANGEABLE with any other rotating union
- ★ VERSATILE—For Monoflow or Duoflow operation, available in ½", ¾", 1", 1¼" and 1½" sizes
- ★ MINIMUM TORQUE makes it ideal for high speed applications

See how this dependable, new rotating joint can reduce inventory of replacement parts because of Deublin's standardization of sizes. Keep "shut downs" from wrecking your production schedules. Pays for itself many times over.

Write today for full details and prices.

NEON PILOT LIGHTS have high brightness, 5000-hr life

Over eight times the brightness of NE2 and NE51 pilot lights is given by Omni-Glow NE2H and NE51H neon pilot lights, yet they have a life in excess of 5000 hr. Lights are finished assemblies, ready for installation in a ½-in. hole with a slip-on Speed Nut. Units are offered in a variety of styles with a choice of lens shape and color, body lengths, terminal leads or lugs, and lens markings. They are UL and CSA approved. Made by **Industrial Devices, Inc.**, 982 River Rd., Edgewater, N. J.

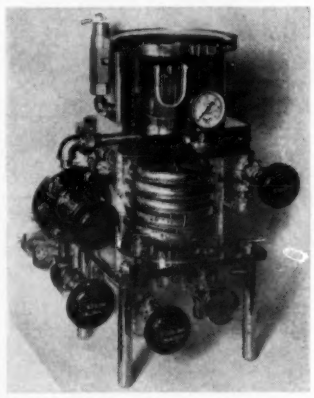
DISTILLATION UNIT makes sterile water from steam



Economical means of producing on-site, high purity, injectable water is provided by the Steril-Aqua distillation unit (see cut-away view). It produces sterile, pyrogen-free water from ordinary boiler steam. Water purposely contaminated to 6500 ppm can be purified to 0.5 ppm in a single pass. Operation is continuous and automatic, with no flushing or deconcentration required. Standard units are available in 5, 25, 50, 100, 250, and 500-gph capacities. Larger units can be custom-produced. All parts in contact with pure vapor or distillate are Type 316 stainless steel and gaskets are Teflon, while filter tank assembly and piping between steam separator and tank are Type 302 stainless steel. If water purity falls below a preselected standard, water is bypassed to waste automatically. Visible and audible signals indicate this condition. Made by **Wilmot Castle Co.**, 1927 E. Henrietta Rd., Rochester, N. Y.

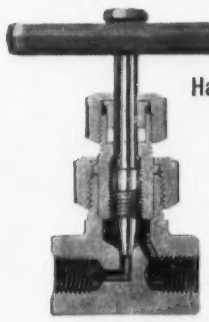
for dependable field service

SPECIFY AMERICAN® NEEDLE VALVES



Handle the toughest meter manifold jobs and corrosive field services. Eliminate gland leaks.

Teflon-packed forged steel American® Needle Valves deliver year 'round dependable service—stand up under all conditions. Stainless or carbon steel precision machined valve bodies are ideally suited for welding. Stainless steel centerless-ground valve stem design makes it simple to repack valves under pressure.

Standard valves are design rated for pressures to 5,000 psi at 70°F. Upon request, assembled valves are hydrostatically tested to 10,000 psi (twice rated working pressure) and individually inspected. Valves are also furnished with graphite-impregnated asbestos packing for temperatures above 450°F.

Angle or straight patterns — screwed or union bonnets.

Ask your American Meter representative for full details.

LOOK! Here's how Spirolox

RETAINING RINGS

Save You Time — Effort — Money!

- ✓ **Save you hours of machining — hours of assembly time! Easy in — easy out.**
- ✓ **Save you extra lock parts!**
- ✓ **Save you space — insures neater assemblies!**
- ✓ **Save you dead weight.**

Spirolox has solved hundreds of industry's retaining problems, just like the Roll Lock Chucking Tool shown below—an external retaining application. Unique, 2-turn construction actually "friction locks" Spirolox into groove. No more keys, pins, collars. Assembly was completed quicker, easier; is more compact, neater, lighter. And Spirolox *always* provides a uniform shoulder.

SEND FOR FREE TEST SAMPLES AND DATA BULLETIN

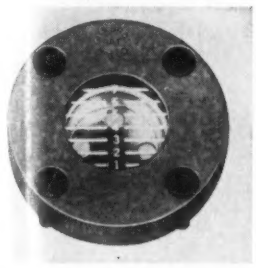
OIL GAGES
designed for gear cases



Instant checks of the oil level within transmissions or gear cases are possible with this series of screw-mounted oil gages. Standard line has five sizes with sight diameters from ¾ to 2 in. The plastic sight is offered with permanent markings or graduations to suit the application. Sight is backed with a cadmium plated reflector which clearly reflects the oil level, even in dim light. Mounting flange is fitted with an oil-tight gasket. Made by **Gits Bros. Mfg. Co.,** 1866 S. Kilbourn Ave., Chicago 23, Ill.

▲ For more details circle **NED-559 M8** on enclosed inquiry slip ▲

DECORATIVE FINISHES
for many industrial applications

Uniform pattern with good depth and definition are achieved with Reverse Hammer finish paint. The pattern does not wipe out when overspray is encountered on irregular shaped, hard-to-paint objects. Applicable to ferrous and nonferrous metals, the paint is available in baking and rapid air drying types in a wide range of dark and light colors. Pieces may be sprayed during different phases of production by different operators, yet retain uniform patterns. Second new finish is a "3-D" paint which offers sharply defined two-tone effects in splatter patterns. Use of a veiling gun is recommended for the first coat, but a conventional gun may be used for the second coat which can be applied before the first coat dries. Patterns range from embossed leather appearance to that of terrazo. When used as a one-color system, the finish resembles that of Fiberglas. Made by **P. D. George Co.,** Dept. ND, 5200 N. Second St., St. Louis 7, Mo.

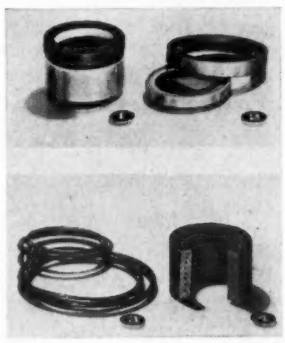
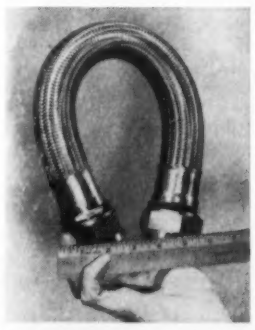
SEAL & GASKET MATERIAL
resists heat, oils, and solvents



Used successfully in military aircraft and missile applications, Viton polymer is now being used to make O-rings, packings, and oil seal elements, for use where resistance to heat, oils, solvents, and corrosive liquids is essential. Basic formulations range from 60 to 90-durometer hardness. It retains its useful elasticity for more than 2400 hr at 400° F dry heat temperature, and 1000 hr at 450° F. O-rings made from Viton perform satisfactorily at −65° F. Style 7263, rated 80 durometer, is an off-white formula for use in the food industry. All other styles are black. One formulation is suitable for making mechanical seal bellows, sheets, and molded and extruded shapes. Offered by **Garlock Packing Co.,** 429 Main St., Palmyra, N. Y.

▲ For more details circle **NED-561 M8** on enclosed inquiry slip ▲

HIGH TEMPERATURE HOSE
highly flexible sizes to 2 in.



Light in weight and possessing long life expectancy, Springfield 400 Teflon hose assemblies have a temperature range of at least −65 to 400° F. Low convolutions in the inner tube, made with Teflon and Fiberglas tape, give it good flow characteristics. Hose is available in diameters from ¾ to 2 in., and being highly flexible, has a minimum bend radius of three and one third times the equivalent tube size. When assemblies are bent below the minimum bend radius, the hose will flatten out, but returns to its original shape without damage when straightened. Zero-Motion braiding process eliminates elongation or contraction under operating pressures. Compression type end fittings are factory-swaged onto the hose. Made by **Titeflex, Inc.,** Hendee Street, Springfield 4, Mass.

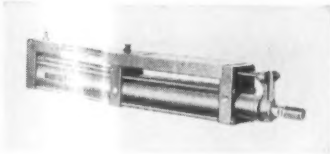
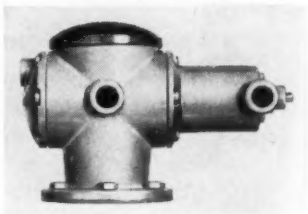
AIR-HYDRAULIC UNIT has varied combinations of feeds



Any combination of rapid advance, feed, and skip feed can be set up by two easy-to-reach cams of this air-hydraulic unit. A built-in bypass valve with traveling rods allows rapid advance to any point in the stroke, controlled rate of feed for any distance, pick-up of rapid feed, and return to controlled rate. This cycle can be repeated several times during the stroke by setting the bypass valve cams. The unit combines an air cylinder, hydraulic control cylinder, and valving. Usable on milling machines, lathes, drill presses, packaging machinery, assembly operations, and other equipment, it is made with 2, 4, 6, and 8-in. stroke lengths. The 2 and 3-in. bores offered provide thrusts of about three and seven times air line pressure, respectively. Made by **Electro-Mechano Co.**, 261 E. Erie St., Milwaukee 2, Wis.

▲ For more details circle **NED-577 M8** on enclosed inquiry slip ▲

VALVE POSITIONER for cylinder, diaphragm actuators



Model J top-mounted integral valve positioner, usable on cylinder and diaphragm type actuators, is capable of an infinite number of stroke lengths up to 8 in. in any combination of control forms through a variety of models. Linearity exceeds 1 per cent, regardless of stroke length. Positioner combines force-balance design with a pilot-operated relay valve, responding to signal changes as low as 0.001 psi. Increasing or decreasing outputs may be applied to either the top or bottom of an actuator in a single mounting of the positioner. Zero adjustment is readily accessible. Unit is enclosed and weatherproof. Made by **Conoflow Corp.**, Dept. D-5, 2100 Arch St., Philadelphia 3, Pa.

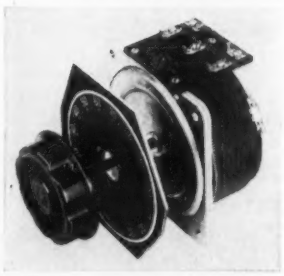
AUTOTRANSFORMERS redesigned units rated at 20 amp



Heat transfer between coil and base, brush and radiator has been improved in redesigned Type W20 Variac autotransformers. Duratrak contact surfaces minimize brush-track deterioration under adverse environmental or load conditions. Basic uncased models are available for 115 and 230-v service and are rated at a maximum of 3 and 2.4 kva, respectively. Cased models have knockouts for conduit or armored cables. Case front is easily removed for access to terminals, mounting holes, and brush. Two portable models include a three-wire attached cord and plug, output receptacle, switch, and overload circuit breaker. All W20 models can be connected to provide a 17 per cent over-voltage output if desired. Two and three-gang assemblies are available cased and uncased, and motor drives can be supplied for all models. Made by **General Radio Co.**, 275 Massachusetts Ave., Cambridge 39, Mass.

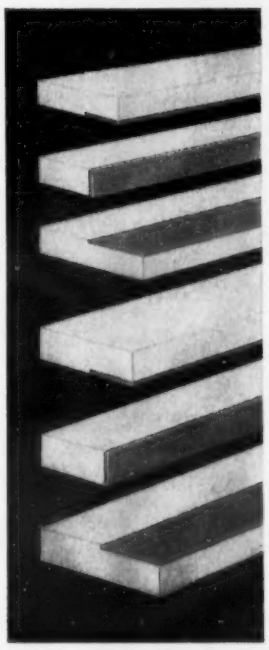
O-KNI-CO MACHINE TOOL news
PRODUCTION FACTS THAT INCREASE YOUR PROFITS
PUBLISHED BY THE OHIO KNIFE CO., CINCINNATI, OHIO

Die Builders save up to 50% using new O-KNI-CO composite die sections

Six new sections now available



Companies building dies for both consumer and industrial products report O-KNI-CO ready-made die sections not only save up to 50% over the cost of home-made die sections, but offer many ways to improve die building. These savings are achieved because O-KNI-CO sections can be purchased at an established price. You buy what you need to your specifications. They are carried in stock in lengths up to 125". They are ready to use with cutting or forming edge hardened, machined and ground. Specially hardened tool steel (Rockwell 64-66) is bonded to a soft steel backing, quickly drilled for dowel or screw holes.

These six new sections make a total of seventeen O-KNI-CO sections now available to die builders. They can be used for cut-off, blanking, forming or flanging . . . draw and pinch dies, heels, back-up plates or as guides and hold-down gibs.

Use coupon below for Data Sheets illustrating the varied applications of O-KNI-CO composition die sections.

- All Other Low Temps.

You can accurately read any low surface temperature with the Alnor Type 2300 Surface Pyrometer—in 3 to 5 seconds.

Take this rugged, portable instrument to any job in the field and see how performance to laboratory standards can save invaluable time in balancing out a system...save the money lost on call-backs. Large 6" mirrored scale is direct reading, no conversion...no errors in readings...1° per division. Precision jeweled movement is protected against abuses of portable service by sturdy walnut case. Comes complete with matched thermocouple and lead ready to use on your next trip out. Send for Bulletin 4257. Tear out this ad and mail on your letterhead to: Illinois Testing Laboratories, Inc., Room 529, 420 N. LaSalle Street, Chicago 10, Illinois.

NEW...
an advanced concept in metering small flows

The Brooks Sho-Rate "50" is a new design idea in purge meters. It offers the complete interchangeability, dependability and structural strength that's been needed for a long time.

- *Slip-out Tubes*
- *Side-plate Construction*
- *Rotatable End-fittings*

The Sho-Rate "50" Purge Meter gives all this... at a very low cost. *Send for complete facts.*

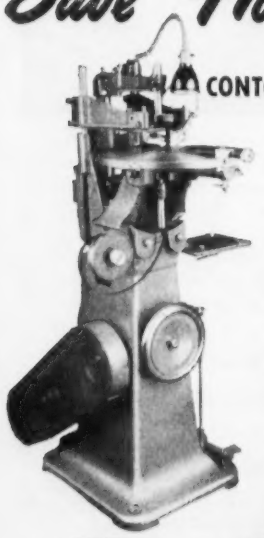
Save Hours in tool rooms and die shops with CONTOUR SAWING AND FILING



You can save real time and money in the production of parts for jigs and fixtures, dies, gages, templates and special machine production by using an Oliver of Adrian contour sawing and filing machine.

The Oliver is so simple to operate that all sawing, filing and lapping can be handled by an ordinary mechanic—saving a skilled die maker's costly time. Parts can be shaped to dimension faster, more accurately with no hand filing or semi-finishing operations. Available in five types – bench or pedestal. Write today.

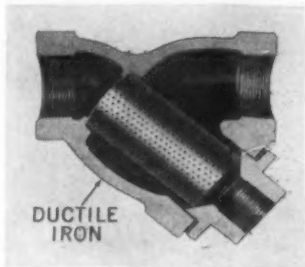
DUCTILE IRON STRAINERS for 600-psi steam service



Capable of withstanding pressures of 600 psi at 650° F, this line of pipeline strainers is made of ductile (nodular) iron in 3/8 to 2-in. standard pipe sizes. Ductile iron will not bend or twist, nor will it break in case of fire or explosion. Strainers reportedly offer 80 per cent of the strength of cast steel at roughly half the price. Made by **Strong, Carlisle & Hammond**, Strong Steam Specialties Div., 508 Sandusky St., Conneaut, Ohio.

STERILE-INDICATING LABELS for research and laboratory work

Particularly suited for operations involving sterilization in autoclaves, Time autoclave self-sticking vinyl-coated labels afford proof of sterility. Heat-sensitive ink imprint "sterile" becomes visible only when product to which label is attached is subjected to a complete autoclave sterilization cycle of 15 minutes at 250° F. Accidental activation is impossible. Labels also serve to identify product through a standard visible imprint, act as seals, and show number and size of articles. A wide selection of standard and custom legends is offered. Furnished in 500-in. to 60-yd rolls of 117 to 1000 labels, they are easily dispensed and applied. Sizes range from 1/2 x 2 1/4 to 2 x 4 1/2 in. Made by **Professional Tape Co.**, 355 Burlington Ave., Riverside, Ill.

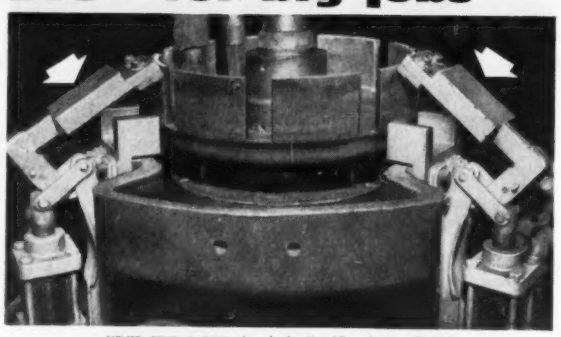
BIG--for big jobs



NEVER SEND A BOY—here's the Knu-Vise clamp AO-200.

LAPEER CLAMPS FOR ARC WELDING

In the plant of a midwestern automotive parts manufacturer, air operated Knu-Vise clamps are an important part of a work holding fixture for arc welding. Shown is the operation where center hubs are welded into the high clutch splitter housing for automatic truck transmissions.

No job for a panty-waist, the husky Lapeer clamps have to grab securely—hold rigidly—let go instantly. They are part of a family of more than 150 models of clamps and pliers designed to do a tremendous number of holding jobs. Some are air-operated, others hand operated. All of them do workhorse jobs in industry holding big parts, small parts, unwieldy parts. Write today for more information.

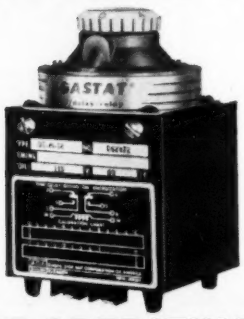
NEW AGASTAT®



HAS LONGER OPERATING LIFE

The Agastat time/delay/relay has been completely re-designed, inside and out, to make every moving part last longer and operate more reliably. Here are some other important advantages:

- Dial adjustment for ease and accuracy
- Five timing ranges, covering an overall range of from 0.08 seconds to 15 minutes
- Timed intervals remain the same through repeated readjustments
- Integral wiring diagram and calibration plate
- Measures only 4-9/16 x 2-9/16 x 2-5/8"
- All contacts are flexible contacts
- Contacts are larger for fast heat dissipation

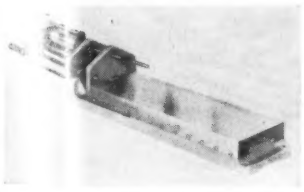
PACKAGED SLIDE ASSEMBLY
air unit has built-in feed control



Time and money can be saved in assembling special machines with this air-powered heavy duty slide assembly which has smooth, accurate hydraulic feed control. Packaged unit includes two built-in Micro switches to permit interlocking slide operation with other functions. Stocked slide is offered with working surfaces of 4 x 12, 6 x 16, and 8 x 24 in.; maximum strokes of 4, 6, and 8 in.; and maximum feed strokes of 2, 4, and 6 in., respectively. An adjustable hydraulic check may be used to regulate slide speed during any desired portion of the feed stroke. The air control valve which starts operation may be any of several types for 110 or 8-v service, the latter offered with a transformer for 115, 230, or 440 v. Adjustable air speed valves restrict the air cylinder speed in both directions. Made by **Russell T. Gilman, Inc.**, 623 Beech St., Grafton, Wis.

Which MOTO-TRUC "Walkie"* Would You Choose For Your Handling Job?

■ Naturally, you would choose the model that provides the most efficient handling. Your decision will be a simple matter of cost vs. performance.

To assure efficient handling, MOTO-TRUC has developed a wide range of models to meet every handling need. With more than 50 standard and special models to choose from, you can always be sure of outstanding performance.

Equally important, MOTO-TRUCS cost less to buy and operate. You can buy MOTO-TRUCS at prices well below those of competitive models. Yet, in spite of their lower initial cost, Moto-Trucs cost less to operate and maintain.

As the world's largest "Walkie" truck manufacturer, MOTO-TRUC offers you more handling performance for every handling dollar.

When you're buying a money-saving MOTO-TRUC let your local MOTO-TRUC handling engineer help you select the most efficient model for your job.

* *Rider type Moto-Trucs are also available in these same basic models.*

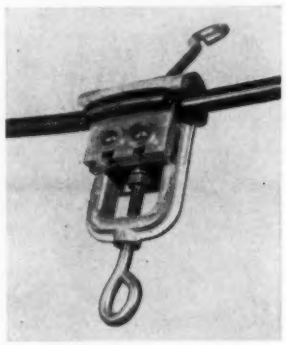
INSULATION REMOVER
strips a 2½-in. length at one time



A 2½-in. length of polyethylene, polyvinyl chloride, rubber, or neoprene insulation with from 3/64 to 12/64-in. walls can be stripped from conductors ranging from No. 2 stranded to 4/0 ACSR with this Penn - Peeler. Tool uses individual, interchangeable, cutter blades for each conductor and insulation combination. It is hooked over the insulation, tightened up by hand until stop is reached, then rotated around the conductor. Insulation "chip" falls away exposing the bare conductor. Stripping is performed without injury to conductor. Made by **Penn-Union Electric Corp.**, 315 State St., Erie, Pa.

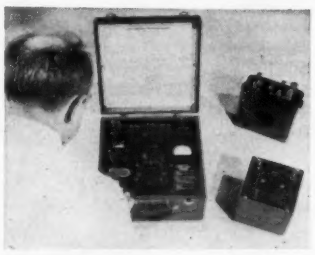
AC VOLT AMMETER
measures voltages and currents in the 20 to 20,000-cps range

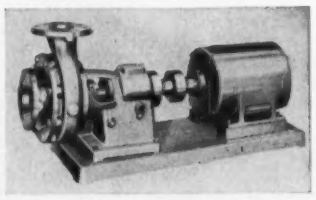


Alternating currents and voltages in the audio frequency range of 20 to 20,000 cps can be measured accurately within ±0.05 per cent with the Hermach - Englehard Transfer volt - ammeter. Instrument can be used to check the accuracy of lab and portable standard instruments for electrical, electronic, aircraft, and instrument manufacture.

It has a current range of 50 ma to 5 amp and a voltage range of 7.5 to 300 v, both of which can be extended through the use of shunts and multipliers. The portable, 25-lb instrument is built into a carrying case. It operates on a thermal matching principle as indicated by a galvanometer pointer about a null balance position. Made by **Charles Engelhard, Inc.**, 850 Passaic Ave., East Newark, N. J.

▲ For more details circle NED-613 M8 on enclosed inquiry slip ▲

CENTRIFUGAL PUMPS
standardized single-stage units



Discharge of the LP Series of standardized single-stage centrifugal pumps can be placed at any position by rotating the casing around the shaft center. Casings are of the centerline discharge type which simplifies application. The standardized pumps bear the ASA preferred numbers to indicate important linear dimensions and other pump characteristics. Standard closed type impellers are cast iron, with bronze optional. They are statically and hydraulically balanced and have double wear rings. Choice of stuffing box or mechanical seals is given. Pumps are available with a cooling jacket for temperatures to 320° F. Standard working pressure is 125 psi and standard temperature is 240° F. Line includes 41 sizes rated at 10 to 3000 gpm with heads from 10 to 250 ft. Made by **Taco Heaters, Inc.**, 1160 Cranston St., Cranston 9, R. I.

New adaptable sump pump fits any pit from 2′-20′ deep

Here's a new sump pump that's easily tailored to your exact needs—Goulds Fig. 3171 heavy-duty vertical centrifugal sump pump.

You can get it in 6-inch increments, from 2- to 20-foot lengths to accommodate most pits. And when you want to change pit depth or pump ratings, you merely replace necessary parts *in the field.*

Other "custom" features you get at a standard price:

1. Interlocking fits for permanent alignment.
2. External adjustment of impeller clearance.
3. Sealed-in, easy-to-replace upper bearing.

Single and duplex units available for wet and dry pits.

Vapor-proof construction upon request. Capacities to 1080 GPM, heads to 290 ft. For details, see your Goulds dealer or write:

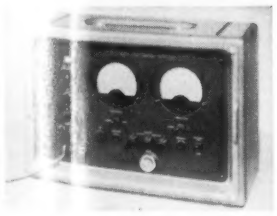
VIBRATION METER measures distance and vibration using a noncontacting probe



Measurement of vibration where direct physical contact is not feasible and measurement of the dilation and eccentricity of rotating parts are possible with the Type B-731-A vibration meter. It can also be used for vibration tests and to determine sizes and grades of parts for tolerance. Distances and vibration amplitudes from 50 mu in. to 0.5 in. can be measured accurately in a 1 cps to 10 kc frequency band.

A noncontacting probe, connected to a 50-kc oscillator and suitable amplifying equipment, is brought into proximity with the object under test. The capacitance so formed is interpreted in terms of distance and peak-to-peak vibration. The two quantities are displayed on direct-reading meters. Probes are available to give full-scale deflections for both distance and vibration of 0.001, 0.01, 0.1 and 0.5 in. An oscilloscope can be connected to the amplified probe signal for qualitative and quantitative analysis of vibration. Made by **Wayne Kerr Corp.**, 2920 N. Fourth St., Philadelphia 33, Pa.

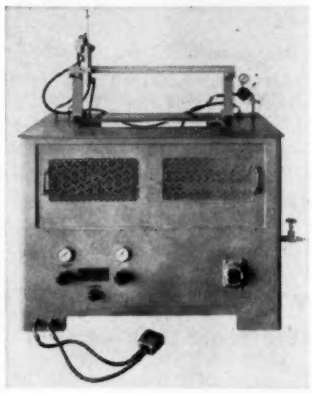
AUTOMATIC SPRAY PAINTER two-gun unit sprays 8 x 22-in. areas, assures even deposition



Even deposition of paint to the same thickness over the entire part is achieved by this two-gun automatic spray painting machine. Mechanical reciprocating drive provides smooth gun travel with no pauses even when the traversing guns reverse their direction. Guns paint in both directions, automatically shutting off at the end of each stroke. Machine sprays areas up to 8 in. wide and 22 in. long. Speed of gun travel is adjustable from 35 to 90 fpm.

Chain drive is powered by ¼-hp 110-v single-phase 60-cycle motor wired for explosionproof purposes. All working parts are enclosed, and mechanism is automatically lubricated. Machine is supplied with 12-in. diameter round exhaust duct collar and can be equipped with counter and timer controls, air clamping hold-downs, and tilting guns for angle painting. Made by **Conforming Matrix Corp.**, 338 Factories Bldg., Toledo 2, Ohio.

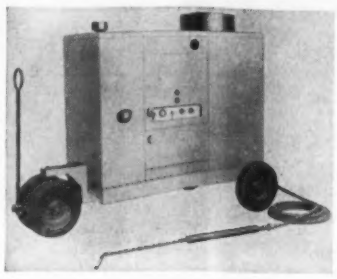
STEAM-HYDRAULIC CLEANER has 11 different cleaning actions



Proper combinations of heat, pressure, and cleaning compound are supplied by the 3500 Series Hypressure Jenny steam - hydraulic cleaner. It offers an instant choice of eleven different cleaning actions by movement of a single lever. The 360-gph capacity pump delivers only the amount required. Outlet pressures and temperatures are variable up to 300 psi and 325° F. Trailer mounted, shop portable, or stationary models with choice of oil or gas for fuel are available. Operation requires connection to a water line and to 115-230 v electrical source. Made by **Homestead Valve Mfg. Co.**, Hypressure Jenny Div., Coraopolis, Pa.

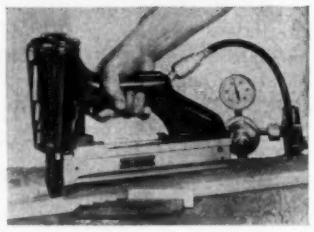
AIR-POWERED BRAD GUN drives 1 and 1½-in. cohered brads



Safety yoke which prevents firing except into the material being worked on is a feature of the Duo-Fast air-powered brad gun. The woodworking tool operates on 8 to 40-psi air lines, depending on the job to be done. It drives 1 and 1¼-in. Duo-Fast cohered brads into hard materials at pressures as low as 50 lb. Made principally of magnesium, the 5-lb, front-end loaded gun holds 100 brads. The safety yoke also serves as an automatic trip for rapid-fire operation. A model for driving FHA-approved staples will be available soon. Made by **Fastener Corp.**, 3702 River Rd., Franklin Park, Ill.

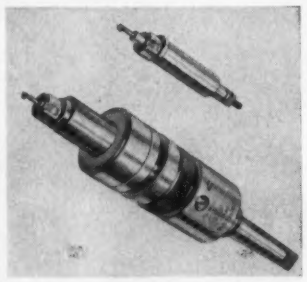
TUNED FREQUENCY CONVEYOR feed rate variable from 0 to 40 fpm

Any material can be conveyed at a feed rate infinitely variable from 0 to 40 fpm by this non-jamming, stallproof tuned frequency conveyor. Sand rating, for example, is upwards of 10 tons per hour with power consumption of less than 200 w. Units have trough widths from 4 to 12 in. and single section lengths from 2 ft. They are designed for 115, 230, or 440-v, 60-cycle power sources in either type 1 or 12 enclosures. Special troughs are offered for screening, segregation, mixing, distribution to multiple points, live storage, orienting, sorting, and even inspection. Trough coatings can be applied to eliminate metal contact. Made by **Campbell Machines Co.**, 18634 Fitzpatrick, Detroit 28, Mich.

▲ For more details circle NED-630 M8 on enclosed inquiry slip ▲

AUTOMATIC RECESSING TOOL design prevents binding, chattering



Eight adapters for use with the improved Seibert automatic recessing tool accommodate ¼, 5/16, ⅜, and ½-in. cutting tool shanks. Two cam follower pins located 180 deg apart prevent binding, provide chatter - free operation, and maintain concentricity. Four adapters hold the cutting tool on center and four hold it below the part centerline. Inside shell of the holder rotates in an eccentric hole, giving the tool a radial motion when entering the part. Depth of recess is controlled by a knurled ring with 0.001-in. graduations. Any depth can be obtained up to 0.100 in. on either side. The quick-change adapter presets the cutting tool to the proper depth in the hole. The holder can be ordered with almost any type of taper or straight shank. Grooving, thread-recessing, and back-chamfering tools to fit this holder are stocked. Made by **Seibert & Sons, Inc.**, Chenoa, Ill.

Rotary piston filler spurts aerosol filling 50%

Fast fill without spill. This packaging plant fills 20,000 to 40,000 aerosol cans in an 8 hr. day with its Pfaudler piston filler—an increase of 50% over previous methods. Accuracy is held to one or two grams on seven- and twelve-ounce cans.

Fast cleaning. In one half-hour one man can clean the filler thoroughly. He removes only two parts at each station.

Easy maintenance. Routine cleaning and lubrication are about the only maintenance.

Just right for heavy products. These fillers are particularly well suited to filling viscous products like tooth paste, shaving cream, etc.

Send for Bulletin 911 for information on the complete line of Pfaudler rotary piston fillers.

Don't scrap it . . . until we see it!

This low-cost lamp reconditioning process saves users up to $150

Burned-out quartz mercury vapor lamps can be economically restored to original operating efficiency. The Nu-Life process can get extra mileage out of practically any lamp. Necessary elements are replaced, the entire unit overhauled and the lamp job-proven in our testing laboratory. Lamps are returned to you within ten days — quality tested, liberally guaranteed and ready for immediate service with fine printing definition. Investigate this performance-proven quality service now!

Write for details or ask for a Nu-Life installation in your area for a first-hand report.

"Live" ROLLER TOP ON Weld-Bilt LIFT TABLE

SPEEDS SHEET METAL PRODUCTION

Load this Weld-Bilt Hydraulic Lift Table with two or four stacks of sheet steel, move it up to your press or brake. Then as your operator uses one stack, he just turns the hand crank, and the next stack moves to machine position — and you load another stack into position. Platform can be raised a fraction-of-an-inch at a time so that each sheet can be slid onto the press — no manual lifting. Lift is controlled by two-way foot pedal.

This Weld-Bilt "Live" Roller Lift Table is available in varying sizes and capacities to suit your needs. Just write, outlining your specific need. We'll be glad to suggest a profitable Weld-Bilt engineered adaptation that will save you production time and labor.

Cut drying TIME and COSTS with PYREX® Radiant Heaters

- area source provides uniform heat
- long waves absorbed faster than those from lamps or sheathed units
- accurate temperature control
- mount vertically, horizontally, banked, staggered, or diagonally
- squares, or rectangles —4 sizes

Core of this heater is a tempered *glass* panel coated with an electrical conducting film. Heater comes to you COMPLETE—panel mounted in aluminized steel frame, built-in aluminized steel reflector, mounting hangers, junction box and leads. Here's the answer to putting the *heat* on and getting the most for your money, time and space.

All the facts about PYREX brand industrial radiant heaters summed up in PE-60. Write for your free copy, and the name of distributor in your area.

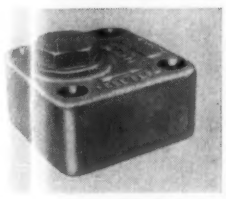
HYDRAULIC CHECK VALVES
for use in systems to 5000 psi



Both subplate mounted and sandwich types of check valves are available for operation in hydraulic systems up to 5000 psi. Their principal function is to block oil flow in one direction, yet allow free flow in the reverse direction. Both types are made in 3/4 and 1 1/4 in. sizes. Subplate type meets JIC standards and is offered with or without the matching subplate. Smaller subplate valve has either 3/4-in. pipe tap or UNF connection. Sandwich type unit can be added to a hydraulic circuit without adding or breaking pipe connections. It is designed to fit between any Denison subplate mounted sequence valve in 3/4 and 1 1/4-in. sizes and the subplate itself. Capacity of 3/4-in. valve is 20 gpm and for the 1 1/4-in. valve, 65 gpm. Made by **American Brake Shoe Co.**, Denison Engineering Div., 1160 Dublin Rd., Columbus 16, Ohio.

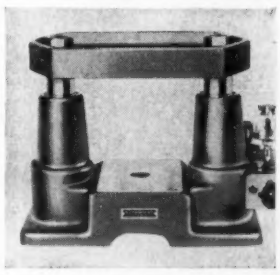
AIR JIGS
in up and down clamping types



Line of air-operated jigs comprises four types, two of which clamp downward by lowering the top plate, and two which clamp the part upward to the stationary top plate. Jigs are compact, operate noiselessly, and afford controlled plunger speed. They operate on 80-psi pressure and feature a floating action. Seals on the plunger keep dirt and chips out of the moving parts. Type OA clamp-down jig shown has both a standard and high rise to accommodate a variety of parts. Made by **Cleveland Universal Jig Co.**, 13404 St. Clair Ave., Cleveland 10, Ohio.

New Efficiency

The sensational new FLEX-A-PRENE Paint Mask keeps out paint pigments and solvents with amazing efficiency, yet it's light (just 1 ounce), comfortable and so easy to talk and breathe through you hardly know you're wearing it.

New Economy

FLEX-A-PRENE's low first cost is only part of the story. Most important savings come from its endurance in service and time saved through less frequent filter replacements. You can expect at least 100 hours of exposure before filter replacement is necessary.

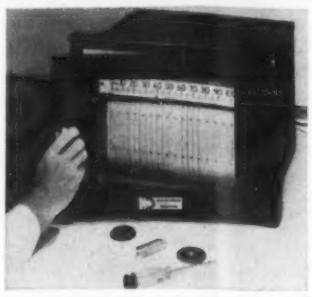
RECORDING POTENTIOMETER
measures 2 to 24 variables



Simple plug-in adapter units contained in a kit of change - over parts enable the Model 6702 multipoint recording potentiometer to measure from 2 to 24 variables. It will measure voltage, frequency, temperature, pressure, pH, or any other input from thermocouples or transducers. Instrument is also easily changed into a pen-dragging type for single-point recording. It mounts on standard 19-in. relay rack and is available for panel or wall mounting. Made by **Daystrom Inc.**, Weston Instruments Div., Newark 12, N. J.

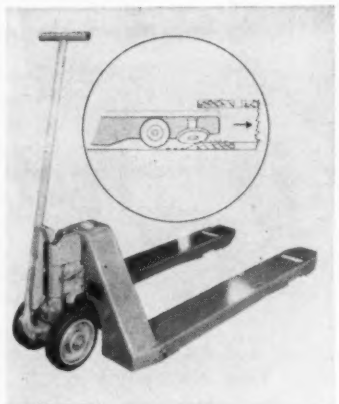
PALLET LIFT TRUCKS
inclinable disc aids fork entry



Entry of pallet lift truck forks into the pallet is made easier with the "flying saucer," an angled disc which inclines to ease the fork over the bottom pallet board. The disc replaces the conventional roller wheels on the end of the truck forks. The inclined plane principle gives the effect of adding 3 in. of roller diameter. Disc feature is standard on Model HX 2000, 2500, and 3000-lb capacity trucks and on Model NX 4000-lb capacity units. It is also available on the improved Palletox Model PXG battery-powered low-lift pallet truck in 4000 and 6000-lb capacities. Made by **Barrett-Cravens Co.**, 628 Dundee Rd., Northbrook, Ill.

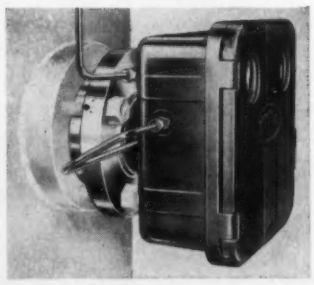
LEVEL CONTROLLER
for corrosive or heavy liquids



Hard - to - handle corrosive and heavy liquids served by the Type 115 floatless level controller come into contact only with the diaphragm and diaphragm ring. Design eliminates the danger of corrosion or clogging. The instrument transmits a pneumatic output signal which is equal in magnitude to the head pressure resulting from the liquid in the vessel. Major uses are on vented or open tank service for liquid level indication, recording, and control. When used for recording and control, a controller is required to convert the transmitted output into a standard pneumatic signal for the recorder and control valve. Made by **Fisher Governor Co.**, Marshalltown, Iowa.

with a
DI-ACRO ROD PARTER

Make several thousand burr-free cuts per hour in bar stock

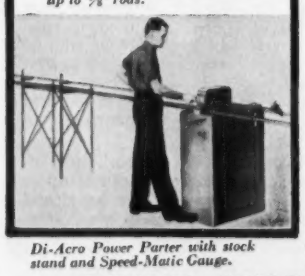
Combination shearing-breaking action parts bar stock without burring and minimum distortion. Handles up to 5/8" round bar stock—square, rectangular, and hex shaped bar stock can be parted when machine is equipped with special die heads.

Material range is from hot rolled bar stock to stainless steel and other high alloy materials. The harder the material is the better it parts.

Long lasting die heads can be reversed before resharpening—can be sharpened many times. Standard cutting heads in No. 2 and power models have 10 graduated holes from 1/16" to 5/8"; No. 1 Model has eleven holes. Optional die heads for parting scaly hot rolled bar stock *at no extra charge.*

Speed-Matic Gauge, an accessory on power model, enables machine to part off several thousand short pieces an hour. *Send us samples for test cutting or consult the Yellow Pages of your phone book under Machinery—Machine Tools for the nearest Di-Acro distributor.*

Hand operated model also handles up to 5/8" rods.



Di-Acro Power Parter with stock stand and Speed-Matic Gauge.

This 1/2" stainless steel bar stock has been "parted" in a Di-Acro Rod Parter. Shiny edges show where rod was sheared, then fractured or "parted off." Will clear hole its own diameter.

INDICATING FLOWMETERS for high pressure applications

Vane in the flow chamber and the indicating scale pointer are coupled magnetically in the Series L line of indicating flowmeters, developed for a pressure range from 60 to 2000 psi. Instrument bodies can be standard ferrous or nonferrous materials, with the vanes usually phosphor bronze or nickel silver. Where required, special alloys can be supplied for body or vane. Meters for scale ranges up to 10 cfm and 20 gpm are available for direct installation into the piping. Shunt type flowmeter assemblies are used for larger flows. When there is a change in the characteristics of the fluid being measured, interchangeable inserts and scales can be provided to permit field changes. Made by **Eclipse Fuel Engineering Co.**, Seico Instruments Div., 1002 Buchanan St., Rockford, Ill.

ULTRASONIC GENERATOR activates 6 sq ft of transducer area or 300 gal of cleaning solution

High volume, conveyorized, and other large, production type ultrasonic cleaning installations can be powered with the Model APT-500 3-kw Sonogen ultrasonic generator. It will activate up to 6 sq ft of transducer area, or 300 gal of cleaning solution. Unit features motor tuning, twin oscillator construction, and remote control. Motor tuning provides easy, reliable frequency adjustment between 36-40 kc. Step-down isolation transformer keeps all control circuitry at a safe 110 v.

Voltage stabilizing transformer in the filament circuit, plate voltage 25 per cent below recommended ratings, simple circuitry, and four heavy-duty air-cooled power triodes are other features contributing to trouble-free operation. Unit is also an economical substitute for manual cleaning at the immersion stage of large-scale washing, degreasing, or plating installations. With twin oscillators, generator can activate two cleaning tanks independently.

Constructed of aluminum to reduce eddy current losses, unit weighs 350 lb and measures 30 x 24 x 70 in. Made by **Branson Ultrasonic Corp.**, 40 Brown House Rd., Stamford, Conn.

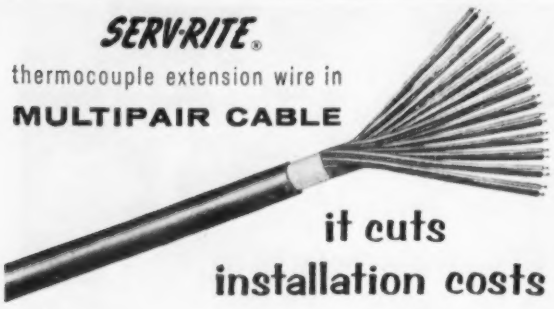
SERV-RITE®
thermocouple extension wire in
MULTIPAIR CABLE



it cuts installation costs

When four or more pairs of thermocouple extension wires are needed, SERV-RITE thermocouple extension cable will reduce installation costs several ways. It takes considerably less time compared to pulling individual pairs of wires through conduit. Also, much smaller conduit can be used than for the same number of individual wires. It can be hung without conduit, or installed in open trough or by direct burial.

The cable, as well as each conductor, is color coded. Also, each pair of wires is clearly marked for quick identification.

Cables with multiple pairs of four or more conductors of the commonly used types are carried in stock.

8278

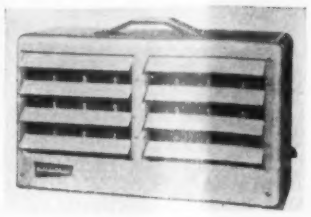
ELECTRIC HEATER
in 17,075 and 34,150 Btu ratings



This C and I model commercial and industrial electric heater combines the heat output of an industrial heater with the styling of a modern domestic unit. The quiet-operating, gray and ivory enamel finished heater is made in 5 and 10-kw ratings with respective outputs of 17,075 and 34,150 Btu. Fan driven heat is directed by adjustable deflectors. A fan delay switch prevents heater from blowing cool air during initial operation. The 5-kw model is portable, or can be suspended on swivel brackets. The 10-kw model is basically two 5-kw units fixed side by side, each retaining its thermostatic control. Setting one thermostat higher than the other places only half the unit into operation. Safety grid heating element and safety switch are featured. Made by **Commercial Controls Corp.**, Electromode Div., 570 Culver Rd., Rochester 3, N. Y.

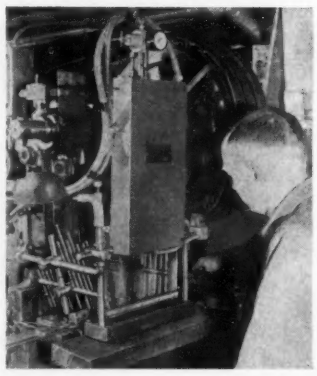
PRESS GUARD
for hand, blanking, automatic work



This universal gate and enclosure guard installed on a press protects the operator from accidents and speeds up production on blanking, secondary or hand feed, and automatic operation work. The guard swings aside for die changes, and an electric interlock prevents the press from being tripped with the gate open. The guard forms a barrier around the die with full vision at front and sides. Upward travel of the gate may be adjusted by shortening the stroke of the air cylinder, actuated by a four-way solenoid valve. Unit can be attached to many types and sizes of presses. Made by **Searjeant Metal Products, Inc.**, 54 Pittsford Rd., Mendon, N. Y.

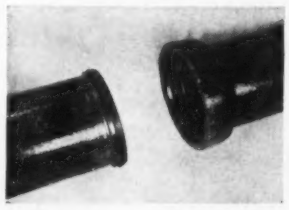
CLAY PIPE JOINT
gasket type effects a permanent seal



Permanent tight coupling of clay pipe sewage and waste drainage lines can be made with the Tex-Vit rubber gasket-type polyester joint. Wet weather installations show that joint can be laid even with water in the trench. Lubricant is first applied to rubber gasket on the spigot end of the pipe. This end is then positioned into the bell or socket of the other pipe and given a slight push. Wedge-shaped, compression-type gasket on the spigot slides over the ribbed section of the bell casting and into a cylindrical recess. Polyester casting in the bell strengthens it against breakage. Joint resists roots and infiltration as well as sewer acids, gasoline, oils, and chemicals. Made by **Texas Vitrified Pipe Co.**, Box 117, Mineral Wells, Tex.

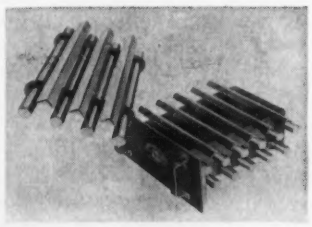
PERMANENT GRID MAGNET
removes ferrites in free-flow goods



Ferrous contamination is removed from grain, chemicals, food, seeds, drugs, and similar free-flowing materials by the Magni-Power permanent grid magnet. It is offered in both single bank or drawer types and is easily adapted to chutes or hoppers of any shape. Structure is of stainless steel. Cleaning is facilitated by pull-out tubes. Special web ends and deflectors are available. (*Editor's note: This item appeared in the August, 1958 issue of NED with the photo inadvertently upside down.*) Made by **Magni-Power Co.**, Wooster, Ohio.

DEPENDABLE MACHINE SUPPORT ... PRECISION LEVELING

get both with...
EMPCO *leveling jacks*

Solid, easily adjustable foundation for machine tools, large surface plates, automation lines, tool room and production equipment of all types. Easily installed, they increase machine efficiency, reduce downtime and maintenance. Combined with Vi-Sorb Mounting pads, Empco Jacks reduce objectionable vibration to a minimum, retard creepage, often eliminate the need for anchor bolts. Built to take it, Vi-Sorb pads stand up under repeated impact . . . resist oils, greases, acids. Jacks available in 6 styles, 25 models. Pads to fit.

A CONVERTIBLE PIPE CUTTER

REED

● Quick, easy change-over transforms Roller Cutter into a 4-wheel cutter for ditch and other close-area work. These new Reed cutters—whether in Roller, 3-wheel or 4-wheel models — are the world's easiest, cleanest cutting tools in their size ranges. Roller model has cutting wheel in block where it remains for full sight lining up with cut-off mark. Operating with easy, ratchet-like action through one-fourth of a revolution, Reed 4-wheel model is best for close quarters work. In three capacities for pipe sizes from ⅛" to 3". Razor Blade wheels by Reed leave minimum burr, cut easier.

New Signode power strap feeder puts strapping around big packages fast!

With this new power strap feeder, one man quickly straps big packages without a helper and without walking around the package. The PSF-1 applies 200 or more straps per hour, cuts strapping labor costs in half.

Here's the machine to use on big packages or bundles along with any Signode seal feed tool—hand, pneumatic, or electric—mounted in a tool balancer. Cost is modest; rental at nominal charge available.

New free literature sent promptly. For a demonstration, call the Signode man near you, or write:

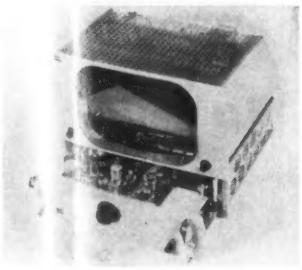
CLOSED CIRCUIT TV SYSTEM has automatic light adjustment



With its built-in automatic light control, the Model 1986 closed circuit TV system will adjust instantly to variations in light level of up to 1000:1. The Model 1986C camera, used with a 1986ACU camera control unit, provides up to 1-v output at 10 ft-c, with full 600-line resolution and zero degradation. Model DRM-14R monitor has a 14-in. aluminized picture tube, with exceptional brightness assured by the use of a Polaroid filter and a second anode voltage of 16,000 v. Bandwidth of the video amplifiers is 8 megacycles, ±0.5 db. Made by **Cohu Electronics, Inc.**, Kin Tel Div., 5725 Kearny Villa Rd., San Diego 12, Calif.

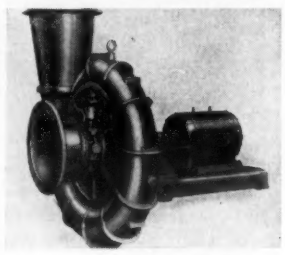
CENTRIFUGAL COMPRESSORS sizes range from 1200 to 80,000 cfm



Line of single-stage centrifugal compressors for refinery and petrochemical applications includes Type OM unit for air service at low discharge pressures and Type OPB units for gas and air applications at higher discharge pressures. Sizes cover a 1200 to 80,000 cfm range with input horsepowers from 10 to 2500 hp. Essentially constant-pressure variable-volume machines, compressors can be used for blower service where inlet conditions are atmospheric; for exhauster service where inlet conditions are below atmospheric pressure; or for booster service where inlet conditions are above atmospheric pressure. Features include overhung rotors, single shaft seal design, and open or closed type impellers. Made by **Clark Bros. Co.**, Olean, N. Y.

AIR GAGE checks ID, OD, center distances

Accurate measurement to a millionth of an inch is possible with the easy-to-use Model AG air gage. It can be used to check inside or outside diameters or dimensions and center distances of holes, regardless of hole size, and to check roundness and blind holes on small parts. Dial of the high linearity, zero hysteresis meter has large graduations for easy reading. An electric recording unit may be added which will permanently register readings on sensitized paper. Once the zero setting is made by master or proper size blocks, a three-point contact enables the user to detect a three, five, or seven-lobe condition in centerless grinding. Made by **B. C. Ames Co.**, 99 Lexington Ave., Waltham, Mass.

IRON POWDER BEARINGS for light machinery uses

Comprised chiefly of iron powders, Oilite 212 powder metal sleeve bearings afford considerable cost savings in applications where corrosion is not a problem and mechanical strength requirements are within tolerable limits. Used in appliances, flip motors, power tools, light machinery, instruments, and light vehicles, bearings are especially suitable for oscillating and reciprocating motions. Units have about 20 per cent by volume oil content for lifetime self lubrication, ultimate tensile strength of 10,000 psi and compressive yield point of 9500 psi. Bearings will stand high temperatures and can be used at fairly high speeds. Made by **Chrysler Corp.**, Amplex Div., Box 2718, Detroit 31, Mich.

the Answer

. . . to your small parts Handling-Storage-Transport

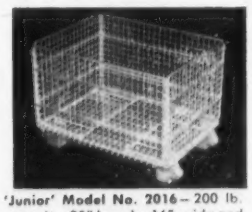
the NEW PALLETAINER 'Junior'

- **Close-mesh, all-steel containers with fold-down features**
- **Ideal for *all* small parts handling—storage—transport**

• The new lightweight Palletainer 'Junior' models are sturdy, close-meshed, all-steel containers designed for efficient handling, storage, protection and safe transit of any small parts—assembled or finished products. Ruggedly built of reinforced welded steel wire mesh, the 'Juniors' incorporate many of the outstanding construction and convenience features found only on large, heavy-duty containers.

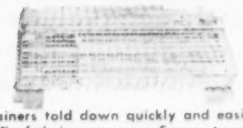
Check your plant today—see how many places the 'Junior' models could smooth production, speed processing, deliveries and save valuable handling time.

'Junior' Model No. 3220—500 lb. capacity. All welded steel wire mesh, reinforced. 32" long by 20" wide and 16" high. Mesh openings are 1⅛" square. Equipped with 4 fabricated steel stacking legs welded to deck bottom. Finished in fire-baked Aluminum paint. Weight 38 lbs.



'Junior' Model No. 2016—200 lb. capacity. 20" long by 16" wide and 12" high. All welded steel wire mesh. 1⅛" square mesh openings. Four fabricated steel stacking legs. Lossproof side locks. Aluminum painted. Weight 25 lbs.

If you handle or process small parts . . . you need Palletainer 'Juniors'!



'Junior' Palletainers fold down quickly and easily to save over 75% of their open area. Saves storage space, makes handling easier and lowers return shipping costs.

Try these tested, proved-in-service containers for all types of parts handling. They'll actually pay for themselves in handling savings. Write today for complete information, prices and delivery dates.

Palletainers are manufactured exclusively by

UNION STEEL PRODUCTS CO.
505 N. Berrien St., Albion, Michigan

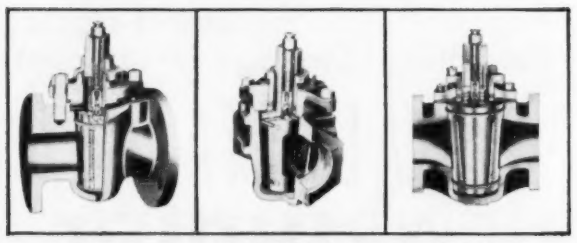
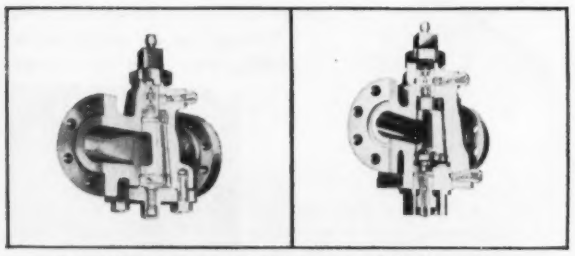
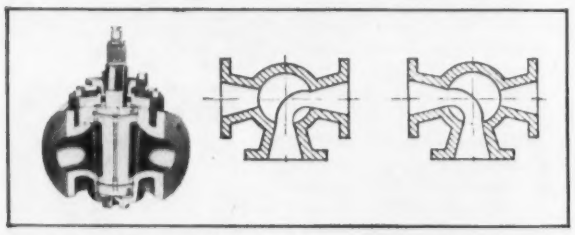
What are your valve needs?
SPECIFY FROM
ROCKWELL-NORDSTROM'S
COMPLETE VALVE LINE



For working pressures from 175-lb to 800-lb, Rockwell-Nordstrom valves are available in semi-steel and corrosion resisting alloys in sizes from 1" to 24".



For working pressure to 10,000-lb, Rockwell-Nordstrom Hypreseal valves are available in steel and corrosion resisting metals in sizes to 30". Operated by wrench, gear or power actuators.



Rockwell-Nordstrom Multiport valves permit three and even four way control with one valve . . . ideal for batching, blending or relief service. See diagrams for a few of the possible flow arrangements.

Rockwell-Nordstrom is the world's most complete line of lubricated plug valves, plug valve lubricants and operating accessories. Whatever your needs, you'll get better flow control at far lower cost when you specify from the Rockwell-Nordstrom line.

MERCURY BATTERY PACKS
used as secondary voltage standards

Series of mercury battery packs, used as low-cost secondary voltage standards, will supply precise constant voltage to measuring circuits with resistive transducers, analog computers used as a reference source, or for calibration of lab and field instruments. Direct voltmeter or V.T.V.M. readings can be made. Packs of any desired voltage can be made up from combinations of basic cells. Each cell has nominal open circuit voltage of 1.357 v, $\pm 1/2$ per cent. Voltage declines by only 1 per cent in 2 years of storage at 70° F. On short run missile flight and atmospheric sounding tests, regulation of one part in 10,000 can be obtained. Voltage remains stable within 1 per cent over a −40 to 160° F range. Made by **Mallory Battery Co.**, 60 Elm St., North Tarrytown, N. Y.

AUTOMATIC TANK DRAIN
electronic unit for air compressors

Automatic removal of accumulated water from air compressor tanks is provided by this electronic tank drain, a $2\frac{3}{8}$ x $2\frac{3}{8}$ x $8\frac{1}{4}$-in. unit mounted on or near the compressor. With each cycle of the compressor the electronic tank drain is momentarily energized for a rapid purge of the accumulated water. After a 2 to 3 sec blow-down, it closes and resets for the next cycle. It is available for operation on 115, 230, or 440 v. Made by **Squire-Cogswell Co.**, 4151 N. Kedzie Ave., Chicago 18, Ill.

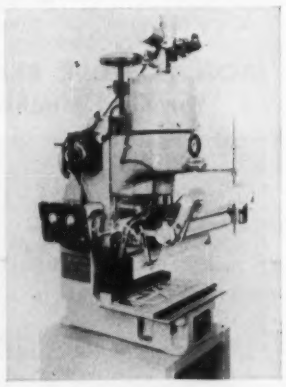
HOT STAMPING HEAD
increases marking press stamp area



Offered optionally on new presses, this supplemental hot stamping head is also available to extend the capacity of the standard Model 250H Acroleaf marking press. It provides an increased stamping area of up to 12-in. length by $2\frac{1}{2}$-in. width. The increased length adapts press to hot stamping in gold, silver, or any color on book covers, signs, rollers, nameplates, instruction plates, scales, instruction charts, and calibrated parts. Machine provides $9\frac{1}{2}$ in. adjustment underneath the die and has throat depth of 8 in. Maximum stroke is 4 in. Press delivers 4800-lb marking pressure on 100-psi air. The head, complete with automatic adjustable foil advance for roll leaf up to 13 in. wide, scrap foil rewind, and other conversion accessories, is priced at $658. Made by **Acromark Co.**, 7-11 Morrell St., Elizabeth 4, N. J.

MICRO SWITCH Precision Switches

NEW

"EX1" SERIES

UL listed explosion-proof switches

Series "EX1" switches have a conduit opening at both ends of the housing. This permits through wiring, which saves costs and space and makes a neat installation. Housings have ample room for wiring, and have tapped holes in top, back and bottom for easy mounting.

These switches are available with four types of basic switches with electrical capacities of from 10 to 20 amps., and a choice of contact arrangements. Listed by Underwriters' Laboratories for use in hazardous atmospheres of Class I, Group C (ethyl ether vapor, ethylene, or cyclopropane) and Group D (gasoline, hexane, naphtha, alcohols, acetone, lacquer solvent vapors, and natural gas); Class II, Group E (metal dust, including aluminum, magnesium and their commercial alloys), Group F (carbon black, coal or coke dust), and Group G (flour, starch, or grain dust).

For additional information, ask for Catalog 83, or call the MICRO SWITCH branch office near you. Consult the Yellow Pages.

- ☐ No. 1 PRINTER cut curbside unloading 5 hours to 1 hour.
- ☐ No. 2 WHOLESALE GROCER gained 11,000 square feet usable storage space.
- ☐ No. 3 REFRIGERATED WAREHOUSE saved $4,840 annually in labor and storage area.
- ☐ No. 4 METAL WORKING FIRM increased productivity 5%.
- ☐ No. 5 WHOLESALE GROCER gained added storage space — increased number of items 25%.
- ☐ No. 6 SEED COMPANY cut handling costs 50%, increased storage capacity.
- ☐ No. 7 MILLWORK DISTRIBUTORS speeded up box car unloading, saved $15,000 labor costs.
- ☐ No. 8 DAIRY PRODUCTS MFGR. saved $140 per week in labor costs.
- ☐ No. 9 WHOLESALE GROCER returned 280% on investment of Raymond Walkie.
- ☐ No. 10 METAL STAMPING PLANT eased die handling labor, freed man for other duties.
- ☐ No. 11 FARM IMPLEMENT MFGR. gained $200,000 worth of added storage space, returning 800% on investment.
- ☐ No. 12 CHEESE PROCESSOR handles four times as much cheese with half the original warehouse crew.
- ☐ No. 13 STORAGE BATTERY MFGR. raised production efficiency, improved working conditions.
- ☐ No. 14 METAL STAMPING FIRM increased storage capacity 300%; reduced handling operations.
- ☐ No. 15 METAL STAMPING FIRM eliminated manual die handling; investment was returned in 12 months.
- ☐ No. 16 ALUMINUM FOUNDRY moves more tonnage in shorter period of time.
- ☐ No. 17 GENERAL WAREHOUSE utilized maximum storage space; simplified inventory count.
- ☐ No. 18 FROZEN FOOD MFGR. gained 6,000 cubic feet storage. Saved 60c per cubic foot.
- ☐ No. 19 SHOE MANUFACTURER saved $72 in labor per box car for unloading hides.
- ☐ No. 20 DRUG WAREHOUSE increased daily tonnage handling 50% with same receiving crew.

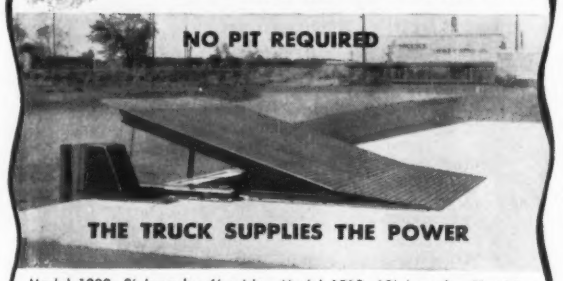
NOW! SOLVE THAT LOW DOCK PROBLEM Economically

NEW HI-LO AUTOMATIC DOCKBOARD



Model 1208; 8' long by 6' wide. Model 1210; 10' long by 6' wide.

SAVES TIME — Backing truck automatically adjusts long, wide ramp surface . . . speeds loading. Does away with labor-wasting placement and storage of loose plates.

SAVES EXPENSE — The HI-LO is simply lagged to top of present dock. Can't be lost, stolen, or damaged. Simple counterbalance system. No hydraulics, motors, or controls.

IMPROVES SAFETY — No more loose plate hazards. No lifting or straining. The HI-LO is a permanent part of the dock . . . cannot slip out of position.

"Making better products . . . to make your products better"

In Norton mounted wheels, outstanding developments eliminate loading and glazing, assuring best results.

In tool and die grinding, mounted wheels with sharp 32 ALUNDUM* abrasive and VBE bond are the very best.

In rough grinding, *steel castings and weldments,* mounted wheels of tough 44 ALUNDUM abrasive and VBE bond, metal-mounted, are unequalled. *For snagging cast iron,* wheels of sharp 32 ALUNDUM abrasive and VBE bond, metal-mounted, outperform silicon carbide wheels.

Metal-mounting, locking the abrasive body to the mandrel means you throw nothing away but the mandrel! See your Norton Distributor for prompt deliveries.

✓ DEBURRING
✓ CHAMFERING
✓ FACING, POINTING

Here is the machine that eliminates the need for tying up expensive lathes and screw machines for deburring rods and tubes, and it profitably replaces such costly methods as hand rolling pieces against a sanding belt or holding them against a rotating brush. The Pines End-Finishing Machine is *fast* and *accurate.* It squares the end, removes all the burr from the inside, and makes a uniform, accurate chamfer on the outside. Women operators commonly deburr up to 800 1-inch tubes per hour. It clamps, feeds, finishes in one motion — leaves one hand free for stock handling. Machine illustrated handles stock up to 2" O.D. Automatic air-clamping units and models for stock up to 5" also available.

FREE BULLETIN
Find out how these machines save space and cut costs on wide range of work.

HERE'S WHY: You can order in quantity, in a wide variety of sizes—and be certain of uniformity. Strict density control assures non-porous Teflon—free from any flaws that might affect end use or product. Dimensions are accurate—no rejects, waste of material, loss of time. You get product purity—Teflon at its best in every characteristic. Delivery is prompt—the quantity you want when you want it.

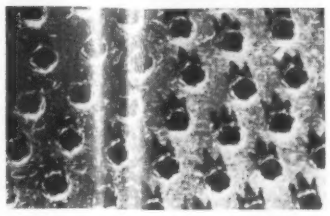
New Processes and Materials

FLEXIBLE STEEL ABRASIVE now offered in 9-in. width



Dragon-Skin flexible steel sandpaper is now available in a 9-in width in rolls up to 1600 ft long. The new width is in addition to the 4¼-in. width released originally. Comparable to medium grade conventional sandpaper, Dragon-Skin reportedly outcuts by five-to-one and outlasts by ten-to-one ordinary sandpaper products. It is made by punching 0.036-in. diameter holes, 150 per square inch, in 0.004 in. thick steel sheet, creating a uniform wave of five-sided burrs. Product can be used to rasp, sand, and smooth hard and soft woods, plaster, plastics, and soft metals. Made by **Red Devil Tools**, Box 355, Union, N. J.

thanks to automatic xerography

. . . a revolutionary, new system *for the high-quality, low-cost, rapid reproduction of engineering drawings*

BENEFITS

- Quality superior to that of any other type of engineering drawing reproduction
- Substantial savings, up to $500,000 a year
- Storage space reduced up to 95%
- No sensitized paper required
- Time between request and print dramatically shortened
- Reduced-size prints make handling easier, slash material costs, cut postage

A spectacular breakthrough . . . as revolutionary as the invention of movable type and the printing press . . . has become a reality because of the development of the XeroX® Copyflo® 24 continuous printer.

This ingenious machine . . . caricatured above by Artzybasheff and operated automatically by xerography . . . now provides the full benefits of a unitized microfilm system, the modern approach to low-cost, high-quality reproduction of engineering drawings.

Original drawings are copied onto microfilm, and individual frames mounted in data processing cards. Insertion of the cards into the Copyflo printer automatically produces dry, positive prints (or offset paper masters) ready for immediate use. A 24" x 36" print every 10 seconds!

Where the reproduction of hundreds . . . or thousands . . . of *different* engineering drawings is needed daily, look to automatic xerography and unitized microfilm.

WRITE today for Booklet X-287 detailing the many advantages.

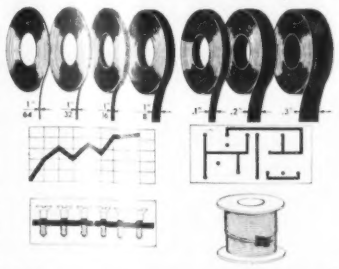
New Processes & Materials

NARROW-SLIT TAPES
in rolls as narrow as 1/64 in.

Vinyl, Mylar, and acetate plastic; aluminum foil; paper; glass; and cotton cloth are among the many materials available in handy pressure-sensitive roll tape form. Tapes can be slit as narrow as 1/64 in. with tolerance of ±0.005. They are used in sealing and wrapping many core, roll, and spool wound products; in printed circuit layouts; small wire and terminal marking; holding small parts together; and marking maps and charts. More than 20 different tapes are available, many in colors for coding and marking. Made by **W. H. Brady Co.**, Dept. NED, 727 W. Glendale Ave., Milwaukee 9, Wis.



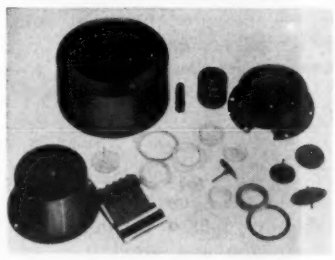
▲ For more details circle NED-733 M8 on enclosed inquiry slip ▲

TEFLON HOSE
offered in diameters to 3 in.

Larger volumes of chemicals, acids, and other active solutions can be handled safely now that Teflon hose is available in diameters up to 3 in. Previous limit was 1¼ in. because of the material's surface characteristics and manufacturing problems. The Flexlon hose can be made with the Hydro-lok flange which avoids the use of metal couplings. Able to withstand heat up to 325° F (depending on size and construction), and possessing a smooth surface, it can be sterilized to permit handling food products. Caking solutions are handled efficiently since nothing adheres to the Teflon tube. It resists most known chemicals. Made by **Raybestos-Manhattan, Inc.**, Manhattan Rubber Div., 61 Willet St., Passaic, N. J.

▲ For more details circle NED-734 M8 on enclosed inquiry slip ▲

SILICONE RUBBER PARTS
molded to close tolerances to order



Precision parts formulated of silicone rubber feature resistance to fuels, oils, solvents, moisture, ozone, and weathering. They also have long shelf life without deterioration and retain flexibility in temperature extremes of −130 to 500° F. Parts are molded to tolerances as close as ±0.002 in. on a thickness of 0.007 in. Assistance is provided in developing parts to meet a wide range of design problems. Made by **Sierra Engineering Co.**, 123 E. Montecito Ave., Sierra Madre, Calif.

STEEL FRAMING ANGLE
slot and hole pattern facilitates assembly into racks, tables, carts

A recurring precision pattern of slots and holes facilitates assembly of AIM Brand slotted framing angle into a variety of structures. This cold-rolled galvanized steel angle is packaged in 10 and 12-ft lengths, 10 lengths to the package, with 75 structural bolts and nuts. Each ⅜-in. bolt rated 2000 lb safe-load capacity. Friction-type joints are made by bolting through vertical and horizontal slots, whereas rigid, lock-joints are formed by bolting through the round holes.

Angle is stamped every in. along both flanges with cutting marks to simplify measuring. Standard 225-80 angle measures 2¼ x 1½ x 0.080 in.; heavy-duty 300-104 measures 3 x 1½ x 0.104 in. Accessories include steel panels for shelving or table tops, channels for shelving assembly, and casters for cart or bin structures. Made by **Acme Steel Co.**, 135th Street & Perry Avenue, Chicago 27, Ill.

▲ For more details circle NED-736 M8 on enclosed inquiry slip ▲

Ro-Flo COMPRESSORS
Peak efficiency at all times

An automatic compensating feature in *Ro-Flo* design offsets any wear on rotor blades, insuring constant efficiency. Blades move in and out of longitudinal slots. Centrifugal force keeps them in constant contact against cylinder.

RATINGS — *Twelve* sizes of two-stage *Ro-Flo* compressors from 250 to 1800 cfm at pressures 60 to 125 pounds gauge. *Twenty* different single-stage units handle pressures to 50 pounds gauge and from approximately 50 to 3200 cfm.

For complete information ask for Bulletin 16B8244. Call your nearby A-C office or write Allis-Chalmers, Industrial Equipment Division, Milwaukee 1, Wisconsin.

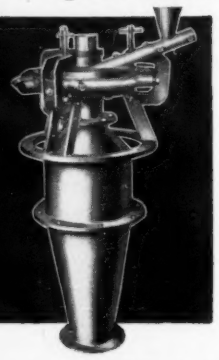
MICRON-GRINDING speeded!

STURTEVANT MICRONIZER* GRINDING MACHINES REDUCE PARTICLES TO MICRON SIZES AT RATES FROM ½ LB. TO 3000 LBS. PER HOUR . . . WITH NO ATTRITIONAL HEAT



NO MOVING PARTS! Particles grind each other. High speed rotation and violent impact are caused by jets of compressed air or steam. Centrifugal force keeps over-sized particles in grinding zone. Cyclone action in central section classifies and collects fines for bagging.

EASY TO CLEAN AND MAINTAIN! All seven sizes of Sturtevant Micronizer* Grinding Machines are constructed for instant accessibility (typified by the "OPEN-DOOR" design in other Sturtevant equipment).

Now... MORE ball bearing types and a bright, new package

Hoover is widely known as a leading producer of open, shielded and sealed types of deep-groove ball bearings, double row bearings and water pump bearings. These Hoover products have earned a long standing reputation for quality.

Now, three new series are added to the Hoover line: 1) pillow block bearings and companion flange bearings; 2) 3L00 extra light bearings for maximum shaft and minimum housing dimensions; 3) "Super Max" bearings for maximum capacity applications.

All these new bearings meet Hoover's high quality standards. All are made with smooth *Hoover Honed* raceways and *Micro-Velvet* balls, accurate within millionths of an inch. All are designed for superior performance and long life.

New, too, is the distinctive blue and yellow package, designed to help you recognize Hoover bearings quickly and to remind you that they are *tops in quality*.

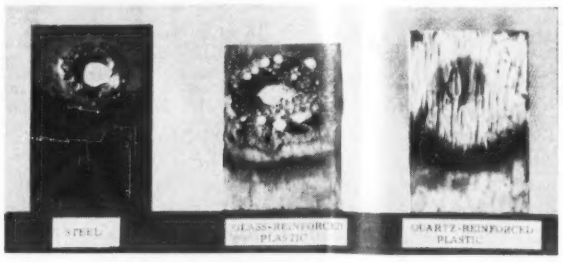
New Processes & Materials

QUARTZ THREAD when woven into cloth forms exceptional heat barrier

Gossamer-thin, continuous monofilaments of fiber made from pure quartz and twisted into thread form a lightweight, extremely heat-resistant material. The thread



can be woven into cloth on textile equipment, and has possible use in reinforcing plastics used in aircraft and missiles. Commercial and industrial applications include filters, thin insulation in flexible or irregular form, safety devices, and heat-resistant plastic structural forms.

Cloth has the basic properties of glass fabric with the high heat resistance of quartz and good tensile strength at elevated temperatures. Fibers are available in short lengths, or as continuous thread. Photo shows test results of equally thick panels of steel, glass-reinforced plastic, and quartz-reinforced plastic when submitted to 5000° F torch flame for 40 sec. The quartz-reinforced plastic withstood the flame and retained its structural strength. Developed by **General Electric Co.**, Lamp Div., Nela Park, Cleveland 12, Ohio.

▲ For more details circle NED-758 M8 on enclosed inquiry slip ▲

ANTIFRICTION LUBRICANTS have no melting or dropping point

Constant protection to roller, ball, and sleeve bearings and sliding surfaces in hot bearing applications, or in high ambient heat areas is provided by two antifriction lubricants. Compositions have no melting or dropping point, are moisture resistant, have high chemical stability and metal adherence properties, will not wash out, and have temperature reducing qualities as well as high extreme pressure values. Light density composition No. 1 is recommended for high speed, high heat uses, whereas heavier composition No. 2 is for low speed, high heat application, or loosely-fitted bearings. Both are offered in 14½-oz cartridges for use in lever-type cartridge guns and in bulk. A sample cartridge is available free. Made by **Whitmore Mfg. Co.**, 3816 Iron Court, Cleveland 4, Ohio.

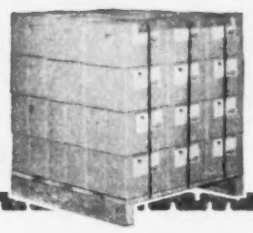
SOUTHERN'S PALLETIZED SCREWS CUT YOUR COSTS!



Southern's advanced design palletized bulk system is based on proven engineering principles that individually or combined can save time, production and storage, regardless of the size of your operation:

1. A wire-bound telescopic-type 9 x 9 x 6½" corrugated container of heavy-duty 275# test, provides industry-accepted units for handling throughout your plant including your production line, where top of carton can "double" as individual bulk container. Adoption of Southern's famous EZ to C® label provides error-proof fastener identification.
2. AT NO EXTRA COST TO YOU Southern's new bulk cartons are prepared for shipment on sturdy 30" x 30" two-way entry pallets, each with four layers of nine cartons each, steel strapped for handling ease and security.

Phone or write for specific data about how Southern's Screws bulk system can be quickly put to work in your operation. Southern Screw Co., P.O. Box 1360, Statesville, N. C.

Ni-Rod "55" Electrodes help give crack-free welds between scrubber's cast iron cones and carbon steel tubes at Aerotec Corp., Greenwich, Conn.

Weld cast iron to carbon steel ...no preheat ...no cracking with Ni-Rod "55" electrode

Joints were cracking up between cast iron cones and carbon steel tubes in these gas scrubbers . . . because electrodes of iron and mild steel gave brittle welds. Weldors switched to Ni-Rod "55"* Electrodes . . . and eliminated weld cracks! And weldors find preheating generally unnecessary.

You can get trouble-free welds between cast iron and mild steel in all your jobs with Ni-Rod "55" Electrode; available from most jobbers.

"Repair Cast Iron Parts Quickly and Easily," handy Inco booklet, is yours for the asking. *Registered trademark

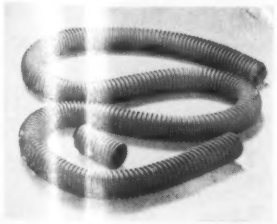
FLEXIBLE NEOPRENE HOSE in 2, 2½, and 3-in. diameters



Extruded in continuous, seamless lengths, this flexible neoprene hose has spiral-ribbed construction which will retain its circular cross section even when subjected to sharp bends. Hose can be crushed without damage and resists deterioration by oxidation, ozone, oils, dilute acids, sunlight, and heat aging. It is used as duct for exhausting fumes, vapors, dust, and mists; for low pressure conveying of powdered materials; or for flexible connections on machinery for handling air or gases. Hose is produced in 2, 2½, and 3-in. diameters and lengths to 11 ft. Connector sections are available. Made by **Burton Mfg. Co.**, Dept. N, Burton, Ohio.

▲ For more details circle NED-783 M8 on enclosed inquiry slip ▲

GENERAL-PURPOSE SOLVENTS quick cleaning types dry rapidly

Grease, grime, and dirt can be removed from motors with KO 9 cleaner and degreaser by submerging them in the cleaner while running. Waterlogged motors that will not start are submerged for 1 hr until water and grease are dispersed, then submerged while running. Also suited for other electrical equipment, this rapid cleaning solvent evaporates rapidly. Large pieces of equipment can be cleaned by the spray method. Also available are KO 3 carburetor, metal parts, and engine cleaner which requires no rinsing and is noncorrosive and rust resistant; KO 12 for removing grease, oil, dirt, and grime from metal, wood, paint, and concrete by tank soaking, brushing, spraying, dipping, or wiping; and KO 13 concentrate (for diluting with water or kerosene) and KO 44 ready-to-use solvent, two general purpose products with many applications. Latter two are rinsed or hosed off with warm or cold water. Made by **KOR Corp.**, 5-Box 485, Gary, Ind.

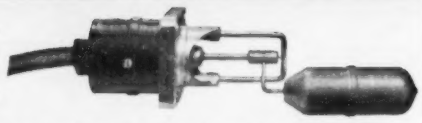
NEW low cost "LOW LEVEL" ALARM or SHUT-OFF SWITCH



Built to withstand shock and vibration of internal combustion engines, heavy highway equipment, air compressors, etc.

Can be used as alarm or shut-off unit for critical low level (or high level) in most any kind of liquid. Built to withstand pressures to 250 p.s.i.—absolutely leakproof.

Switch is magnetically driven by 2 powerful Indox magnets through a solid head forging—leakage is impossible. Switch is double throw, single pole—rated at 15 amps, 125 and 250 volts AC, ½ HP. Available in top and side mounted models.

The RMC Low Level Switch has been thoroughly tested for cycling endurance and vibration resistance—will stand a constant and reliable watch over operating equipment.

WRITE for complete technical and mounting data, or outline your particular requirements.

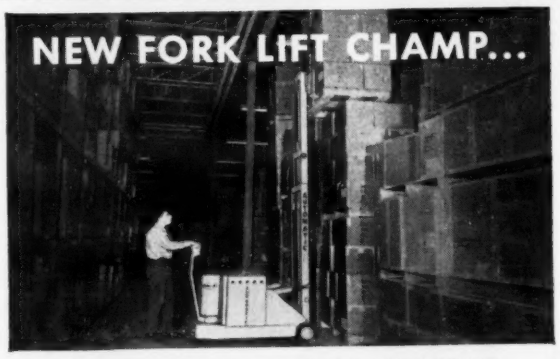
NEW FORK LIFT CHAMP...



Automatic Transporter Stacker Model WST Offers More Advantages Than Any Comparable Truck

INCLUDED ARE...
- Highest lift, 135" with 83" mast.
- Faster lift for speedier stacking.
- Twin-ram tilt prevents racking of mast.
- Short over-all length for easy maneuvering.
- Steering handle can be turned up to 200° for tight turns.
- Light weight permits work in places not safe for heavier trucks.
- Accommodates all standard attachments.
- Heavy duty Class-H Silicone insulated motors available on all models.
- Performs all functions of a rider-type machine yet costs less.
- Capacities (for loads up to 48" long) 1,000 to 4,000 lbs.

Write today for full details including convenient lease and purchase plans.

Here's What To Do About It In Your Plant

Recently, 2,177 major plants were surveyed by a market analyst to discover their No. 1 skin hygiene problem. The overwhelming majority of replies said: SKIN DISEASE.

The reasons for this answer: • skin disease means costly medical treatment • skin disease means prolonged absenteeism • skin disease means worker dissatisfaction and compensation claims.

What can you do in your plant to fight this problem? Call in an SBS skin cleanser representative. Most skin disease troubles can be traced to improper cleaning or use of the wrong cleaners. Your SBS representative is the man most completely equipped to study the situation and offer measures to improve it. He'll check all the conditions in your plant and recommend . . . not just a soap, but a *planned corrective skin hygiene program* for safe skin cleansing. Because Sugar Beet Products produces a *complete range* of cleansers, the SBS man can recommend the *exact ones* for your needs. Many famous firms are protected by SBS skin cleanser programs. Why not write us today? Dept. 58-L6.

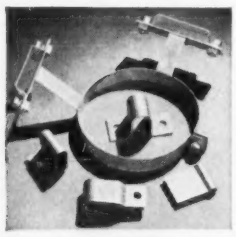
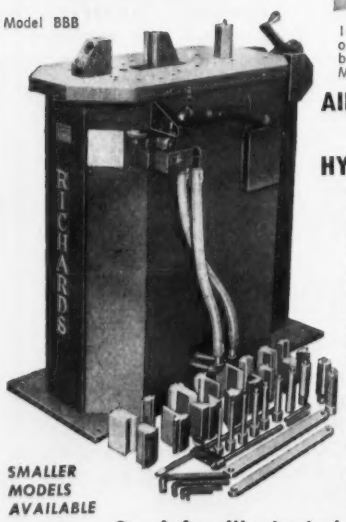
Multiform

BIG BROTHER BENDER



Illustrated above are a few of the many forms that can be produced efficiently on the Multiform Bender.

Model BBB



SMALLER MODELS AVAILABLE

AIR OPERATED MODELS IN FOUR SIZES
HYDRAULIC—3 MODELS

The heavy duty Big Brother Bender is designed for fabricating bus bars, brackets, fixtures, etc., without special tooling. Air controlled with finger tip response. Comes complete with dies, mandrels and wrenches—punching and blanking dies extra. Will punch holes up to 1" and form material up to ¼" thick by 4" wide. We also build smaller models, hand or air operated, for bending materials up to ⅛" x 1½".

New Processes & Materials

CONCRETE PATCH KIT adheres to steel, concrete, wood

Cracked, worn, and pitted concrete floors and surfaces can be effectively repaired with Epocrete, two-part epoxy-based concrete patch material that cures at room temperature with practically no shrinkage. It has greater compressive strength and abrasive resistance than concrete and holds to steel, concrete, and wood with more than 1000-psi adhesion strength. It can be used to reset bricks or support ornamental iron, seal up leaking cracks and joints in any masonry, and to resurface floors, driveways, and worn stair treads. It feathers to a fine edge and resists acids, alkalies, petroleum products, water, salt water, and solvents. One-quart, 4-qt, and 4-gal kits, as well as bulk quantities are available from **H. V. Hardman Co.**, 571 Cortlandt St., Belleville 9, N. J.

For more details circle NED-809 M8 on enclosed inquiry slip

TEFLON ADHESIVES resist water and many chemicals

Two adhesives for cementing bondable Teflon to itself or to other materials are two-component (base and activator) systems. They will bond etched Teflon to wood, steel, glass, aluminum, ceramics, plastics, or any other material that will bond with an adhesive. They can be cured at room temperature or elevated temperatures. Ray-Bond R-86009 adhesive, for applications where bond flexibility is required, has good resistance to water and most chemicals. Ray-Bond R-86044 has very good resistance to acids (except acetic) and various other chemicals, as well as water. Former can be used as a structural adhesive up to 120° F and as a nonstructural adhesive up to 250° F. Similar ratings for latter product are 200 and 250° F, respectively. Made by **Raybestos-Manhattan, Inc.**, Adhesives Dept., Bridgeport 2, Conn.

PAPER LABELING TAPE vinyl coated, resists 275° F

Pressure sensitive Time Tape is a vinyl-coated paper tape available in roll form for labeling. It will stick to most objects, can be torn off easily, can be written on with pen or pencil, and is unaffected by temperatures up to 275° F. Being oil and waterproof and acid resistant, tape can be used to label sterilizing, autoclaving, or refrigeration vials or vessels. It is offered in white, yellow, red, green, and blue colors and in ½, ¾, 1, 1½, and 2-in. widths. Made by **Professional Tape Co.**, 355 Burlington Ave., Riverside, Ill.

DEGREASING COMPOUND loosens carbon, grease, tar, sludge

By adding 1 qt of water to 5 oz of concentrated powder contained in each 1-qt Pow-A-Kit, a pleasant-smelling decarbonizing and degreasing compound is made. It loosens carbon, grease, tar, gum, and sludge from filters, gears, controls, tools, electrodes, and other small parts. The solution will not harm metal, plastic, or rubber materials; is nonflammable and noncorrosive; and will not harm the user's hands. Parts are immersed in the solution until foreign matter is loosened, then are rinsed with water. Kit is available in 1-qt size with dipping basket and combination kit which includes 1-qt size unit with dipping basket and an extra 5-oz refill can. Bulk quantities are also offered. Made by **Stewart-Hall Chemical Co.**, Box 66 T-104, Fleetwood Station, Mt. Vernon, N. Y.

MAXWELL AUTOMATIC RECESSING TOOLS
REDUCE INTERNAL FORMING COSTS

These fully automatic, quickly adjustable tools save time, and cut costs on precision grooving, undercutting, inaccessible spot facing, chamfering, back facing and necking!

Maxwell Type JF Automatic Recessing Tools operate on the principle of an eccentric cutter holder actuated on its own axis. This is accomplished by the unique Maxwell Helical Gear and Diagonal Toothed Rack Mechanism.

They are used with jig or fixture on automatic or manual feed machines. Long-life circular form cutters, or tool bit holders with tool bits may be used. Location and diameter of recess are individually controlled by stop collars, adjustable to within ±0.001-inch. Five sizes available to pilot into 1" to 2¼" bushings. Furnished with shank to suit.

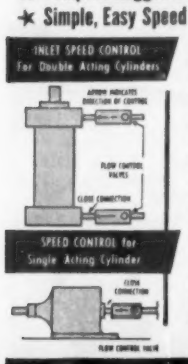
★ Accurate, Constant Cylinder Speed Control
★ Compact Rugged Design
★ Simple, Easy Speed Selection ★ For Air, Oil or Water Applications



Pneu-Trol Speed Control Valves, are widely used in hundreds of control applications because they combine in a short, compact body, a tapered fine thread needle for extremely accurate air or oil flow control and a floating retro ball check, which permits full flow in the opposite direction. Retro ball floats in most sensitive position to its seat, requiring only a slight differential pressure to fully open or close it.

Needle design permits maximum flow capacity in the controlled direction. Metal to metal needle and ball seats insure long trouble-free service. Simple, practical "O" gland structure eliminates troublesome leaking. Valve bodies machined from hex brass or aluminum for 2000 psi working pressures; steel and stainless steel for 5000 psi. Made in 5 female pipe sizes—⅛" to ¾". ATTRACTIVE PRICES . . . IMMEDIATE DELIVERY.

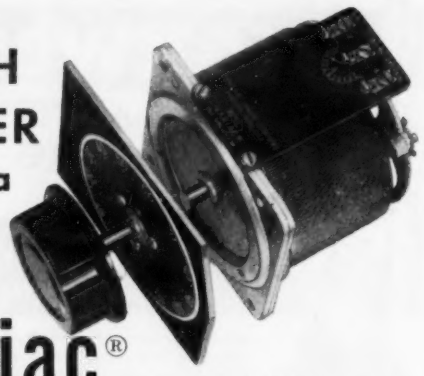
HIGH POWER from a Little



Variac®

The Type W5L VARIAC auto-transformer is designed for many applications in which output voltages not in excess of line are all that are needed. Through modifications of the popular Type W5 units, the power rating of the Type W5L is increased to 1265 va. As with all VARIACS the output voltage is continuously adjustable from zero. Other VARIAC features included are Duratrak brush construction for extra-long life . . . excellent regulation . . . low losses . . . linear output. The Type W5L VARIAC is moderately priced at $17.50.

New Processes & Materials

LIQUID CLEANING AGENT penetrates hydro-carbon grease film

Complete penetration and breakdown of soil-attracting hydro - carbon grease film is achieved by emulsifying action of All-Kleen Supercleaner, a multipurpose cleaning agent for use on heavily soiled floors. Emulsified dirt and soil are chemically loosened and can be flushed or rinsed away without rubbing. The concentrate contains no volatile materials or unpleasant odor, is harmless to skin and clothing, and will not damage any surface normally cleaned with soap and water. It can be applied in desired concentrations by mopping, wiping, spraying, or in automatic floor machines. Diluting it as much as 1 part to 100 parts of water will not destroy its effectiveness. Test samples are available free from **Hadco Corp.**, 2705 Detroit Ave., Cleveland 13, Ohio.

▲ For more details circle **NED-833 M8** on enclosed inquiry slip ▲

DRAWING REPRODUCTION PAPER one-step direct-positive type

Direct positive reproduction of engineering drawings in one step is possible with Photo-Positive photosensitive reproduction paper. It has a 100 per cent rag content base stock for high wet strength, dimensional stability, and uniform transparency. Material is wet-erasable without bleeding or feathering when new pencil or ink lines are drawn in over the erased area. Extra-thin and transparentized vellum grades are supplied in rolls up to 42 in. wide which fit all standard reproduction machines, or in cut sheets of any dimension up to 42 in. wide. Direct positive reproduction from the original results when it is exposed in any contact printer with a high intensity orange or yellow light source. Filters for other light sources are available. Made by **Peerless Photo Products, Inc.**, Dept. NED, Shoreham, L. I., N. Y.

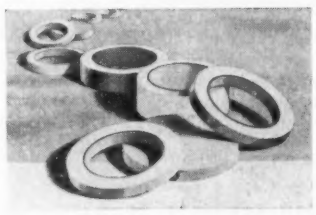
TEFLON FILM TAPE is stable under extreme conditions



Superior bondability and stability under extreme conditions are characteristic of Fluorolin 600, a Teflon film tape with pressure - sensitive silicone adhesive. Tape is made by fusing together layer upon layer of submicron size particles of Teflon to build up film thicknesses from 0.00025 to 0.005 in. By virtue of this multiple dipping process, film is free from pinholes and blemishes and has high mechanical, chemical, and electrical properties. Tape is used in winding coils, bundling wires, wrapping lead wires, insulating motor slots, and other aircraft, electrical, or electronic applications. Made by **Joclin Mfg. Co.**, 23 Lufbery Ave., Wallingford, Conn.

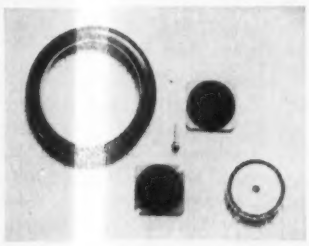
BONDED RUBBER-METAL PARTS made to close tolerance, fine finish



Permadizing system for bonding Hycar American rubber to metal achieves composite parts that are free of flash, precise in dimension, and have optically flat surfaces. Process can be used with almost any metal, and dimensions can be held as closely as with all-metal parts. Rubber surfaces as fine as 5 microfinish are produced. Rubber resists fuels, oils, and other fluids and has a temperature range from −65 to 250° F. Typical application of Permadizing parts is a valve poppet to seal off air pressure on the relief valve of an aircraft hydraulic system regulator. Parts are made by **Stillman Rubber Co.**, 5811 Marilyn Ave., Culver City, Calif.

seals tight...

EXPANDS under heat

KEY GRAPHITE PASTE seals oil, gas, and high-pressure pipe joints tighter because it expands under heat — forces its way into every crevice.

Easy to Apply — goes on threaded or gasket joints with a brush — can be thinned with water.

Easy to Break — never freezes joints — protects threads.

Safe — for use with flammable liquids (Listed by Underwriters Laboratories)

Lubricates — speeds assembly — won't seize or cross-thread.

Order KEY Graphite Paste from your supplier or send for FREE SAMPLE.

FASTENER FIT PROBLEM?

New booklet tells how SPS Thread Metrology Labs can help you solve it

Are threaded-fastener assembly problems causing you production losses? Do you have a particularly difficult fit and strength problem stemming from dimensional factors? Would you like help in setting up a reliable inspection gaging system for threaded parts? Then you will be interested in the services of SPS's new coast-to-coast network of Screw Thread Metrology Laboratories, described in detail in the 24-page booklet offered here (Form 2369). STANDARD PRESSED STEEL CO., Jenkintown 24, Pa.

EUCLID HOISTS

for Dependable Service

These hoists are highly efficient and strictly modern in every detail with oversize anti-friction bearings and heat treated steel parts in combination with a welded frame.

The planetary gearing and mechanical load brake are mounted in oil tight housings. The hoist gearing is assembled in the hoist drum.

This design produces an unusually compact, rugged and accessible hoist readily adapted to various installations and types of control.

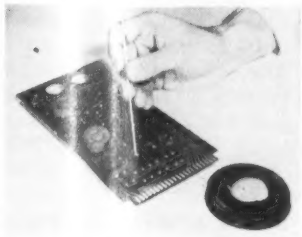
New Processes & Materials

CONDUCTIVE CEMENT repairs electrical components



Volume resistivity of Hysol 6250 conductive cement is measured at 0.01 ohm-cm at 25° C. Based on epoxy resins and 100 per cent solids, it offers high bond strengths to most materials. It can be used for repair of printed circuits and for bonding of electrical components where soldering cannot be tolerated. Compound cures in 24 hr at room temperature, or in 2 hr at 140° F. Made by **Houghton Laboratories, Inc.**, 333 Bush St., Olean, N. Y.

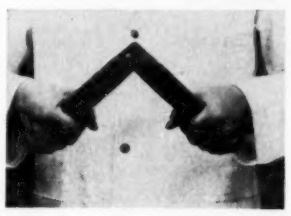
▲ For more details circle NED-859 M8 on enclosed inquiry slip ▲

SARAN ROPE resists practically all liquids

Operations where chemical action would quickly deteriorate regular fiber rope have little or no effect on liquid and corrosive-resistant Saran rope. Saran is a Dow Chemical Co. extruded thermoplastic material. It resists water, chemicals, solvents, acids, and common alkalies. Saran rope is nonabsorbent and noninflammable when exposed to high heats. It has great resistance to abrasion and is unaffected by age or weathering. About 14 per cent heavier than Manila rope, its strength is about 30 per cent less than that of Manila rope. Saran rope is offered in 1/4, 5/16, 3/8, 7/16, 1/2, and 5/8 in. diameters. Lengths up to 2400 ft or longer are obtainable. Made by **Columbian Rope Co.**, 309 Genesee St., Auburn, N. Y.

▲ For more details circle NED-860 M8 on enclosed inquiry slip ▲

FLEXIBLE POLYETHYLENE PIPE resists cracking under stress folds



Remarkable resistance to stress - cracking is combined with chemical resistance comparable to that of polyvinyl chloride in Carlon H-Mol flexible polyethylene pipe. It will handle highly corrosive fluids at low pressures under operating temperatures as high as 150° F. Diameters from 3 to 6 in. are available in continuous lengths folded up in units of 500 lb total weight. Thus, a 4-in. pipe could be obtained in about 400-ft lengths. Pipe is easily unfolded by applying steam to the bends. Coils in sizes of 1/2 through 2 in. are also available, as well as 30-ft lengths in 3, 4, 6, and 8-in. sizes. Made by **Carlon Products Corp.**, 10225 Meech Ave., Cleveland 5, Ohio.

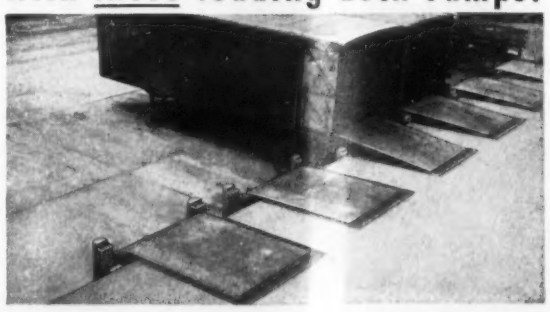
***NO OPERATING COST* with *these* loading dock ramps!**



RITE-HITE Full Automatic RAMPS are *completely truck actuated*... save manpower for other work

Consider, too, these additional Rite-Hite advantages:

*Precision, mechanical counterbalance—no starters, motors, pumps, cylinders, piping, wiring, gears, cables to cause trouble.
*Little or no maintenance—heat, cold, snow, water, ice do not effect Rite-Hite's smooth operation.
*Maximum safety—Rite-Hite's ramp platform can never drop because of a power failure.
*Simplest to install—shipped completely assembled for easy installation in simple dock opening.

Let us demonstrate — right in your plant or shop — how 'Budgit' Hoists can make your lifting problem disappear.

FREE DEMONSTRATION In YOUR Plant or Shop

Make us prove how 'Budgit' Hoist can solve YOUR lifting problem

Your local 'Budgit' Electric Hoist distributor now makes you this special offer:

He'll bring a 'Budgit' Hoist to the spot you name, hang it up, plug it in, and show you how 'Budgit' can make your lifting job fast, safe and effortless.

No obligation. Demonstration takes only minutes. All you need is a place to hang the Hoist and an electrical outlet AC or DC (or 12-volt battery).

The 'Budgit' Electric Hoist can handle any kind of load up to 2 tons, indoors or out. One-hand control leaves your hand free to guide the load. Hairline stops and starts let you "spot" your load gently within 1/100th of an inch. Two automatic brakes give complete safety.

CALL YOUR SHAW-BOX DISTRIBUTOR TODAY or write for your copy of bulletin 402 and 404. No obligation of course.

58A-1

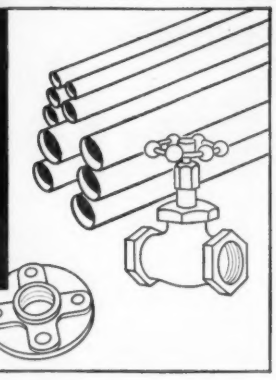
Plastic Pipe

stocked for you at Whitehead Metal "Supermarkets"



New applications for plastic pipe are being discovered every day. The advantages of this modern pipe are many—its resistance to corrosion and electrolytic actions, its light weight and comparatively low cost. Whitehead stocks a full line of flexible, rigid and semi-rigid types in all important commercial resins. Sizes range from ⅛" to 6" IPS. Fittings, cements, valves and accessories are available from stock. Whitehead's extensive plastic pipe know-how is at your disposal, too.

Write for detailed literature, mentioning if possible, the use you had in mind.

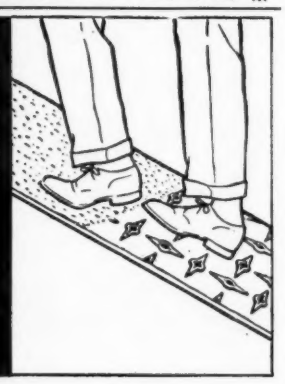
ALUMINUM
Tread Plate

DIAMOND OR ABRASIVE
stocked for you at Whitehead Metal "Supermarkets"



Plant Safety Engineers are finding Aluminum Tread Plate the answer to flooring problems. Light in weight and corrosion resistant, there are two types available. The conventional diamond pattern is used for normal protection, and abrasive non-skid plate provides maximum gripping power under oily, wet or dry conditions.

Both plate types are available in 48" by 144" sheets in three thicknesses—0.125", 0.190" and 0.375". Write for the illustrated descriptive booklet, which gives additional information as well as installation suggestions.

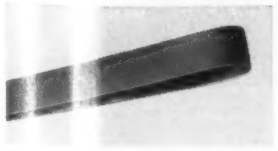
New Processes & Materials

PLASTIC BELTING
made endless without fasteners



Made in all standard widths and thicknesses for a wide variety of applications, Dixylon industrial plastic belting can be made endless on the job in a few minutes without fasteners or sewing. The prestretched polyamide plastic product can be used for transmission, conveying, heavy duty drives, and high speed drives. It resists temperature, humidity, oils, and most acids, and has a nonslip running surface that eliminates any need for belt dressing. Only tools required for joining the belting are a hand or power skiver, a simple hand press, and Dixylon solution. Made by **R. & J. Dick Co.**, Totowa, N. J.

For more details circle NED-883 M8 on enclosed inquiry slip

DRY BONDING ADHESIVE
bond made when heat is applied

Heatweld dry bonding adhesive is applied to fabric, leather, paper, plastic, and other materials, then allowed to dry. A permanent bond is obtained when heat is applied, making it possible to adhere cemented materials to almost any surface. Bond may be made days, months, or years later. Adhesive is transparent, nonstaining, and resists washing and dry cleaning. It is supplied in liquid form for application by brush, roller, spray, or coating machine. Heating of the noninflammable product for application is not required. Made by **Adhesive Products Corp.**, 1660 Boone Ave., New York 60, N. Y.

For more details circle NED-884 M8 on enclosed inquiry slip

METALLIC TEXTURE FINISH
has three-dimensional appearance

One-coat Tri-Namic finish, offered in a wide range of brilliant colors, features a consistency of pattern that minimizes rejects. The metallic texture finish (shown, approximately full size) is easily applied by any spray method to all production metals, many plastics, wood, ceramics, and other materials. It has a three-dimensional appearance. Air or bake drying gives it durability, high corrosion resistance, top gloss, and color retention. Made by **Universal Paint & Varnish**, Inc., Northfield & Krick Roads, Bedford, Ohio.

PIPE INSULATION for 100-1600° F temperature range

Composed of expanded silicas and asbestos fibers, All-Temp pipe and block insulation is suited for service in temperatures ranging from 100 to 1600° F. This nonbrittle, easily worked insulation retains its high thermal efficiency and strength, even through continuous exposure to excessive heat and humidity. Made by **Philip Carey Mfg. Co.**, Lockland, Cincinnati 15, Ohio.

15-TON PRESS BRAKE forms 4-ft length of 16-gage steel

Added to company's line of power press brakes is the Series IB 15-ton brake capable of a variety of forming, bending, punching, and blanking operations. Unit will bend a 4-ft length of 16-gage mild steel, has 2-in. stroke, and throat depth of 6½ in. It can be infinitely adjusted for speeds from 17 to 50 strokes per minute. Brake features inboard location of all driving parts and instant ram control for smooth, sensitive jogging. Heavy duty friction clutch discs are easily replaced without disassembly of the clutch. Movable foot treadle, totally enclosed worm gear drive, built-in lubrication, and front-controlled adjustable speed drive are features. Made by **Niagara Machine & Tool Works**, 683 Northland Ave., Buffalo 11, N. Y.

Testing Problems?

• TENSILE • TRANSVERSE
• COMPRESSION • SHEAR

A DILLON UNIVERSAL TESTER *will solve them all!*

You can make *any* workbench a testing area with a DILLON Model L Bench Tester. This low cost instrument precision-checks metal, plastics, wire, rubber, springs, etc. Operates in tensile, compression, transverse or shear! Handles round, flat or special shapes. Hand wheel or motorized. Equipped with max. indicator. 7 interchangeable gauges. For materials up to 125,000 lbs. PSI tensile. Wide range of gripping fixtures. Also available on stand.

MODEL L

MODEL M

FOR EXTREMELY DELICATE MATERIALS
Model M for low strength specimens between 0 & 300 lbs. Meets ASTM & Fed. specs. Pendulum principle. Has 5 scales.

Armite LED-PLATE

ANTI-SEIZE SEALING COMPOUND

The Thread Lubricant and Sealant for PIPE ★ BOLTS ★ STUDS

For threaded fittings YOU can't beat LED-PLATE.

Try it for assembly, maintenance or production.

A REAL THREAD SEALER
Pressures held to 50,000 psi hydraulic fluids, 3500 psi air, 1000 psi gases. Use for: hydraulic fluids, gases, steam, ammonia, air, acids, fuels, water, etc.

NO HEAT FREEZE
Temperature range: minus 350° to plus 2987° F.

NO CORROSION WELD
Prevents rusting, acid-etch and corrosion.

NO GALLING OR SEIZING
Recommended for aluminum, stainless, titanium, plastic, steel, brass, etc.

EASY ASSEMBLY-DISASSEMBLY
Fast, easy, anytime. Low torque. No seize.

GOVERNMENT SPECIFICATIONS
met as an anti-seize for high temperatures.

Approved for: Butane, Propane, Gasoline, Petroleum oils

JEFFREY RIVETLESS CHAIN

for general conveying systems, overhead trolleys, scrapers

STRONG...without needless bulk weight

DETACHABLE...for fast, easy assembly—lower maintenance costs

ADAPTABLE...to irregular courses, vertical or horizontal conveyors

Available in alloy heat-treated steel

Jeffrey drop forged, heat-treated Rivetless Chain ranges to a maximum ultimate strength of 130,000 lbs. Weight—9 lbs. per foot. Operates over irregular courses in either vertical or horizontal directions. Links and pins can be reversed when excessive wear is evident, increasing chain life and decreasing maintenance costs. Simplicity of design makes single link or section replacements fast and easy. Jeffrey Rivetless Chain is detachable. Assembly is aided by the cutout portion of center link which allows side bars to be brought together for easy insertion or removal of the pin.

New, Lightweight, Powerful FLEXIBLE TOOL SHAFT Connects To Any Motor

Stow flexible tool shafts increase precision, eliminate operator fatigue on production grinding, polishing, sanding and other finishing operations in which the operator must hold the tool for long periods of time. Up to 3 HP can be transmitted through these new tool shafts, which consist of a core made of highest grade music wire rotating inside a rubber-covered casing. Each shaft furnished with ball bearing motor connection and high-speed ball bearing handpiece with removable wheel Arbor having ¼-20" threads. An angle head can be used in place of the handpiece as shown in the photograph.

Four Sizes of these shafts are available . . . models 38, 40, 50 and 63, which come in 6-foot standard lengths. The largest shaft, model 63, will handle 3 HP at speeds up to 6900 RPM and has a maximum capacity for various accessories as follows: grinding wheel, 8" x 1"; buffing wheel, 8" x 1"; sanding disc, 9" diameter; sanding drum, 6" x 2½"; wire brush, 8" x 2"; steel drills, ½" diameter.

Aftercooler and Cyclone Separator designed for cleaner, dryer compressed air

The Adams Aftercooler and Cyclone Separator are designed to efficiently condense and remove water from compressed air and process gas. Condensed moisture and entrained dirt and oil are subsequently removed in a cyclone type separator. This unit is scientifically designed for maximum removal efficiency over a wide range of flow rates.

For normal use, units are available to cool gases to within 10° F of the temperature of the cooling water. Specially designed units are available to permit a 2° F approach to cooling water temperature, for application where low moisture content is critical.

Adams Aftercoolers and Separators are available from stock to handle 20 - 40,000 cfm with 10° cooling and 25 - 19,200 cfm where it is necessary to cool within 2°F of the cooling water. Special units can be supplied to suit an unlimited range of requirements. In all cases the maximum pressure loss at rated capacities is ½ psi.

This wide range of sizes enables the economical utilization of Adams Aftercoolers and Separators in virtually all industrial application. For further information on how R. P. Adams' units will solve your compressed air problems and save you money, write today for Bulletin 711. R. P. Adams Co., Inc., 227 East Park Drive, Buffalo 17, New York. *Advt.*

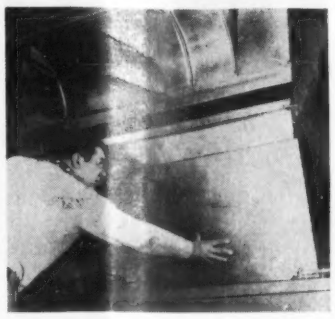
New Processes & Materials

DUCT INSULATION
is foil faced and incombustible



Foil facing of this spun mineral wool duct insulation provides a vapor barrier that meets "fireproof" building code requirements. It also presents an attractive finished appearance to ductwork. Insulation is offered in 24 x 48-in. semirigid sheets, 1, 1½, and 2 in. thick. Density is only 7 lb per cu ft. and it is easy to handle and cut with a knife. Thermal conductivity is 0.24 Btu/in./hr/sq ft/deg F. It will withstand temperatures to 250° F. Made by **Baldwin-Hill Co.**, 1153 Breunig St., Trenton 2, N. J.

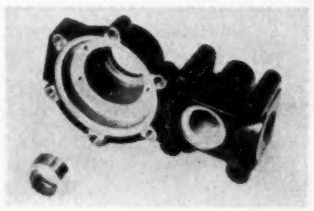
For more details circle NED-913 M8 on enclosed inquiry slip

ELECTRICAL LAMINATE
flame-retardant, self-extinguishing

High dielectric strength and resistance to moisture, plus good flame retardance and self-extinguishing properties make Grade FR-1 paper-base laminate suitable for many electrical applications. Made with a phenolic resin binder, it has the general characteristics of Grade XX hard paper-base laminate. It is available in strips, sheets of 36 x 36 in. and 36 x 72 in., and in thicknesses from 0.031 to 1½ in. Color is red and finish is semigloss. Facilities for fabricating to customers' designs and specifications are available. Made by **Synthane Corp.**, Oaks, Pa.

For more details circle NED-914 M8 on enclosed inquiry slip

TEFLON VACUUM IMPREGNATION
minimizes starting wear of parts



Flat or curvilinear moving parts can be impregnated with Teflon to eliminate initial starting wear. Vacuum impregnation of the metal's pores with Teflon provides self-contained lubrication. Teflon is actually bonded into the metal as an integral part of it and will not bleed out under friction, heat, or pressure. In instances of light contact between parts, Teflon can function as the sole lubricant. The plastic impregnant is fungusproof and resists solvents, glycols, alcohol, salts, aromatic fuels, and other chemicals. Developed by **Western Sealant Co.**, 9999 W. Jefferson Blvd., Culver City, Calif.

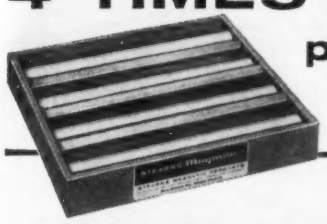
4 TIMES MORE protective surface!



NEW Stearns Indox GRATE MAGNET

The new Stearns Indox Grate Magnet actually presents *4 times more collection surface* to remove tramp iron from free-flowing materials. Here's the secret: the magnetic collecting tubes have *continuous poles* along their entire length — no dead spots where iron particles can slip past (see comparative photos, below right).

Stearns Indox Grate Magnet is available in a wing type for hopper or floor installation, and a drawer type for closed chutes and ducts. Single or double-bank models, standard sizes to fit most requirements.

Write today for free literature on the new Stearns Indox Grate Magnet. Ask for Bulletin 1072-L.

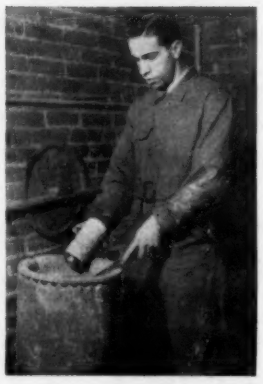
DROSS RECLAIMER



Recovery of 95% of tin, lead, zinc, cadmium or antimony may be had by use of Slago Dross Reclaimer, it is announced by this manufacturer in a current news release.

Slago is a newly improved formula, it is explained, that instantly on application dissolves the dross, leaving nothing but fine dirt. The formula contains spirits of metal which vitalize metal as dross is dissolved. The body of the metal is visibly improved; a clean silvery spider web appearance follows the washing action of Slago.

All non-ferrous metals show this visible improvement. The formula is especially effective in preventing tin burn out in high melting point babbitt and solders, increases fluidity and gives better pouring characteristics, it is further pointed out. Users of large melts will find no further need to sweeten metal when Slago is used, as stability is maintained. A special trial offer is made of 6-1 lb. shaker top cans of the dross reclaimer for $5.00, f.o.b. Philadelphia. **FARRELLOY COMPANY,** 1246 North 26th Street, Phila. 21, Penna.

HAVE YOU TRIED #1 ACID BRUSHES, 25% MORE HAIR, $3.30 PER GROSS, F.O.B. PHILADELPHIA. *(Advt.)*

NEW! WATER IMPACT SAVES PLUMBING BILLS

Cleans Instantly Difficult Stoppages

Sewers ½" to 6" Diam.

SIMPLE TO OPERATE, THIS NEW GUN DELIVERS AN IMPACT WHICH INSTANTLY DISLODGES OBSTRUCTIONS. NO NEED TO REMOVE PIPE, GREASE TRAP, OR CROSS PIECE.

CHICAGO, Dec. 1st.—Just introduced is a Free Booklet on a New Discovery which enables the Janitor, Maintenance Man, or Home Owner to clean any clogged Sewer Drain.

Yet anyone can operate this new **Plumbers Flushing** Gun which releases air pressure on a solid shaft of water cleaning the most stubborn stoppages up to 200 feet. TOILETS, SINKS, URINALS, BATHTUBS, FLOOR DRAINS, and HOUSE - TO - STREET SEWERS clogged with Grease, Rags, Sand, Roots and paper melt away instantly when struck by the Hammer-like blow of this new unit.

There is no need to remove wall or pipe, or Grease Trap. A special attachment allows water to flow from the faucet through the Gun while air is released on the pipe. Vents or stacks are no obstacle, as force tends to strike wherever the water lays. But now, what is this Plumbers Flushing Gun worth in **COSTLY PLUMBING BILLS SAVED?** Tear this Ad out now—and write your name and address beside it for **FREE BOOKLET.** Obey that urge. No Agent will call. A postcard will do (Chicago Phone KIldare 5-1702).

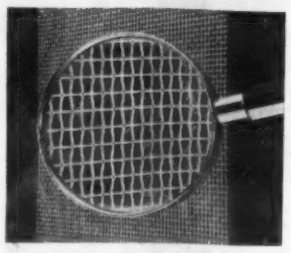
New Processes & Materials

BRAZED WIRE CLOTH withstands severe vibration



This industrial wire cloth is brazed after weaving to prevent shifting of the wires in installations where material is subjected to severe vibration. Currently produced size is this 8 x 8-mesh woven from 0.020-in. diameter T-304 stainless steel wire and copper brazed at each intersection. Rigid structural qualities result. Made by **Cambridge Wire Cloth Co.,** Cambridge, Md.

THREAD COMPOUND retains homogenized consistency

Latest formulation of antiseizing thread compound retains its homogenized consistency indefinitely. It is nonsettling, nonskinning, and nonhardening in the can and provides effective lubricating and antiseizing properties at up to 1050° F. Compound is highly adherent, will not run out from vertical joints or under high heat exposure, and stays flexible inside of joints. It can be used on threaded pipe joints, bolt studs, and for coating gaskets. Compound is available in quart and half-pint cans. Made by **Crane Co.,** 836 S. Michigan Ave., Chicago 5, Ill.

COST US NOTHING!!

READ HOW MAGLINER MOBILE LOADING RAMP PAID FOR ITSELF IN JUST 4 MONTHS

PROBLEM—*A ground level plant, Millington Mfg. Co., Upper Sandusky, Ohio. Lack of dock facilities necessitated costly hand loading and prevented efficient in-plant material handling.*

SOLUTION—Incoming shipments are now unloaded by power trucks using a Magliner magnesium Mobile Loading Ramp. One man unloads a 20,000 lb. shipment in 20 minutes that formerly took 12 to 16 manhours. Company now receives materials in 1,000 lb. containers (formerly 50 lb. bags)—effecting extra savings in processing and feeding presses. In the words of the manufacturer, "Our Magliner paid for itself in 4 months." *Actually, cost us nothing!*

Do you have an older building . . need extra or movable dock facilities . . want to avoid costly hand loading? A Magliner Mobile Loading Ramp is the practical solution. A loading dock on wheels where you want it . when you want it! One man moves it.
